## PHILIPPINE LONG DISTANCE TELEPHONE COMPANY AND SUBSIDIARIES

### NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

---

#### 1. Corporate Information

The Philippine Long Distance Telephone Company, or PLDT, or Parent Company, was incorporated under the old Corporation Law of the Philippines (Act 1459, as amended) on November 28, 1928, following the merger of four telephone companies under common U.S. ownership. Under its amended Articles of Incorporation, PLDT's corporate term is currently limited through 2028. In 1967, effective control of PLDT was sold by the General Telephone and Electronics Corporation, then a major shareholder since PLDT's incorporation, to a group of Filipino businessmen. In 1981, in furtherance of the then existing policy of the Philippine government to integrate the Philippine telecommunications industry, PLDT purchased substantially all of the assets and liabilities of the Republic Telephone Company, which at that time was the second largest telephone company in the Philippines. In 1998, First Pacific Company Limited, or First Pacific, through its Philippine and other affiliates, collectively the First Pacific Group, acquired a significant interest in PLDT. On March 24, 2000, NTT Communications Corporation, or NTT Communications, through its wholly-owned subsidiary NTT Communications Capital (UK) Ltd., or NTTC-UK, became PLDT's strategic partner with approximately 14% economic and voting interest in the issued and outstanding common stock of PLDT. Simultaneous with NTT Communications' investment in PLDT, the latter acquired 100% of Smart Communications, Inc., or Smart. On March 14, 2006, NTT DoCoMo, Inc., or NTT DoCoMo, acquired from NTT Communications approximately 7% of PLDT's then outstanding common shares held by NTT Communications with NTT Communications retaining ownership of approximately 7% of PLDT's common shares. Since March 14, 2006, NTT DoCoMo has made additional purchases of shares of PLDT and together with NTT Communications beneficially owned 20.86% of the outstanding shares of PLDT's common stock as at March 31, 2008. On February 28, 2007, Metro Pacific Asset Holdings, Inc., a Philippine affiliate of First Pacific, completed the acquisition of an additional interest of approximately 46% in Philippine Telecommunications Investment Corporation, or PTIC, a shareholder of PLDT. This additional investment in PTIC represents an attributable interest of approximately 6.4% of the then issued common shares of PLDT and thereby raised First Pacific Group's beneficial ownership to approximately 28% of PLDT's shares of common stock as at that date. First Pacific Group had beneficial ownership of approximately 26.17% in PLDT's outstanding common stock as at March 31, 2008.

The common shares of PLDT are listed and traded on the Philippine Stock Exchange, or PSE. On October 19, 1994, an American Depositary Receipt, or ADR, facility was established, pursuant to which Citibank N.A., as the depositary, issued ADRs evidencing American Depositary Shares, or ADSs, with each ADS representing one PLDT common share with a par value of Php5 per share. Effective February 10, 2003, PLDT appointed JP Morgan Chase Bank as successor depositary for PLDT's ADR facility. The ADSs are listed on the New York Stock Exchange, or NYSE, in the United States and are traded on the NYSE under the symbol "PHI". As at March 31, 2008, there were a total of over 43 million ADSs outstanding.

Until early 2007, the ADSs were also listed on the NYSE Arca. However, PLDT voluntarily delisted its ADSs from the NYSE Arca, effective February 12, 2007, after determining that doing so is in the best interest of PLDT and its stockholders.

PLDT operates under the jurisdiction of the Philippine National Telecommunications Commission, or NTC, which jurisdiction extends, among other things, to approving major services offered by PLDT and certain rates charged by PLDT.

Our registered office address is Ramon Cojuangco Building, Makati Avenue, Makati City, Philippines.

## 2. Summary of Significant Accounting Policies and Practices

### Basis of Preparation

Our unaudited consolidated financial statements have been prepared under the historical cost basis except for the revaluation of derivative financial instruments, available-for-sale financial investments and investment properties that have been measured at fair values.

Our unaudited consolidated financial statements include, in our opinion, adjustments consisting only of normal recurring adjustments, necessary to present fairly the results of operations for the interim periods. The results of operations for the three months ended March 31, 2008 are not necessarily indicative of the results of operations that may be expected for the full year.

Our unaudited consolidated financial statements are presented in Philippine peso, PLDT's functional and presentation currency and all values are rounded to the nearest million except when otherwise indicated.

### Basis of Unaudited Consolidated Financial Statements Preparation

Our unaudited consolidated financial statements include the financial statements of PLDT (the "Parent Company") and those of the following subsidiaries (collectively, the "PLDT Group").

Name of Subsidiary	Place of Incorporation	Principal Activity	Percentage of Ownership	
			Direct	Indirect
<b>Wireless</b>

Level Up! (Philippines), Inc., or Level Up!	Philippines	Publisher of online games	–	60.0
Airborne Access Corporation, or Airborne Access	Philippines	Wireless Internet services	–	51.0

Subsidiaries are fully consolidated from the date when control is transferred to the PLDT Group and cease to be consolidated from the date when control is transferred out of the PLDT Group.

The financial statements of our subsidiaries are prepared for the same reporting period as PLDT. We prepare our unaudited consolidated financial statements using uniform accounting policies for like transactions and other events with similar circumstances. All intra-group balances, income and expenses and unrealized gains and losses resulting from intra-group transactions are eliminated in full.

Minority interest represents the portion of profit or loss and net assets not held by us and are presented separately in the unaudited consolidated statements of income and within equity in the unaudited consolidated balance sheets, separately from equity attributable to equity holders of PLDT. Acquisition of minority interests is accounted for using the parent entity extension method, whereby, the difference between the consideration and the net book value of the share of the net assets acquired is recognized in goodwill.

Minority interests represent the equity interests in Piltel, Level Up!, Mabuhay Satellite, 3rd Brand, Maratel, BCC, Digital Paradise, Digital Paradise Thailand, netGames, Infocom and Airborne Access not held by the PLDT Group.

When subsidiaries are sold, the difference between the selling price and the net assets plus cumulative translation differences and unamortized goodwill is recognized in the unaudited consolidated statement of income.

#### ***Acquisition of Connectivity Unlimited Resource Enterprise, or CURE***

On April 28, 2008, Smart acquired the entire issued and outstanding capital stock of PH Communications Holdings Corporation, or PH Communications, and Francom Holdings, Inc., or FHI, which collectively own 100% of CURE for the total amount of Php420 million. PH Communications and Francom Holdings own 96.57% and 3.43%, respectively, of CURE. Smart also intends to directly invest up to Php210 million in CURE, in the form of subscriptions for new shares of CURE. The fresh funds will be used by CURE for working capital purposes.

The acquisition dovetails with Smart's previously announced plan to provide expanded and enhanced 3G services nationwide, including higher speed wireless broadband services. CURE is envisioned to provide Smart with a platform to offer and provide differentiated 3G services for niche markets.

#### **Statement of Compliance**

Our unaudited consolidated financial statements have been prepared in conformity with Philippine Financial Reporting Standards, or PFRS.

### **Changes in Accounting Policies**

Our accounting policies adopted are consistent with those of the previous financial period except for policy on revenue recognition on installation fees as discussed below and the adoption of the new and amended Philippine Accounting Standards, or PAS, PFRS and Philippine Interpretations that became effective in 2008.

### **Voluntary Change in Revenue Recognition Policy for Installation Fees**

In 2007, we changed our revenue recognition policy for installation fees and have elected to defer and amortize our installation fees and its corresponding costs over the expected average periods of the customer relationship of our subscribers. Prior to 2007, we recognized installation fees and its corresponding cost outright. Our change in revenue recognition policy was made to better reflect the expected utility of installation fees over the terms of customer relationship.

We accounted for the change in accounting policy retroactively and accordingly restated our comparative unaudited consolidated financial statements to conform to the said change. The after tax effect of the change was an increase in our unaudited consolidated net income of Php39 million for the three months ended March 31, 2007, and decrease in the retained earnings beginning of Php456 million as at March 31, 2007. Basic earnings per common share increased by Php0.21 for the three months ended March 31, 2007.

Our consolidated unearned revenues related to the unamortized installation fees amounted to Php438 million and Php479 million as at March 31, 2008 and December 31, 2007, respectively, and are included in our “Accrued expenses and other current liabilities” and “Deferred credits and other noncurrent liabilities” in the unaudited consolidated balance sheets.

### **Adoption of New Standards and Interpretations**

Our adoption of the following new and amended standards and interpretations did not have any effect on our unaudited consolidated financial statements. Our adoption, however, gave rise to additional disclosures on the following:

- ***Philippine Interpretation IFRIC 11, “PFRS 2, Group and Treasury Share Transactions”***. This standard is effective for annual periods beginning on or after March 31, 2007. This interpretation addresses issues relating to whether transactions should be accounted for as equity-settled or as cash-settled under PFRS 2 and issues concerning share-based payment arrangement involving entities within the same group. The interpretation had no impact in our unaudited consolidated financial statements.
- ***Philippine Interpretation IFRIC 12, “Service Concession Arrangements”***. This interpretation has become effective for financial years beginning on or after January 1, 2008. This interpretation applies to contractual arrangements whereby a private sector party participates in the development, financing, operation and maintenance of infrastructure for public sector services. This interpretation is not relevant to our current operations.
- ***Philippine Interpretation IFRIC 14, “PAS 19 – The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction”***. This interpretation has become effective for financial years beginning on or after January 1, 2008. Philippine Interpretation IFRIC 14 addresses how to assess the limit under PAS 19, “Employee Benefits”, on the amount of the pension scheme surplus that can be recognized as an asset in our unaudited consolidated balance sheet, in particular, when a minimum funding requirement exists. The specific issues addressed by the interpretation are: (1) a refund is available to the entity only if there is an unconditional right to the refund and such refund is measured as the amount of the surplus at the balance sheet date less any associated costs; (2) when there is an unconditional right to a refund and there is no minimum funding requirement, an entity determines the benefit available as the lower of the surplus in the plan and the present value of the future service cost to the entity; (3) when a minimum funding requirement exists, the benefit available is the present value of

the estimated future service cost less the estimated minimum funding contribution required in respect of the future accrual of benefits in that year; and (4) if an entity has a minimum funding requirement to pay additional contributions, the entity must determine whether the contributions will be available as a refund or reduction in future contributions after they are paid into the plan. If not, a liability is recognized when the obligation arises. The interpretation had no impact in our unaudited consolidated financial statements.

## **Significant Accounting Policies and Practices**

### ***Investments in Associates***

Investments in associates are accounted for using the equity method of accounting and are initially recognized at cost. An associate is an entity in which we have significant influence and which is neither a subsidiary nor a joint venture.

Under the equity method, the investment in associate is carried in the unaudited consolidated balance sheet at cost plus post acquisition changes in our share of net assets of the associate. Goodwill relating to an associate is included in the carrying amount of the investment and is not amortized. Our unaudited consolidated statement of income reflects the share of the results of operations of the associates. Where there has been a change recognized directly in the equity of the associate, we recognize our share in such change and disclose this, when applicable, in our consolidated statement of changes in equity. Profits or losses resulting from our transactions with and among our associates are eliminated to the extent of our interest in those associates.

Our reporting dates and that of our associates are identical and our associate's accounting policies conform to those used by us for like transactions and events in similar circumstances.

### ***Investments in Joint Ventures***

Investments in a joint venture that is a jointly controlled entity is accounted for using the equity method of accounting. The financial statements of the joint venture are prepared for the same reporting period as the unaudited consolidated financial statements of PLDT. Adjustments are made where necessary to bring the accounting policies in line with those of PLDT Group.

Adjustments are made in our unaudited consolidated financial statements to eliminate our share of unrealized gains and losses on transactions between PLDT and our jointly controlled entity. Losses on transactions are recognized immediately if the loss provides evidence of a reduction in the net realizable value of current assets or an impairment loss. The joint venture is carried at equity method until the date on which we cease to have joint control over the joint venture.

### ***Foreign Currency Transactions and Translations***

The functional and presentation currency of the entities under PLDT Group (except for SCH, SGP, 3rd Brand, Mabuhay Satellite, PLDT Global, Digital Paradise Thailand and SPi and certain of its subsidiaries) is the Philippine peso. Transactions in foreign currencies are initially recorded in the functional currency rate prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional closing rate of exchange prevailing at the balance sheet date. All differences are recognized in the unaudited consolidated statement of income except for foreign exchange losses that qualify as capitalizable borrowing costs during the construction period for exchange gains or losses are treated as taxable income or deductible expenses in the period such exchange gains or losses are realized. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates as at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. Any goodwill arising on the acquisition of a foreign operation and any fair value adjustments to the carrying amounts of assets and liabilities arising on the acquisition are treated as assets and liabilities of the foreign operation and translated at the closing rate.

The functional and presentation currency of Mabuhay Satellite, PLDT Global, SPi and certain of its subsidiaries is the U.S. dollar; Thai baht for Digital Paradise Thailand and Singapore dollar for SCH, SGP and 3rd Brand. As at the reporting date, the assets and liabilities of these subsidiaries are translated into the presentation currency of the

PLDT Group at the rate of exchange prevailing at the balance sheet date, and income and expenses of these subsidiaries are translated at the weighted average exchange rate for the period. The exchange differences arising on translation were recognized as a separate component of equity as cumulative translation adjustments. On disposal of these subsidiaries, the amount of deferred cumulative translation adjustments recognized in equity relating to subsidiaries are recognized in the unaudited consolidated statement of income.

### ***Property, Plant and Equipment***

Property, plant and equipment, except for land, is stated at cost less accumulated depreciation and amortization and any accumulated impairment losses. Land is stated at cost less any impairment in value. Cost includes the cost of replacing part of the property, plant and equipment when that cost is incurred, if the recognition criteria are met. Likewise, when a major inspection is performed, its cost is recognized in the carrying amount of the property, plant and equipment as a replacement if the recognition criteria are satisfied. All other repair and maintenance costs are recognized in profit or loss as incurred.

An item of property, plant and equipment is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in profit or loss in the period the asset is derecognized.

Depreciation and amortization are calculated on a straight-line basis over the estimated useful lives of the assets.

The residual values, estimated useful lives and depreciation and amortization method are reviewed at least at each financial year-end to ensure that the periods and method of depreciation and amortization are consistent with the expected pattern of economic benefits from items of property, plant and equipment.

Property under construction is stated at cost. This includes cost of construction, plant and equipment and other direct costs. Property under construction is not depreciated until such time that the relevant assets are completed and substantially available for their intended use.

### ***Borrowing Costs***

Borrowing costs are capitalized if they are directly attributable to the acquisition, construction or production of a qualifying asset. Capitalization of borrowing costs commences when the activities necessary to prepare the asset for intended use are in progress and expenditures and borrowing costs are being incurred. Borrowing costs are capitalized until the asset is ready for their intended use. If the resulting carrying amount of the asset exceeds its recoverable amount, an impairment loss is recognized. Borrowing costs include interest charges and other costs incurred in connection with the borrowing of funds, as well as exchange differences arising from foreign currency borrowings used to finance these projects to the extent that they are regarded as an adjustment to interest costs.

All other borrowing costs are expensed as incurred.

### ***Asset Retirement Obligations***

We are legally required under various lease agreements to dismantle the installation in leased sites and restore such sites to their original condition at the end of the lease contract term. We recognize the liability measured at the present value of the estimated costs of these obligations and capitalize such costs as part of the balance of the related item of property, plant and equipment.

The amount of asset retirement obligations are accreted and such accretion is recognized as interest expense.

### ***Investment Properties***

Investment properties are initially measured at cost including transaction costs. The carrying amount includes the cost of replacing part of an existing investment property at the time that cost is incurred if the recognition criteria are met; and excludes the costs of day-to-day servicing of an investment property. Subsequent to initial recognition, investment properties are stated at fair value, which have been determined based on the latest

valuations performed by an independent firm of appraisers. Gains or losses arising from changes in the fair values of investment properties are included in the unaudited consolidated statement of income in the period in which they arise.

Investment properties are derecognized when they have been disposed of or when the investment property is permanently withdrawn from use and no future benefit is expected from its disposal. Any gain or loss on the retirement or disposal of an investment property is recognized in the unaudited consolidated statement of income in the period of retirement or disposal.

Transfers are made to or from investment property only when there is a change in use. For a transfer from investment property to owner occupied property, the deemed cost for subsequent accounting is the fair value at the date of change in use. If owner occupied property becomes an investment property, we account for such property in accordance with the policy stated under property, plant and equipment up to the date of change in use.

No assets held under operating lease have been classified as investment properties.

### ***Business Combinations and Goodwill***

Business combinations are accounted for using the purchase method of accounting. This involves recognizing identifiable assets (including previously unrecognized intangible assets) and liabilities (including contingent liabilities and excluding future restructuring) of any acquired business at fair value.

Goodwill acquired in a business combination is initially measured at cost, such cost being the excess of the cost of the business combination over our interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities. Following initial recognition, goodwill is measured at cost less any accumulated impairment loss. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of our cash-generating units, or groups of our cash-generating units, that are expected to benefit from the synergies of the combination, irrespective of whether our other assets or liabilities are assigned to those units or groups of units. Each unit or group of units to which the goodwill is allocated: (1) represents our lowest level at which the goodwill is monitored for internal management purposes; and (2) is not larger than a segment based on either our primary or secondary reporting format determined in accordance with *PAS 14, "Segment Reporting"*.

Where a business combination agreement provides for an adjustment to the consideration of the combination contingent on future events or achieving specified earnings level in future periods, we recognize the estimated amount of that adjustment as part of cost of the combination and a liability at the acquisition date if the adjustment is probable and can be measured reliably. Otherwise, such adjustment is not recognized until it becomes probable and can be measured reliably in the subsequent period. Where future events do not occur or the estimate needs to be revised, the cost of the business combination initially recognized shall be adjusted accordingly. Future changes in estimates are treated as an adjustment to the cost of the combination with an adjustment to the recorded liability and goodwill.

Where goodwill forms part of a cash-generating unit, or group of cash-generating units, and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on disposal of the operation. Goodwill disposed of in this circumstance is measured based on the relative values of the operation disposed of and the portion of the cash-generating unit retained.

### ***Intangible Assets***

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired from business combinations is initially recognized at fair value as at the date of acquisition. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment loss. The useful lives of intangible assets are assessed at the individual asset level as having either a finite or indefinite useful life.

Intangible assets with finite lives are amortized over the useful economic life using the straight-line method of

accounting and assessed for impairment whenever there is an indication that the intangible assets may be impaired. At a minimum, the amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at each financial year-end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the unaudited consolidated statement of income.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level. Such intangible assets are not amortized. The useful life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the unaudited consolidated statement of income when the asset is derecognized.

Intangible assets created within the business are not capitalized and expenditures are charged against operations in the period in which the expenditures are incurred.

Research and development costs are expensed as incurred.

### ***Impairment of Non-Financial Assets***

We assess at each reporting period whether there is an indication that our property, plant and equipment, and intangible assets with finite lives may be impaired. If any such indication exists, or when the annual impairment testing for an asset is required, we make an estimate of the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's fair value less costs to sell or its value in use and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent from those of other assets or groups of assets. Where the carrying amount of an asset exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing the value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining the fair value less costs to sell, an appropriate valuation model is used.

Impairment losses of continuing operations are recognized in the unaudited consolidated statement of income.

For assets, excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognized impairment losses may no longer exist or may have decreased. If such indication exists, we make an estimate of recoverable amount. A previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If this is the case, the carrying amount of the asset is increased to its recoverable amount. The increase cannot exceed the carrying amount that would have been determined, net of depreciation and amortization, had no impairment loss been recognized for the asset in prior periods. Such reversal is recognized in the unaudited consolidated statement of income. After such reversal, the depreciation and amortization charges are adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining economic useful life.

The following criteria are also applied in assessing impairment of specific assets:

#### ***Goodwill***

Goodwill is reviewed for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. Impairment is determined for goodwill by assessing the recoverable amount of the cash-generating unit, or group of cash-generating units, to which the goodwill relates. Where the recoverable amount of the cash-generating unit, or group of cash-generating units, is less than the carrying amount of the cash-generating unit, or group of cash-generating units, to which goodwill has been allocated to, an impairment loss is recognized. Impairment losses relating to goodwill cannot be reversed in future periods.

### *Intangible assets*

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash-generating unit level, as appropriate. We calculate the amount of impairment as being the difference between the recoverable amount of the intangible asset and its carrying amount and recognize the amount of impairment in the unaudited consolidated statement of income.

### *Investments in associates*

After application of the equity method, we determine whether it is necessary to recognize an additional impairment loss on our investment in associates. We determine at each balance sheet date whether there is any objective evidence that our investment in an associate is impaired. If this is the case, we calculate the amount of impairment as being the difference between the recoverable amount of the investments in associates and its carrying amount and recognize the amount of impairment in the unaudited consolidated statement of income.

### *Cash and Cash Equivalents*

Cash includes cash on hand and in banks. Cash equivalents are short-term, highly liquid investments that are readily convertible to known amounts of cash with original maturities of three months or less from the date of acquisition and that are subject to an insignificant risk of change in value.

### *Short-term Investments*

Short-term investments are money market placements, which are highly liquid with maturities of more than three months but less than one year from date of acquisition.

### *Trade and Other Receivables*

Trade and other receivables, categorized as loans and receivables, are recognized initially at fair value and subsequently measured at amortized cost using the effective interest rate method, less provision for impairment. A provision for impairment of trade and other receivables is established when there is objective evidence that we will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganization, and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in the unaudited consolidated statement of income. When a trade receivable is uncollectible, it is written-off against the allowance account for trade and other receivables. Subsequent recoveries of amounts previously written-off are recognized as income in the unaudited consolidated statement of income.

### *Inventories and Supplies*

Inventories and supplies, which include cellular phone units, materials, spare parts, terminal units and accessories, are valued at the lower of cost and net realizable value.

Cost is determined using the weighted average method. Net realizable value is either the estimated selling price in the ordinary course of the business less the estimated cost to sell or asset replacement costs.

### *Convertible Preferred Stock*

#### *Philippine peso-denominated*

The component of our convertible preferred stock that exhibits characteristics of a liability is recognized as a liability in the unaudited consolidated balance sheet, net of transaction costs. The corresponding dividends on

those shares are charged as interest expense in the unaudited consolidated statement of income. On issuance of our convertible preferred stock, the fair value of the liability component is determined using a market rate for an equivalent non-convertible bond and this amount is carried as a long-term liability on the amortized cost basis until extinguished through conversion or redemption.

The remainder of the proceeds is allocated to the conversion option that is recognized and included in the equity section of the unaudited consolidated balance sheet, net of transaction costs. The carrying amount of the conversion option is not re-measured in subsequent periods.

Transaction costs are apportioned between the liability and equity components of the convertible preferred stock based on the allocation of proceeds to the liability and equity components when the instruments are first recognized.

#### *Foreign currency-denominated*

We treat the Series VI Convertible Preferred Stock as debt instruments with foreign currency-denominated embedded call options. The fair value of embedded call options as of issuance date was bifurcated and thereafter accounted for separately at fair value through profit or loss. The residual amount was assigned as a liability component and accreted to the redemption amount up to the call option date using the effective interest rate method.

#### ***Provisions***

We recognize provisions when we have present obligations, legal or constructive, as a result of past events, and when it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Where we expect some or all of a provision to be reimbursed, the reimbursement is recognized as a separate asset but only when the reimbursement is virtually certain. The expense relating to any provision is presented in the unaudited consolidated statement of income, net of any reimbursements. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, where appropriate, the risks specific to the liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as interest expense.

#### ***Retirement Benefits***

##### *Defined benefit pension plans*

We have funded retirement plans, administered by our respective Fund's Trustees, covering permanent employees. Retirement costs are actuarially determined using the projected unit credit of accrued benefit valuation method. This method reflects services rendered by employees to the date of valuation and incorporates assumptions concerning employees' projected salaries. Retirement costs include current service cost plus amortization of past service cost, experience adjustments and changes in actuarial assumptions. Past service cost is recognized as an expense on a straight-line basis over the average period until the benefits become vested. If the benefits vest immediately following the introduction of, or changes to, a pension plan, past service cost is recognized immediately. Actuarial gains and losses are recognized as income or expense when the net cumulative unrecognized actuarial gains and losses for each individual plan at the end of the previous reporting period exceeded 10% of the higher of the defined benefit obligation and the fair value of plan assets at that date. These gains and losses are recognized over the expected average remaining working lives of the employees participating in the plan.

The defined benefit asset or liability comprises the present value of the defined benefit obligation less past service cost not yet recognized and less the fair value of plan assets out of which the obligations are to be settled directly. The value of any asset is restricted to the sum of any past service cost not yet recognized and the present value of any economic benefits available in the form of refunds from the plan or reductions in the future contributions to the plan.

##### *Defined contribution plans*

Smart and I-Contacts record expenses for defined contribution plans for their contribution when the employee renders service to Smart and I-Contacts, respectively, essentially coinciding with their cash contributions to the plans.

### ***Share-Based Payment Transactions***

Certain of our employees (including advisors) receive remuneration in the form of share-based payment transactions, whereby employees render services in exchange for shares or rights over shares (“equity-settled transactions”).

#### *Equity-settled transactions*

The cost of equity-settled transactions with employees is measured by reference to the fair value of the stock options at the date at which they are granted. Fair value is determined using an option-pricing model, further details of which are set forth in *Note 23 – Share-based Payments and Employee Benefits*. In valuing equity-settled transactions, no account is taken of any performance conditions, other than conditions linked to the price of the shares of PLDT (“market conditions”).

The cost of equity-settled transactions is recognized, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled, ending on the date on which the relevant employees become fully entitled to the award (“vesting date”). The cumulative expense recognized for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the number of awards that will ultimately vest, in our opinion, at that date, based on the best available estimate.

No expense is recognized for awards that do not ultimately vest, except for awards where vesting is conditional upon a market condition, which are treated as vesting irrespective of whether or not the market condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled awards are modified and the modification increases the fair value of the equity instruments granted, as measured immediately before and after the modification, the entity shall include the incremental fair value granted in the measurement of the amount recognized for services received as consideration for the equity instruments granted. The incremental fair value granted is the difference between the fair value of the modified equity instrument and that of the original equity instrument, both estimated as at the date of the modification. If the modification occurs during the vesting period, the incremental fair value granted is included in the measurement of the amount recognized for services received over the period from the modification date until the date when the modified equity instruments vest, in addition to the amount based on the grant date fair value of the original equity instruments, which is recognized over the remainder of the original vesting period. If the modification occurs after vesting date, the incremental fair value granted is recognized immediately, or over the vesting period if the employee is required to complete an additional period of service before becoming unconditionally entitled to those modified equity instruments.

Where an equity-settled award is cancelled with payment, it is treated as if it had vested on the date of cancellation, and any expense not yet recognized for the award is recognized immediately. However, if a new award is substituted for the cancelled award, and designated as a replacement award on the date that it is granted, the cancelled and new awards are treated as if they were modifications of the original award, as described in the previous paragraph.

The dilutive effect of outstanding options is reflected as additional share dilution in the computation of earnings per share. See *Note 7 – Earnings Per Common Share*.

#### *Cash-settled transactions*

Our Long-Term Incentive Plan, or LTIP, grants share appreciation rights, or SARs, to our eligible key executives and advisors. Under the LTIP, we recognize the services we receive from our eligible key executives and advisors, and our liability to pay for those services, as the eligible key executives and advisors render services during the vesting period. We measure our liability, initially and at each reporting date until settled, at the fair value of the SARs, by applying an option valuation model, taking into account the terms and conditions on which the SARs

were granted, and the extent to which the eligible key executives and advisors have rendered service to date. We recognize any changes in fair value at each reporting date until settled, in the unaudited consolidated statement of income for the period.

### ***Leases***

The determination of whether an arrangement contains a lease is based on the substance of the arrangement at the inception date of whether the fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset.

A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership. All other leases are classified as operating leases.

A finance lease gives rise to a depreciation expense for the asset, as well as an interest expense for each period. Finance charges are charged directly to current operations. The depreciation policy for leased assets is consistent with that for depreciable assets that are owned.

Capitalized leased assets are depreciated over the shorter of the estimated useful life of the asset or the lease term, if there is no reasonable certainty that we will obtain ownership of the leased asset at the end of the lease term.

### ***Revenue Recognition***

Revenues for services are stated at amounts invoiced to customers, net of value-added tax, or VAT, or overseas communication tax, or OCT, where applicable. We provide wireless communication, fixed line communication, and ICT services. We provide such services to mobile, business, residential and payphone customers. Revenues represent the value of fixed consideration that have been received or are receivable. Revenues are recognized when there is evidence of an arrangement, collectibility is reasonably assured, and the delivery of the product or rendering of service has occurred. In certain circumstances, revenue is split into separately identifiable components and recognized when the related components are delivered in order to reflect the substance of the transactions. The value of components is determined using verifiable objective evidence. Under certain arrangements where the above criteria are met, but there is uncertainty regarding the outcome of the transaction for which service was rendered, revenue is recognized only to the extent of expenses incurred for rendering the service, and such amount is determined to be recoverable. We do not provide our customers with the right to a refund.

#### *Service Revenues*

##### *Subscriptions*

We provide telephone and data communication services under prepaid and postpaid payment arrangements. Installation and activation-related fees and the corresponding costs, not exceeding the activation revenue, are deferred and recognized over the expected average periods of customer relationship for fixed line and cellular services. Postpaid service arrangements include subscription fees, typically fixed monthly fees, which are recognized over the subscription period on a pro-rata basis.

##### *Air time, traffic and value-added services*

Prepaid service revenues collected in advance are deferred and recognized based on the earlier of actual usage or upon expiration of the usage period. Interconnection revenues for call termination, call transit, and network usage are recognized in the period the traffic occurs. Revenues related to local, long distance, network-to-network, roaming and international call connection services are recognized when the call is placed or connection is provided, net of amounts payable to other telecommunication carriers for terminating calls in their territories. Revenues related to products and value-added services are recognized upon delivery of the product or service.

##### *Knowledge processing solutions*

Revenue is recognized when it is probable that the economic benefits associated with the transactions will flow to

us and the amount of revenue can be measured reliably. Advance customer receipts that have not been recognized as revenue are recorded as advances from customers and presented as a liability in the unaudited consolidated balance sheet. If the fee is not fixed or determinable, revenue is not recognized on those arrangements until the customer payment is received. For arrangements requiring specific customer acceptance, revenue recognition is deferred until the earlier of the end of the deemed acceptance period or until a written notice of acceptance is received from the customer. Revenue on services rendered to customers whose ability to pay is in doubt at the time of performance of services is also not recorded. Rather, revenue is recognized from these customers as payment is received.

#### *Incentives*

We record insignificant commission expenses based on the number of new subscriber connections initiated by certain dealers. All other cash incentives provided to dealers and customers are recorded as a reduction of revenue. Product-based incentives provided to dealers and customers as part of a transaction are accounted for as multiple element arrangements and recognized when earned.

#### *Non-service Revenues*

##### *Handset and equipment sales*

Sales of cellular handsets and communication equipment are recognized upon delivery to the customer.

##### *Interest income*

Interest income is recognized as it accrues on a time proportion basis taking into account the principal amount outstanding and the effective interest rate. The majority of interest income represents interest earned from cash and cash equivalents, short-term investments and investments in debt securities.

#### ***Income Taxes***

##### *Current income tax*

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted as at the balance sheet date.

##### *Deferred income tax*

Deferred income tax is provided using the balance sheet liability method on all temporary differences at the balance sheet date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred income tax liabilities are recognized for all taxable temporary differences except: (1) when the deferred income tax liability arises from the initial recognition of goodwill or of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and (2) with respect to taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, where the timing of the reversal of the temporary differences can be controlled and it is possible that the temporary differences will not reverse in the foreseeable future. Deferred income tax assets are recognized for all deductible temporary differences, carryforward benefit of unused tax credits from excess minimum corporate income tax, or MCIT, and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and carryforward benefit of unused tax credits and unused tax losses can be utilized except: (1) when the deferred tax asset relating to the deductible temporary difference arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and (2) with respect to deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary

differences can be utilized.

Deferred income tax liabilities are not provided on non-taxable temporary differences associated with investments in domestic subsidiaries and associates. With respect to investments in other subsidiaries and associates, deferred income tax liabilities are recognized except when the timing of the reversal of the temporary difference can be controlled and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred income tax assets are reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized. Unrecognized deferred income tax assets are reassessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred income tax asset to be recovered.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted as at the balance sheet date.

Deferred income tax relating to items recognized directly in equity is included in the related equity account and not in the unaudited consolidated statement of income.

Deferred income tax assets and liabilities are offset, if a legally enforceable right exists to offset deferred income tax assets against deferred income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

### ***Investments and Other Financial Assets and Liabilities***

Financial assets are categorized as financial assets at fair value through profit or loss, loans and receivables, held-to-maturity investments, or available-for-sale financial investments, as appropriate. When financial assets are recognized initially, they are measured at fair value, plus, in the case of investments not at fair value through profit or loss, directly attributable transaction costs. We determine the category of its financial assets on initial recognition and, where allowed and appropriate, re-evaluate this designation at each financial year-end.

All regular way purchases and sales of financial assets are recognized on the trade date, which is the date that we commit to purchase the asset. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace.

#### *Day 1 profit*

Where the transaction price in a non-active market is different to the fair value from other observable current market transactions in the same instrument or based on a valuation technique whose variables include only data from observable market, we recognize the difference between the transaction price and fair value (a Day 1 profit) in the unaudited consolidated statement of income unless it qualifies for recognition as some other type of asset. In cases where use is made of data which are not observable, the difference between the transaction price and model value is only recognized in the unaudited consolidated statement of income when the inputs become observable or when the instrument is derecognized. For each transaction, we determine the appropriate method of recognizing the “Day 1” profit amount.

#### *Fair value*

The fair value of investments that are actively traded in organized financial markets is determined by reference to quoted market bid prices at the close of business on the balance sheet date. For investments where there is no active market, fair value is determined using valuation techniques. Such techniques include using recent arm’s-length market transactions; reference to the current market value of another instrument which is substantially the same; discounted cash flow analysis or other valuation models.

### *Financial assets at fair value through profit or loss*

Financial assets at fair value through profit or loss include financial assets held-for-trading and financial assets designated upon initial recognition as at fair value through profit or loss. Financial assets are classified as held-for-trading if they are acquired for the purpose of selling in the near term. Derivatives, including separated embedded derivatives, are also classified as held-for-trading unless they are designated as effective hedging instruments. Gains or losses on investments held-for-trading are recognized in profit or loss.

Financial assets may be designated at initial recognition as at fair value through profit or loss if any of the following criteria are met: (i) the designation eliminates or significantly reduces the inconsistent treatment that would otherwise arise from measuring the assets and liabilities or recognizing gains or losses on them on a different basis; or (ii) the assets and liabilities are part of a group of financial assets which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management strategy; or (iii) the financial assets and liabilities contain an embedded derivative that would need to be separately recorded. An embedded derivative is separated from the hybrid or combined contract if all the following conditions are met: (a) the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host contract; (b) a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative and (c) the hybrid instrument is not recognized at fair value through profit or loss.

Subsequent reassessment is prohibited unless there is a change in the terms of the contract that significantly modifies the cash flows that otherwise would be required under the contract, in which case reassessment is required. We determine whether a modification to cash flows is significant by considering the extent to which the expected future cash flows associated with the embedded derivative, the host contract or both have changed and whether the change is significant relative to the previously expected cash flow on the contract.

### *Loans and receivables*

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, loans and receivables are carried at amortized cost using the effective interest method less any allowance for impairment. Gains and losses are recognized in profit or loss when the loans and receivables are derecognized or impaired, as well as through the amortization process. Assets in this category are included in current assets, except for maturities greater than 12 months after the balance sheet date, which are classified as non-current assets.

### *Held-to-maturity investments*

Non-derivative financial assets with fixed or determinable payments and fixed maturities are classified as held-to-maturity when we have the positive intention and ability to hold to maturity. After initial measurement, held-to-maturity investments are measured at amortized cost using the effective interest rate method. Gains and losses are recognized in profit or loss when the investments are derecognized or impaired, as well as through the amortization process. Assets in this category are included under current assets, except for maturities greater than 12 months after the balance sheet date, which are classified as non-current assets.

### *Available-for-sale financial investments*

Available-for-sale financial investments are those non-derivative financial assets that are designated as available-for-sale or are not classified in any of the three preceding categories. They are purchased and held indefinitely, and may be sold in response to liquidity requirements or changes in market conditions. After initial measurement, available-for-sale financial investments are measured at fair value with unrealized gains or losses recognized directly in equity until the investment is derecognized or determined to be impaired at which time the cumulative gain or loss previously recorded in equity is recognized in profit or loss. They are included under non-current assets unless we intend to dispose of the investment within 12 months of the balance sheet date.

## *Impairment of Financial Assets*

We assess at each balance sheet date whether a financial asset or group of financial assets is impaired.

### *Financial assets carried at amortized cost*

For loans and receivables carried at amortized cost, we assess whether objective evidence of impairment exists individually for financial assets that are individually significant, or collectively for financial assets that are not individually significant. If we determine that no objective evidence of impairment exists for individually assessed financial asset, whether significant or not, we include the asset in a group of financial assets with similar credit risk characteristics and collectively assesses for impairment. Those characteristics are relevant to the estimation of future cash flows for groups of such assets by being indicative of the debtors' ability to pay all amounts due according to the contractual terms of the assets being evaluated. Assets that are individually assessed for impairment and for which an impairment loss is, or continues to be recognized, are not included in a collective assessment for impairment.

If there is objective evidence that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows (excluding future credit losses that have not been incurred). The present value of the estimated future cash flows is discounted at the financial asset's original effective interest rate. If a loan receivable has a variable interest rate, the discount rate for measuring any impairment loss is the current effective interest rate, adjusted for the original credit risk premium. The calculation of the present value of the estimated future cash flows of a collateralized financial asset reflects the cash flows that may result from foreclosure less costs for obtaining and selling the collateral, whether or not foreclosure is probable.

The carrying amount of the asset is reduced through the use of an allowance account and the amount of loss is charged to the unaudited consolidated statement of income. Interest income continues to be recognized based on the original effective interest rate of the asset. Loans and receivables, together with the associated allowance accounts, are written-off when there is no realistic prospect of future recovery and all collateral has been realized. If, in a subsequent period, the amount of the estimated impairment loss decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is reduced by adjusting the allowance account. If a future write-off is later recovered, any amount formerly charged is credited to the income account.

For the purpose of a collective evaluation of impairment, financial assets are grouped on the basis of such credit risk characteristics as industry, past-due or collectibility status and term.

Future cash flows in a group of financial assets that are collectively evaluated for impairment are estimated on the basis of historical loss experience for assets with similar credit risk characteristics. Historical loss experience is adjusted on the basis of current observable data to reflect the effects of current conditions that did not affect the period at which the historical loss experience is based and to remove the effects of conditions in the historical period that do not currently exist. Estimates of changes in future cash flows reflect, and are directionally consistent with changes in related observable data from period to period (such changes in unemployment rates, property prices, commodity prices, payment status, or other factors that are indicative of incurred losses and their magnitude). The methodology and assumptions used for estimating future cash flows are reviewed regularly by management to reduce any differences between loss estimates and actual loss experience.

### *Available-for-sale financial investments*

In case of equity investments classified as available-for-sale financial investments, an objective evidence of impairment would include a significant or prolonged decline in the fair value of the investments below its cost.

Where there is evidence of impairment, the cumulative loss, measured as the difference between the acquisition cost and the current fair value, less any impairment loss on that financial asset previously recognized in the unaudited consolidated statement of income, is removed from equity and recognized in the unaudited consolidated statement of income. Impairment losses on equity investments are not reversed through the unaudited consolidated statement of income. Increases in fair value after impairment are recognized directly in equity.

In the case of debt instruments classified as available-for-sale, impairment is assessed based on the same criteria as financial assets carried at amortized cost. Interest continues to be accrued at the original effective interest rate on the reduced carrying amount of the asset and is recorded as part of “Interest income” account in the unaudited consolidated statement of income. If, in subsequent period, the fair value of a debt instrument increased and the increase can be objectively related to an event occurring after the impairment loss was recognized in the unaudited consolidated statement of income, the impairment loss is reversed through the unaudited consolidated statement of income.

### ***Financial liabilities***

#### *Interest-bearing loans and borrowings*

All loans and borrowings are initially recognized at fair value less directly attributable transaction costs. After initial recognition, interest-bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate method.

Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the amortization process.

#### *Financial liabilities at fair value through profit or loss*

Financial liabilities at fair value through profit or loss include financial liabilities held-for-trading and financial liabilities designated upon initial recognition as at fair value through profit or loss.

Financial liabilities are classified as held-for-trading if they are acquired for the purpose of selling in the near term. Derivatives, including separated embedded derivatives are also classified as held-for-trading unless they are designated as effective hedging instruments.

Gains or losses on liabilities held-for-trading and those designated at fair value through profit or loss are recognized in profit or loss.

### ***Derecognition of Financial Assets and Liabilities***

#### *Financial assets*

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognized when: (1) the rights to receive cash flows from the asset have expired; (2) we retain the right to receive cash flows from the asset, but have assumed an obligation to pay them in full without material delay to a third party under a “pass through” arrangement; or (3) we have transferred our right to receive cash flows from the asset and either (a) have transferred substantially all the risks and rewards of the asset, or (b) have neither transferred nor retained substantially all the risks and rewards of the asset, but have transferred control of the asset.

Where we have transferred our right to receive cash flows from an asset and have neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognized to the extent of our continuing involvement in the asset. Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that we could be required to repay.

Where continuing involvement takes the form of a written and/or purchased option (including a cash-settled option or similar provision) on the transferred asset, the extent of our continuing involvement is the amount of the transferred asset that we may repurchase, except that in the case of a written put option (including a cash-settled option or similar provision) on an asset measured at fair value, the extent of our continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

### *Financial liabilities*

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or has expired.

Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the unaudited consolidated statement of income.

### *Offsetting financial instruments*

Financial assets and financial liabilities are offset and the net amount reported in the unaudited consolidated balance sheet if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously. This is not generally the case with master netting agreements, and the related assets and liabilities are presented gross in the unaudited consolidated balance sheet.

### ***Derivative Financial Instruments and Hedging***

We use derivative financial instruments, such as long-term currency swaps, foreign currency options, forward currency contracts and interest rate swaps, to hedge our risks associated with interest rate and foreign currency fluctuations. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

Any gains or losses arising from changes in fair value on derivatives during the period that do not qualify for hedge accounting are taken directly to the losses or gains on derivative financial instruments account in the unaudited consolidated statement of income.

The fair value of forward currency contracts is calculated by reference to current forward exchange rates for contracts with similar maturity profiles. The fair value of long-term currency swaps, foreign currency options and interest rate swap contracts is determined using applicable valuation techniques. See *Note 26 – Financial Assets and Liabilities*.

For the purpose of hedge accounting, hedges are classified as: (1) fair value hedges when hedging the exposure to changes in the fair value of a recognized financial asset or liability or an unrecognized firm commitment (except for foreign-currency risk); (2) cash flow hedges when hedging exposure to variability in cash flows that is either attributable to a particular risk associated with a recognized financial asset or liability or a highly probable forecast transaction or the foreign-currency risk in an unrecognized firm commitment; or (3) hedges of a net investment in a foreign operation.

At the inception of a hedge relationship, we formally designate and document the hedge relationship to which we wish to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how we will assess the hedging instrument's effectiveness in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an on-going basis to determine that they actually have been highly effective throughout the financial reporting periods for which they are designated. For situation when that hedged item is a forecast transaction, we assess whether transaction is highly probable and prevent an exposure to variations in cash flows that could ultimately affect the unaudited consolidated statement of income.

Hedges which meet the strict criteria for hedge accounting are accounted for as follows:

### *Fair value hedges*

The change in the fair value of a hedging derivative is recognized in the unaudited consolidated statement of income. The change in the fair value of the hedged item attributable to the risk being hedged is recorded as part of the carrying value of the hedged item and is also recognized in the unaudited consolidated statement of income.

The fair value for financial instruments traded in active markets at the balance sheet date is based on their quoted market price or dealer price quotations (bid price for long positions and ask price for short positions), without any deduction for transaction costs. When current bid and asking prices are not available, the price of the most recent transaction provides evidence of the current fair value as long as there has not been a significant change in economic circumstances since the time of the transaction. For all other financial instruments not listed in an active market, the fair value is determined by using an appropriate valuation techniques. Valuation techniques include net present value techniques, comparison to similar instruments for which market observable prices exist, options pricing models, and other relevant valuation models.

When an unrecognized firm commitment is designated as a hedged item, the subsequent cumulative change in the fair value of the firm commitment attributable to the hedged risk is recognized as financial asset or liability with a corresponding gain or loss recognized in the unaudited consolidated statement of income. The changes in the fair value of the hedging instrument are also recognized in the unaudited consolidated statement of income.

#### *Cash flow hedges*

The effective portion of the gain or loss on the hedging instrument is recognized directly in equity, while any ineffective portion is recognized immediately in the unaudited consolidated statement of income.

Amounts taken to equity are transferred to the unaudited consolidated statement of income when the hedged transaction affects the unaudited consolidated statement of income, such as when the hedged financial income or financial expense is recognized or when a forecast sale occurs. Where the hedged item is the cost of a non-financial asset or non-financial liability, the amounts taken to equity are transferred to the initial carrying amount of the non-financial asset or liability.

If the forecast transaction or firm commitment is no longer expected to occur, amounts previously recognized in equity are transferred to the unaudited consolidated statement of income. If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover, or if its designation as a hedge is revoked, amounts previously recognized in equity remain in equity until the forecast transaction or firm commitment occurs.

#### *Hedges of a net investment*

Hedges of a net investment in a foreign operation, including a hedge of a monetary item that is accounted for as part of the net investment, are accounted for in a way similar to cash flow hedges. Gains or losses on the hedging instrument relating to the effective portion of the hedge are recognized directly in equity while any gains or losses relating to the ineffective portion are recognized in the unaudited consolidated statement of income. On disposal of the foreign operation, the cumulative value of any such gains or losses recognized directly in equity is transferred to the unaudited consolidated statement of income.

### **New Accounting Standards Subsequent to March 31, 2008**

Set forth below are the new PFRS accounting standards and Philippine Interpretations that will become effective subsequent to March 31, 2008:

- ***PFRS 8, “Operating Segments”***. This standard will become effective for financial years beginning on or after January 1, 2009 and will replace PAS 14. This standard requires an entity to report financial and descriptive information about our reportable segments. The requirements of this standard will be included in our unaudited consolidated financial statements for the fiscal year ending December 31, 2009.
- ***PAS 23, “Borrowing Costs” – Revised***. This standard will become effective for financial years beginning on or after January 1, 2009. The revised standard eliminates the option of expensing all borrowing costs and requires borrowing costs to be capitalized if they are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of those assets.

- PAS 1 (Revised), “Presentation of Financial Statements”.** This standard will become effective for financial years beginning on or after January 1, 2009. PAS 1 has been revised to enhance the usefulness of information presented in the unaudited consolidated financial statements. The key changes are: (1) the statement of changes in equity includes only transactions with owners and all non-owner changes are presented in equity as a single line with details included in a separate statement. Owners are defined as “holders of instruments classified as equity”; (2) the introduction of a new statement of comprehensive income that combines all items of income and expense recognized in profit or loss together with “other comprehensive income”. The revisions specify what is included in other comprehensive income, such as gains and losses on available-for-sale financial investments, actuarial gains and losses on defined benefit pension plans and changes in the asset revaluation reserve. Entities can choose to present all items in one statement, or to present two linked statements, a separate unaudited consolidated statement of income and a statement of comprehensive income; (3) amounts reclassified to profit or loss that were previously recognized in other comprehensive income (for example, previously unrealized gains on available-for-sale financial investments that are sold) must be separately disclosed, either in the statement of comprehensive income itself or in the notes; (4) entities must disclose the income tax relating to each component of other comprehensive income. This can be presented in the statement of comprehensive income itself or in the notes; (5) when an entity restates its financial statements or retrospectively applies a new accounting policy, a statement of financial position must be presented as at the beginning of the earliest comparative period; (6) dividends to equity holders can now be shown only in the statement of changes in equity or in the notes; and (7) the introduction of new terminology, replacing “balance sheet” with “statement of financial position” and “cash flow statement” with “statement of cash flows”, although the titles are not obligatory. The requirements of this standard will be included in our unaudited consolidated financial statements for the fiscal year ending December 31, 2009.
- Philippine Interpretation IFRIC 13, “Customer Loyalty Programmes”.** This interpretation will become effective for financial years beginning on or after July 1, 2008. This Interpretation requires that loyalty award credits granted to customers as part of a sales transaction are accounted for as a separate component of the sales transactions. The consideration received in the sales transactions is allocated between the loyalty award credits and the other components of the sale. The amount allocated to the loyalty award credits is determined by reference to their fair value and is deferred until the awards are redeemed or the liability is otherwise extinguished. If the cost of fulfilling the awards is expected to exceed the consideration received, the entity will have an onerous contract and a liability for the excess must be recognized.

We expect that the adoption of the pronouncements listed above will have no significant impact on our unaudited consolidated financial statements in the period of our initial application, except that management is still evaluating the impact of Philippine Interpretations IFRIC 13 and PFRS 8.

---

### 3. Management’s Use of Judgments, Estimates and Assumptions

The preparation of our unaudited consolidated financial statements in conformity with PFRS requires us to make judgments, estimates and assumptions that affect the reported amounts of our revenues, expenses, assets and liabilities and disclosure of contingent liabilities at the reporting date. The uncertainties inherent in these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the assets or liabilities affected in the future.

#### *Judgments*

In the process of applying the PLDT Group’s accounting policies, management has made the following judgments, apart from those including estimations and assumptions, which have the most significant effect on the amount recognized in the unaudited consolidated financial statements.

#### *Determination of functional currency*

The functional currencies of the entities under PLDT Group are the currency of the primary economic environment in which each entity operates. It is the currency that mainly influences the revenue and cost of rendering services.

Based on the economic substance of the underlying circumstances relevant to the PLDT Group, the functional and presentation currency of the PLDT Group (except for SCH, SGP, 3rd Brand, Mabuhay Satellite, PLDT Global, Digital Paradise Thailand and SPi and certain of its subsidiaries) is the Philippine peso. The functional and presentation currency of Mabuhay Satellite, PLDT Global, SPi and certain of its subsidiaries is the U.S. dollar; Thai baht for Digital Paradise Thailand and Singapore dollar for SCH, SGP and 3rd Brand.

#### *Leases*

We have various lease agreements as a lessee in respect of our certain equipment and properties. We evaluate whether significant risks and rewards of ownership of the leased properties are transferred to us or retained at the lessor based on *PAS 17, "Leases"*, which requires us to make judgments and estimates of transfer of risk and rewards of ownership of the leased properties. Total lease expense arising from operating leases amounted to Php879 million and Php690 million for the three months ended March 31, 2008 and 2007, respectively. Total finance lease obligations as at March 31, 2008 and December 31, 2007 amounted to Php204 million and Php496 million, respectively. See *Note 18 – Interest-bearing Financial Liabilities*, *Note 24 – Contractual Obligations and Commercial Commitments* and *Note 26 – Financial Assets and Liabilities*.

#### *Determination of fair values of financial assets and liabilities*

We carry certain of our financial assets and liabilities at fair value, which requires extensive use of accounting estimates and judgments for the fair values of financial assets and liabilities. In addition, certain liabilities acquired through debt exchange and restructuring are required to be carried at fair value at the time of the debt exchange and restructuring. See *Note 26 – Financial Assets and Liabilities*. While significant components of fair value measurement were determined using verifiable objective evidence (i.e., foreign exchange rates, interest rates and volatility rates), the amount of changes in fair value would differ if we utilized a different valuation methodology. Any change in fair value of these financial assets and liabilities would directly affect our unaudited consolidated statement of income and consolidated statement of changes in equity.

Total fair values of financial assets and liabilities as at March 31, 2008 amounted to Php64,426 million and Php132,302 million, respectively, while the total fair values of financial assets and liabilities as at December 31, 2007 amounted to Php46,661 million and Php111,086 million, respectively. See *Note 26 – Financial Assets and Liabilities*.

#### *Legal contingencies*

We are currently involved in various legal proceedings. Our estimate of the probable costs for the resolution of these claims has been developed in consultation with outside counsel handling our defense in these matters and is based upon an analysis of potential results. We currently do not believe these proceedings will have a material adverse effect on our unaudited consolidated financial statements. It is possible, however, that future results of operations could be materially affected by changes in our estimates or in the effectiveness of our strategies relating to these proceedings. See *Note 25 – Provisions and Contingencies*.

#### *Estimates and Assumptions*

The key estimates and assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period are discussed below:

##### *Estimating useful lives of property, plant and equipment*

We estimate the useful lives of our property, plant and equipment based on the periods over which our assets are expected to be available for use. Our estimation of the useful lives of our property, plant and equipment is based on our collective assessment of industry practice, internal technical evaluation and experience with similar assets. The estimated useful lives of our property, plant and equipment are reviewed at least at each financial year-end and are updated if expectations differ from previous estimates due to physical wear and tear, technical or commercial

obsolescence and legal or other limitations on the use of our assets. It is possible, however, that future results of operations could be materially affected by changes in our estimates brought about by changes in the factors mentioned above. The amounts and timing of recorded expenses for any period would be affected by changes in these factors and circumstances. A reduction in the estimated useful lives of our property, plant and equipment would increase our recorded operating expenses and decrease our noncurrent assets.

Total carrying values of property, plant and equipment, net of accumulated depreciation and amortization amounted to Php156,112 million and Php159,414 million as at March 31, 2008 and December 31, 2007, respectively. See *Note 8 – Property, Plant and Equipment* and *Note 26 – Financial Assets and Liabilities*.

#### *Investment properties*

We have adopted the fair value approach in determining the carrying value of our investment properties. We opted to rely on independent appraisers in determining the fair values of our investment properties, and such fair values were determined based on recent prices of similar properties, with adjustments to reflect any changes in economic conditions since the date of those transactions. The amounts and timing of recorded changes in fair value for any period would differ if we made different judgments and estimates or utilized a different basis for determining fair value.

Total carrying values of our investment properties as at March 31, 2008 and December 31, 2007 amounted to Php577 million. See *Note 10 – Investment Properties* and *Note 26 – Financial Assets and Liabilities*.

#### *Goodwill and intangible assets*

Our unaudited consolidated financial statements and results of operations reflect acquired businesses after the completion of the respective acquisition. We account for the acquired businesses using the purchase method of accounting which requires extensive use of accounting estimates and judgments to allocate the purchase price to the fair market values of the acquiree's identifiable assets and liabilities at the acquisition date. Any excess in the purchase price over the estimated fair market values of the net assets acquired is recorded as goodwill in the unaudited consolidated balance sheet. Our business acquisitions have resulted in goodwill and intangible assets, which are subject to annual impairment test and amortization, respectively. See *Note 11 – Goodwill and Intangible Assets*. Thus, the numerous judgments made in estimating the fair market value to be assigned to the acquiree's assets and liabilities can materially affect our results of operations.

Total carrying values of goodwill and intangible assets as at March 31, 2008 and December 31, 2007 amounted to Php11,730 million and Php11,721 million, respectively. See *Note 11 – Goodwill and Intangible Assets* and *Note 26 – Financial Assets and Liabilities*.

#### *Realizability of deferred income tax assets*

We review the carrying amounts of deferred income tax assets at each balance sheet date and reduce these to the extent that it is no longer probable that sufficient taxable income will be available to allow all or part of the deferred income tax assets to be utilized. Our assessment on the recognition of deferred income tax assets on deductible temporary differences is based on the level and timing of forecasted taxable income of the subsequent reporting periods. This forecast is based on our past results and future expectations on revenues and expenses as well as future tax planning strategies. However, there is no assurance that we will generate sufficient taxable income to allow all or part of our deferred income tax assets to be utilized.

Based on the above assessment, we have not recognized certain of our deferred income tax assets as at March 31, 2008 and December 31, 2007 amounting to Php1,309 million and Php1,122 million, respectively. Total net deferred income tax assets as at March 31, 2008 and December 31, 2007 amounted to Php11,483 million and Php13,757 million, respectively, while total net deferred income tax liabilities as at March 31, 2008 and December 31, 2007 amounted to Php2,086 million and Php2,155 million, respectively. See *Note 6 – Income Tax*.

### *Estimating allowance for doubtful accounts*

We estimate the allowance for doubtful accounts related to our trade receivables that are specifically identified as doubtful of collection. The level of allowance is evaluated by management on the basis of factors that affect the collectibility of the accounts. In these cases, we use judgment based on the best available facts and circumstances, including but not limited to, the length of our relationship with the customer and the customer's credit status based on third party credit reports and known market factors, to record specific reserves for customers against amounts due in order to reduce our receivables to amounts that we expect to collect. These specific reserves are re-evaluated and adjusted as additional information received affect the amounts estimated.

In addition to specific allowance against individually significant receivables, we also assess a collective impairment allowance against credit exposures of our customer which were grouped based on common credit characteristic, which, although not specifically identified as requiring a specific allowance, have a greater risk of default than when the receivables were originally granted to customers. This collective allowance is based on historical loss experience using various factors such as historical performance of the customers within the collective group, deterioration in the markets in which the customers operate, and identified structural weaknesses or deterioration in the cash flows of customers.

Impairment provision for receivable recognized in our unaudited consolidated statements of income amounted to Php291 million and Php163 million for the three months ended March 31, 2008 and 2007, respectively. Trade and other receivables, net of impairment, amounted to Php11,903 million and Php12,645 million as at March 31, 2008 and December 31, 2007, respectively. See *Note 5 – Income and Expenses*, *Note 14 – Trade and Other Receivables* and *Note 26 – Financial Assets and Liabilities*.

### *Estimation of pension cost and other retirement benefits*

The determination of our obligation and cost for pension and other retirement benefits is dependent on our selection of certain assumptions used by actuaries in calculating such amounts. Those assumptions are described in *Note 23 – Share-based Payments and Employee Benefits* and include, among other things, discount rates, expected returns on plan assets and rates of compensation increases. Actual results that differ from our assumptions are recognized as income or expense when the net cumulative unrecognized actuarial gains and losses at the end of the previous reporting period exceed 10% of the higher of the defined benefit obligation and the fair value of plan assets at that date. While we believe that our assumptions are reasonable and appropriate, significant differences in our actual experience or significant changes in our assumptions may materially affect our pension and other retirement obligations.

Total pension benefit costs amounted to Php175 million and Php398 million for the three months ended March 31, 2008 and 2007, respectively. Unrecognized net actuarial gain as at March 31, 2008 and December 31, 2007 amounted to Php1,339 million and Php1,344 million, respectively. The accrued benefit costs as at March 31, 2008 and December 31, 2007 amounted to Php3,021 million and Php2,985 million, respectively. See *Note 23 – Share-based Payments and Employee Benefits*.

### *Share-based payment transactions*

Our LTIP grants SARs to our eligible key executives and advisors. Under the LTIP, we recognize the services we receive from the eligible key executives and advisors, and our liability to pay for those services, as the eligible key executives and advisors render services during the vesting period. We measure our liability, initially and at each reporting date until settled, at the fair value of the SARs, by applying an option valuation model, taking into account the terms and conditions on which the SARs were granted, and the extent to which the eligible key executives and advisors have rendered service to date. We recognize any changes in fair value at each reporting date until settled, in the results of operations for the period. The estimates and assumptions are described in *Note 23 – Share-based Payments and Employee Benefits* and include, among other things, annual stock volatility, risk-free interest rate, dividends yield, the remaining life of options, and the fair value of common stock. While management believes that the estimates and assumptions used are reasonable and appropriate, significant differences in our actual experience or significant changes in the estimates and assumptions may materially affect the stock compensation costs charged to operations. The fair value of the LTIP recognized as an income for the

three months ended March 31, 2008 amounted to Php77 million and the fair value of the LTIP recognized as an expense for the three months ended March 31, 2007 amounted to Php260 million. As at March 31, 2008 and December 31, 2007, outstanding LTIP liability amounted to Php1,417 million and Php1,494 million, respectively. See *Note 5 – Income and Expenses* and *Note 23 – Share-based Payments and Employee Benefits*.

#### *Asset retirement obligations*

Asset retirement obligations are recognized in the period in which they are incurred if a reasonable estimate of fair value can be made. This requires an estimation of the cost to restore/dismantle on a per square meter basis, depending on the location, and is based on the best estimate of the expenditure required to settle the obligation at the future restoration/dismantlement date, discounted at the balance sheet date using a pre-tax rate that reflects the current market assessment of the time value of money and, where appropriate, the risk specific to the liability. Total provision for asset retirement obligations amounted to Php990 million and Php952 million as at March 31, 2008 and December 31, 2007, respectively. See *Note 8 – Property, Plant and Equipment* and *Note 19 – Deferred Credits and Other Noncurrent Liabilities*.

#### *Asset impairment*

PFRS requires that an impairment review be performed when certain impairment indicators are present. In the case of goodwill, at a minimum, such asset is subject to an annual impairment test and more frequently whenever there is an indication that such asset may be impaired. This requires an estimation of the value in use of the cash-generating units to which the goodwill is allocated. Estimating the value in use requires us to make an estimate of the expected future cash flows from the cash-generating unit and to choose a suitable discount rate in order to calculate the present value of those cash flows.

Determining the fair values of property, plant and equipment, investments and intangible assets, which requires the determination of future cash flows expected to be generated from the continued use and ultimate disposition of such assets, requires us to make estimates and assumptions that can materially affect our unaudited consolidated financial statements. Future events could cause us to conclude that property, plant and equipment, investments and intangible assets associated with an acquired business are impaired. Any resulting impairment loss could have a material adverse impact on our financial condition and results of operations.

The preparation of estimated future cash flows involves significant estimations and assumptions. While we believe that our assumptions are appropriate and reasonable, significant changes in our assumptions may materially affect our assessment of recoverable values and may lead to future additional impairment charges under PFRS. Total impairment charges for the three months ended March 31, 2008 and 2007 amounted to Php302 million and Php226 million, respectively. See *Note 4 – Segment Information* and *Note 5 – Income and Expenses*.

The carrying values of our property, plant and equipment, investments in associates, goodwill and intangible assets, trade and other receivables and inventories and supplies are separately disclosed in *Notes 8, 9, 11, 14 and 15*, respectively.

#### *Revenue recognition*

Our revenue recognition policies require us to make use of estimates and assumptions that may affect the reported amounts of our revenues and receivables.

Our agreements with domestic and foreign carriers for inbound and outbound traffic subject to settlements require traffic reconciliations before actual settlement is done, which may not be the actual volume of traffic as measured by us. Initial recognition of revenues is based on our observed traffic adjusted by our normal experience adjustments, which historically are not material to our unaudited consolidated financial statements. Differences between the amounts initially recognized and the actual settlements are taken up in the accounts upon reconciliation. However, there is no assurance that such use of estimates will not result in material adjustments in future periods.

Revenues under a multiple element arrangement specifically applicable to our wireless business are split into separately identifiable components and recognized when the related components are delivered in order to reflect

the substance of the transaction. The fair value of components is determined using verifiable objective evidence.

Under certain arrangements with our knowledge processing solutions services, if there is uncertainty regarding the outcome of the transaction for which service was rendered, revenue is recognized only to the extent of expenses incurred for rendering the service and such amount is determined to be recoverable.

We recognize our revenues from installation and activation related fees and the corresponding costs over the expected average periods of customer relationship for fixed line and cellular services. We estimate the expected average period of customer relationship based on our most recent churn-rate analysis.

#### 4. Segment Information

Operating segments are components of the PLDT Group that engage in business activities from which they may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of PLDT), whose operating results are regularly reviewed by the enterprise's chief operating decision-maker to make decisions about how resources are to be allocated to the segment and assess their performances, and for which discrete financial information are available. The accounting policies of the reportable segments are the same as those described in *Note 2 – Summary of Significant Accounting Policies and Practices*.

We have organized our business into three main segments:

- Wireless – wireless telecommunications services provided through our cellular service providers namely, Smart and Piltel, SBI, our wireless broadband provider, Wolfpac, our wireless content operator, and Mabuhay Satellite and ACeS Philippines, our wireless broadband satellite and other service operators;
- Fixed Line – fixed line telecommunications services primarily provided through PLDT. We also provide fixed line services through PLDT's subsidiaries ClarkTel, SubicTel, Maratel, Piltel, BCC, PLDT Global and SNMI, which together account for approximately 3% of our consolidated fixed line subscribers; and
- ICT – information and communications infrastructure and services for internet applications, internet protocol-based solutions and multimedia content delivery provided by ePLDT; customer interaction services (formerly referred to as call center business) provided under the umbrella brand name *ePLDT Ventus*, including Ventus, Parlance and Vocativ; knowledge processing solutions services (formerly referred to as business process outsourcing) provided through the SPi Group (consolidated since July 11, 2006); and internet access and online gaming services provided by ePLDT's subsidiaries Infocom, Digital Paradise, Digital Paradise Thailand, netGames, Airborne Access and Level Up!.

Transfer prices between business segments are set on terms similar to transactions with third parties. Segment revenue, segment expense and segment result include transfers between business segments. These transfers are eliminated upon consolidation.

Most of our revenues are derived from our operations within the Philippines.

The segment assets and liabilities as at March 31, 2008 and December 31, 2007 and results of operations and cash flows of our reportable business segments for the three months ended March 31, 2008 and 2007 are as follows:

## 5. Income and Expenses

### *Non-service Revenues*

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>
	(Unaudited)	
	(in million pesos)	
Sale of computers, cellular handsets and cellular SIM-packs	<b>443</b>	591
Point-product sales	<b>39</b>	22
	<b>482</b>	613

### *Compensation and Employee Benefits*

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>
	(Unaudited)	
	(in million pesos)	
Salaries and other employee benefits	<b>4,433</b>	4,111
Pension (Notes 3 and 23)	<b>175</b>	398
Manpower rightsizing program	<b>8</b>	12
Incentive plans (Notes 3 and 23)	<b>(77)</b>	260
	<b>4,539</b>	4,781

### *Financing Costs – net*

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>
	(Unaudited)	
	(in million pesos)	
Interest on loans and related items (Notes 18 and 26)	<b>1,279</b>	1,858
Accretion on financial liabilities – net (Notes 2, 18 and 26)	<b>265</b>	269
Financing charges (Note 26)	<b>27</b>	35
Dividends on preferred stock subject to mandatory redemption (Notes 7 and 18)	<b>2</b>	5
Capitalized interest (Notes 2 and 8)	<b>(184)</b>	(114)
	<b>1,389</b>	2,053

Interest expense for short-term borrowings for the three months ended March 31, 2008 and 2007 amounted to Php10 million and Php8 million, respectively.

### *Professional and Other Contracted Services*

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	2007
	(Unaudited)	
	(in million pesos)	
Technical and consultancy fees (Note 22)	<b>654</b>	716
Contracted services	<b>325</b>	479
Legal and audit fees	<b>57</b>	45
Other services	<b>52</b>	39
	<b>1,088</b>	1,279

#### *Cost of Sales*

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	2007
	(Unaudited)	
	(in million pesos)	
Cost of computers, cellular handsets and cellular SIM-packs sold	<b>817</b>	1,152
Cost of satellite air time and terminal units (Notes 22 and 24)	<b>36</b>	44
Cost of point-product sales	<b>29</b>	24
	<b>882</b>	1,220

#### *Asset Impairment*

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	2007
	(Unaudited)	
	(in million pesos)	
Trade and other receivables (Notes 3 and 14)	<b>291</b>	163
Write-down of inventories to net realizable value	<b>17</b>	61
Goodwill and intangible assets (Note 11)	<b>(6)</b>	-
Property, plant and equipment (Note 8)	<b>-</b>	2
	<b>302</b>	226

## **6. Income Tax**

The net components of deferred income tax assets (liabilities) recognized in the unaudited consolidated balance sheets are as follows:

	<b>March 31,</b>	December 31,
	<b>2008</b>	2007
	(Unaudited)	(Audited)
	(in million pesos)	
Net assets	<b>11,483</b>	13,757
Net liabilities	<b>(2,086)</b>	(2,155)

The components of the consolidated net deferred income tax assets and liabilities are as follows:

	<b>March 31,</b>	December 31,
	<b>2008</b>	2007
	(Unaudited)	(Audited)
	(in million pesos)	
Net assets:		
Net operating loss carryover, or NOLCO	<b>5,273</b>	6,055
Accumulated allowance for doubtful accounts	<b>3,252</b>	3,428
Derivative financial instruments	<b>1,677</b>	2,308
Unearned revenues	<b>1,551</b>	1,789
Pension and other employee benefits	<b>1,081</b>	1,096

	<b>March 31, 2008</b>	December 31, 2007
	<b>(Unaudited)</b>	(Audited)
	(in million pesos)	
Unamortized past service pension costs	<b>946</b>	985
MCIT	<b>903</b>	645
Unrealized foreign exchange losses	<b>646</b>	544
Provisions for impaired assets	<b>500</b>	494
Accumulated write-down of inventories to net realizable values	<b>224</b>	224
Leases	<b>65</b>	160
Executive stock option plan	<b>19</b>	32
Intangible assets and fair value adjustments on assets acquired	<b>2</b>	2
Preferred stock subject to mandatory redemption	<b>(52)</b>	(100)
Excess of fair value over cost of investment properties	<b>(80)</b>	(80)
Capitalized taxes and duties – net of amortization	<b>(358)</b>	(376)
Capitalized foreign exchange differential	<b>(743)</b>	(783)
Undepreciated capitalized interest charges	<b>(3,490)</b>	(3,572)
Asset impairment	–	824
Others	<b>67</b>	82
	<b>11,483</b>	13,757

Net liabilities:

Unearned revenues	<b>795</b>	825
Asset retirement obligation – net of undepreciated capitalized asset	<b>344</b>	332
Accumulated provision for doubtful accounts	<b>314</b>	304
Asset impairment	<b>257</b>	277
Pension and other employee benefits	<b>207</b>	217
Provisions for impaired assets	<b>92</b>	348
Leases	<b>38</b>	42
Unamortized past service pension costs	<b>7</b>	7
Derivative financial instruments	<b>3</b>	(164)
Capitalized foreign exchange differential	<b>(19)</b>	–
Excess of fair value over cost of investment properties	<b>(55)</b>	(60)
Interest charges capitalized	<b>(699)</b>	(718)
Intangible assets and fair value adjustments on assets acquired	<b>(709)</b>	(736)
Gain on debt exchange and debt restructuring transactions	<b>(1,191)</b>	(1,228)
Unrealized foreign exchange gains	<b>(1,486)</b>	(1,613)
Others	<b>16</b>	12
	<b>(2,086)</b>	(2,155)

Provision for corporate income tax consists of:

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	2007
	(Unaudited)	
	(in million pesos)	
Current	<b>3,060</b>	2,263
Deferred	<b>2,500</b>	2,337
	<b>5,560</b>	4,600

The reconciliation between the provision for income tax at the applicable statutory tax rates and the actual provision for corporate income tax is as follows:

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>
	(Unaudited)	
	(in million pesos)	
Provision for corporate income tax at the applicable statutory tax rates	<b>5,658</b>	4,680
Tax effects of:		
Non-deductible expenses	<b>245</b>	64
Net movement in unrecognized deferred income tax assets	<b>187</b>	-
Equity share in net loss of investees	<b>8</b>	2
Loss (income) subject to lower tax rate	<b>(101)</b>	70
Income subject to final tax	<b>(165)</b>	(118)
Income not subject to tax	<b>(272)</b>	(98)
<b>Actual provision for corporate income tax (Note 4)</b>	<b>5,560</b>	4,600

Mabuhay Satellite and SubicTel are registered as Subic Bay Freeport Enterprises while ClarkTel is registered as a Clark Special Economic Zone Enterprise under Republic Act No. 7227, or R.A. 7227, otherwise known as the Bases Conversion and Development Act of 1992. As registrants, Mabuhay Satellite, SubicTel and ClarkTel are entitled to all the rights, privileges and benefits established thereunder including tax and duty-free importation of capital equipment and a special income tax rate of 5% of gross income, as defined in R.A. 7227.

On January 3, 2007, the BOI approved ePLDT's application for pioneer status for its new data center facility as a new IT service firm in the field of services related to Internet Data Center. ePLDT was granted a six-year income tax holiday, or ITH, for its new data center facility from the earlier of January 2007 and the actual start of commercial operations. ePLDT started commercial operations of its new data center facility in February 2007.

On August 13, 2007, ePLDT received approval from the Philippine Economic Zone Authority, or PEZA, to declare the Vitro Data Center Building as a PEZA-registered IT Building EcoZone facility enabling prospective clients to apply for fiscal incentives should they qualify as a PEZA-registered entity. However, ePLDT as a developer and operator of Vitro Data Center Building is not entitled to PEZA incentives under R.A. No. 7916, or R.A. 7916, otherwise known as "The Special Economic Zone Act of 1995", as amended by Republic Act No. 8748, or R.A. 8748.

Parlance is registered with the BOI as a new IT export service firm in the field of customer interaction center on a pioneer status. Under this registration, Parlance is entitled to certain tax incentives, including an ITH for six years starting in June 2002. Parlance is required to comply with specific terms and conditions stated in its BOI registration.

Vocativ is registered with the PEZA as an Ecozone Export Enterprise to develop and operate a customer interaction services that serves overseas clients by providing customer relationship management services. As a registered enterprise, Vocativ is entitled to certain tax and non-tax incentives which include, among other things, tax and duty-free importations, exemption from local tax and an ITH for four years from start of commercial operations. After the ITH period, Vocativ is liable for a final tax, in lieu of all taxes, of 5% gross income less allowable deductions as defined under R.A. 7916. The 5% final tax must be paid and remitted in accordance with the amendments contained in R.A. 8748, as follows: (a) 3% to the National Government; and (b) 2% which will be directly remitted by the business establishments to the treasurer's office of the municipality or city where the enterprise is located.

On December 5, 2005, Vocativ received approval from PEZA for the adjustment of the start of its commercial operations, effectively extending the ITH to end of March 2006. On June 30, 2006, PEZA approved Vocativ's ITH extension for another year until April 2007. On September 3, 2007, PEZA again approved Vocativ's ITH extension for another year until March 2008.

Ventus and two of its customer interaction projects are registered with the BOI as a new IT export service firm in the field of customer interaction center on a pioneer status. Under their registrations, Ventus, Ventus Iloilo and Pasig customer interaction projects are entitled to certain tax incentives such as an ITH for six years starting March

2005 for Ventus and Ventus Iloilo customer interaction projects and August 2006 for Ventus Pasig customer interaction project. In relation to this, they are required to comply with specific terms and conditions stated in their BOI registration.

iPlus Intelligent Network, Inc., or iPlus, is a wholly-owned subsidiary of ePLDT and is registered with the BOI as a new IT service firm in the field of application service provider on a pioneer status. Under such registration, iPlus is entitled to a six-year ITH incentive from the actual start of commercial operations until January 1, 2009.

Digital Paradise is registered with the BOI as a new IT service firm in the field of community access on a non-pioneer status. Under the provisions of the registration, Digital Paradise's sales generated from its own community access activity and franchise fees are entitled to an ITH for a period of four years beginning December 2002. In December 2006, the BOI approved Digital Paradise's application for a status upgrade from non-pioneer to pioneer, accordingly extending the ITH period for another two years starting January 2007.

Level Up! was originally registered with the BOI as a new IT service firm in the field of application service provider on a non-pioneer status. Under such registration, Level Up! is entitled to certain tax incentives, which includes a four-year ITH from January 2003 and a tax credit for taxes on duties on materials used in export products for ten years starting January 2003. In April 2004, the BOI approved Level Up!'s request for upgrading its status from non-pioneer to pioneer in connection with its IT service activity in the field of application service provider for entertainment and educational project. Accordingly, the ITH period was extended from four years to six years to expire on January 2009.

In September 2006, PEZA approved SPi's application for registration as an ecozone information technology enterprise to provide IT enabled services with emphasis on the creation of electronic discovery, presentation of content in electronic information formats, data analysis, capture, abstracting and data processing, design, development and implementation of healthcare documentation solutions. As a registered enterprise, SPi is entitled to certain tax and non-tax incentives which include, among other things, tax and duty-free importations, exemption from local tax and an ITH for four years starting from June 2002. After the ITH period, SPi is liable for a final tax, in lieu of all taxes. The final tax is computed at 5% of gross income, in lieu of all taxes, less allowable deductions as defined under R.A. 7916 and will be paid and remitted in accordance with the amendments contained in R.A. 8748, as follows: (a) 3% to the National Government; and (b) 2% which will be directly remitted by the business establishments to the treasurer's office of the municipality or city where the enterprise is located.

Wolfpac is registered with the BOI as a new operator of service provider applications. Under the terms of its registration, it is entitled to certain tax and non-tax incentives which include, among other things, an ITH for four years starting February 2004.

On November 29, 2007, the BOI approved Wolfpac's application for a one year extension of ITH incentive on the basis that the capital equipment to labor ratio did not exceed US\$10 million as provided under Article 39 of Executive Order, or E.O. 226. The approved bonus is for the period from February 13, 2008 to February 12, 2009.

Smart Broadband, Inc., or SBI, has three registered activities with the BOI on a pioneer status, namely: (i) a new operator of telecommunications systems (inter-exchange carrier for data services); (ii) new information technology service firm in the field of providing internet services; and (iii) a new operator of telecommunications facilities (nationwide broadband wireless access). Under the terms of these registrations, SBI is entitled to certain tax and non-tax incentives which include, among other things, an ITH for six years until February 2007, August 2007 and July 2011, respectively. As at December 31, 2007, the remaining registered activity of SBI in the nationwide broadband wireless access, the first two registered activities have already expired after the ITH period, SBI is liable for a 30% regular corporate income tax or 2% MCIT, whichever is higher.

Income derived from non-registered activities with the BOI is subject to the regular corporate income tax rate enacted as at the balance sheet date.

Consolidated tax incentives that we availed for the three months ended March 31, 2008 and 2007 amounted to Php365 million and Php201 million, respectively.

On May 24, 2005, the President of the Philippines signed into law Republic Act No. 9337, or R.A. 9337, amending certain sections of the National Internal Revenue Code, which took effect on November 1, 2005. R.A. 9337, among others, introduced the following changes:

- a. The regular corporate income tax rate for domestic corporations and resident/non-resident foreign corporations increased from 32% to 35% effective November 1, 2005 and will be reduced to 30% effective January 1, 2009;
- b. The VAT rate increased from 10% to 12% effective February 1, 2006; and
- c. The input VAT on capital goods should be spread evenly over the estimated useful life or sixty months, whichever is shorter, if the acquisition cost, excluding the VAT component thereof, exceeds Php1 million.

Our deferred income tax assets have been recorded to the extent that such deferred income tax assets are expected to be utilized against sufficient future taxable profit. We had unrecognized deferred income tax assets of Php1,309 million and Php1,122 million largely pertaining to MCIT and asset impairments as at March 31, 2008 and December 31, 2007, respectively.

The breakdown of our consolidated unutilized NOLCO as at March 31, 2008 is as follows:

<b>Year Incurred</b>	<b>Year Expiring</b>	<b>(in million pesos)</b>
2005	2008	10,049
2006	2009	5,424
2007	2010	191
		<u>15,664</u>
Tax benefit from NOLCO		5,332
Unrecognized deferred income tax assets from NOLCO as at March 31, 2008		(59)
		<u>5,273</u>

The breakdown of our consolidated excess MCIT as at March 31, 2008 is as follows:

<b>Year Incurred</b>	<b>Year Expiring</b>	<b>(in million pesos)</b>
2005	2008	484
2006	2009	499
2007	2010	642
2008	2011	261
		<u>1,886</u>
Unrecognized deferred income tax assets from MCIT as at March 31, 2008		(983)
		<u>903</u>

## 7. Earnings Per Common Share

The following table presents information necessary to calculate the earnings per common share:

	<b>Three Months Ended March 31,</b>			
	<b>2008</b>		<b>2007</b>	
	<b>Basic</b>	<b>Diluted</b>	Basic	Diluted
	(Unaudited)			
	(in million pesos)			
Consolidated net income attributable to equity holders of PLDT	<b>10,446</b>	<b>10,446</b>	8,614	8,614
Dividends on convertible preferred shares	<b>(114)</b>	<b>(114)</b>	(114)	(114)
Dividends on dilutive preferred stock subject to mandatory redemption charged to interest expense for the period	-	-	-	5
Accretion of preferred stock subject to mandatory redemption	-	-	-	37
Foreign exchange gains on preferred stock subject to mandatory redemption	-	-	-	(20)

	<b>Three Months Ended March 31,</b>			
	<b>2008</b>		2007	
	<b>Basic</b>	<b>Diluted</b>	Basic	Diluted
	(Unaudited)			
	(in million pesos)			
Consolidated net income applicable to common shares	<b>10,332</b>	<b>10,332</b>	8,500	8,522
	(in thousands, except per share amounts)			
Outstanding common shares at beginning of period	<b>188,741</b>	<b>188,741</b>	188,435	188,435
Effect of issuance of common shares during the period	<b>150</b>	<b>150</b>	127	127
Effect of purchase of treasury stock during the period	<b>(41)</b>	<b>(41)</b>	–	–
Average incremental number of shares under ESOP during the period	–	<b>16</b>	–	60
Common shares equivalent of convertible preferred shares deemed dilutive:				
Preferred Stock Series VI (Note 18)	–	–	–	783
Weighted average number of common shares for the period	<b>188,850</b>	<b>188,866</b>	188,562	189,405
Earnings per common share	<b>Php54.71</b>	<b>Php54.71</b>	Php45.08	Php44.99

Basic EPS is calculated by dividing the consolidated net income for the period attributable to common shareholders (consolidated net income adjusted for dividends on all series of preferred shares except for dividends on preferred stock subject to mandatory redemption) by the weighted average number of common shares outstanding during the period, after giving retroactive effect to any stock dividend declarations.

Diluted EPS is calculated in the same manner assuming that, at the beginning of the period or at the time of issuance during the period, all outstanding options are exercised and convertible preferred shares are converted to common shares, and appropriate adjustments to consolidated net income are effected for the related income and expenses on preferred shares. Outstanding stock options will have a dilutive effect only when the average market price of the underlying common share during the period exceeds the exercise price of the option.

Where the effect of the assumed conversion of the preferred shares and the exercise of all outstanding options have an anti-dilutive effect, basic and diluted EPS are stated at the same amount.

When required dividends declared on each series of convertible preferred shares divided by the number of equivalent common shares, assuming such convertible preferred shares are converted to common shares, decreases the basic EPS, then such convertible preferred shares are deemed dilutive. As such, the diluted EPS is calculated by dividing the consolidated net income attributable to common shareholders (consolidated net income, adding back any dividends and/or other charges recognized for the period related to the dilutive convertible preferred shares classified as liability, less dividends on non-dilutive preferred shares except for dividends on preferred stock subject to mandatory redemption) by the weighted average number of common shares including the weighted average number of common shares held as treasury shares, the common share equivalent arising from the conversion of the dilutive convertible preferred shares.

Series VI Convertible Preferred Stocks in 2007 were deemed dilutive based on a calculation of the required dividends on these preferred shares divided by the number of equivalent common shares assuming such preferred shares are converted into common shares, including the effect of shares under ESOP and treasury shares, and compared against the basic EPS. Since the amount of dividends on the Series A to HH, Series V and VI Convertible Preferred Stocks in 2008 and Series A to HH and Series V Convertible Preferred Stock in 2007 over its equivalent number of common shares increased the basic EPS, these Convertible Preferred Stocks were anti-dilutive.

On January 29, 2008, our board of directors approved a share buyback program of up to two million shares of PLDT's common stock, representing approximately 1.1% of PLDT's total outstanding shares of common stock. As at March 31, 2008, we acquired and paid a total of 124,000 shares of common stock at a weighted average price of Php2,667 for a total of Php331 million based on the share buyback program. The effect of the acquisition of shares of PLDT's common stock pursuant to the share buyback program was considered in the computation of our basic and diluted earnings per common share for the three months ended March 31, 2008. See *Note 17 – Equity* for further discussion.

#### **Dividends Declared For The Three Months Ended March 31, 2008 (Unaudited)**

Class	Date			Amount	
	Approved	Record	Payable	Per Share	Total (in million pesos)
<b>Preferred Stock Subject to Mandatory Redemption</b>					
Series V	March 4, 2008	March 20, 2008	April 15, 2008	Php4.675	–
Series VI	March 4, 2008	March 20, 2008	April 15, 2008	US\$0.09925	2
Charged to income					2
<b>10% Cumulative Convertible Preferred Stock</b>					
Series CC	January 29, 2008	February 28, 2008	March 31, 2008	Php1.00	17
Series DD	January 29, 2008	February 15, 2008	February 29, 2008	1.00	3
Series EE	March 25, 2008	April 24, 2008	May 30, 2008	1.00	–
					20
<b>Cumulative Non-Convertible Redeemable Preferred Stock</b>					
Series IV*	January 29, 2008	February 22, 2008	March 15, 2008	Php–	12
<b>Common Stock</b>					
Regular Dividend	March 4, 2008	March 19, 2008	April 21, 2008	Php68.00	12,853
Special Dividend	March 4, 2008	March 19, 2008	April 21, 2008	56.00	10,585
					23,438
Charged to retained earnings					23,470

\* Dividends are declared based on total amount paid up.

### Dividends Declared After March 31, 2008

Class	Date			Amount	
	Approved	Record	Payable	Per Share	Total (in million pesos)
<b>Cumulative Non-Convertible Redeemable Preferred Stock</b>					
Series IV*	May 6, 2008	May 23, 2008	June 15, 2008	Php–	12
<b>Convertible Preferred Stock</b>					
Series V**	May 6, 2008	June 4, 2008	June 23, 2008	Php0.051944 per day	–

Substantially, all our telecommunications equipment is purchased from outside the Philippines. Our significant sources of financing for such purchases are foreign loans requiring repayment in currencies other than Philippine pesos, principally in U.S. dollars. See *Note 18 – Interest-bearing Financial Liabilities*. Interest, using an average capitalization rate of 10%, and net foreign exchange losses capitalized to property, plant and equipment qualified as borrowing costs for the three months ended March 31, 2008 and 2007 were as follows:

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>
	(Unaudited)	
	(in million pesos)	
Interest (Notes 2 and 5)	<b>184</b>	114
Foreign exchange losses (gains) – net	<b>55</b>	(78)

As at March 31, 2008 and December 31, 2007, the undepreciated capitalized net foreign exchange losses which qualified as borrowing costs amounted to Php2,476 million and Php2,533 million, respectively.

The consolidated useful lives of the assets are estimated as follows:

Buildings	25 years
Cable and wire facilities	10 – 25 years
Central office equipment	10 – 20 years
Communications satellite	15 years
Information origination and termination equipment	3 – 15 years
Land improvements	10 years
Vehicles, furniture and other network equipment	3 – 10 years
Cellular facilities	3 – 10 years

*SBI's Acquisition of Cluster 3 Assets from Cruz Telephone Company, Inc., or Cruztelco*

On February 7, 2008, SBI completed the acquisition of the Cluster 3 assets from Cruztelco at a price of Php371 million. Cruztelco is a Local Exchange Carrier operator offering fixed line services in three geographical clusters, namely: (i) Cluster 1 covering certain areas in Visayas and Luzon; (ii) Cluster 2 North Western Mindanao, and (iii) Cluster 3 North Eastern Mindanao.

The fair value of the Cluster 3 assets, determined provisionally, was assessed to be equal to its book value allocated as follows: (a) equipment at Php318 million; (b) land at Php31 million; and (c) buildings and improvements at Php22 million.

SBI intends to engage an independent appraiser to establish the fair values of the acquired assets.

*Asset Impairment Review*

As at December 31, 2006, management determined that due to Mabuhay Satellite's difficulty in generating cash flows with the satellite nearing its end-of-life and other events affecting its business, Mabuhay Satellite's Agila II transponder was considered impaired. This impairment review was based on the net present value of future cash flows from the continued use of this asset group using the discount factor of 10% as applied on cash flow projection from 2008 until 2010. An impairment loss of Php1,391 million was charged to the carrying value of this satellite as at December 31, 2006 and included in the accumulated depreciation and amortization account in the audited consolidated balance sheet as at December 31, 2006. In 2007, we performed an impairment update review on Mabuhay Satellite's Agila II and no additional impairment was recognized. Annual update in the impairment testing will be completed at year-end.

Property, plant and equipment include the following amounts for capitalized leases as at March 31, 2008 and December 31, 2007:

	March 31, 2008 (Unaudited)			Total
	Vehicles, furniture and other network equipment	Cable and wire facilities	Central office equipment	
	(in million pesos)			
Cost	1,171	46	308	1,525
Less accumulated depreciation	1,099	26	308	1,433
	72	20	–	92
	December 31, 2007 (Audited)			Total
	Vehicles, furniture and other network equipment	Cable and wire facilities	Central office equipment	
	(in million pesos)			
Cost	1,190	46	308	1,544
Less accumulated depreciation	1,109	25	308	1,442
	81	21	–	102

The following table summarizes all changes to the liabilities on asset retirement obligations as at March 31, 2008 and December 31, 2007:

	<b>March 31, 2008 (Unaudited)</b>	December 31, 2007 (Audited)
	(in million pesos)	
Asset retirement obligations at beginning of period	<b>952</b>	831
Additional liability recognized during the period	<b>21</b>	48
Accretion expenses	<b>20</b>	81
Settlement of obligations	<b>(3)</b>	(8)
Asset retirement obligations at end of period (Notes 3 and 19)	<b>990</b>	952

## 9. Investments in Associates and Joint Ventures

This account consists of:

	<b>March 31, 2008 (Unaudited)</b>	December 31, 2007 (Audited)
	(in million pesos)	
ACeS International Limited	<b>1,896</b>	1,896

	(in million pesos)	
Balance at beginning of period	2,782	2,930
Translation adjustments	7	(148)
Balance at end of period	<b>2,789</b>	2,782

***Investment of ACeS Philippines in ACeS International Limited, or AIL***

As at March 31, 2008, ACeS Philippines had a 36.99% investment in AIL, a company incorporated under the laws of Bermuda. AIL owns the Garuda I Satellite and the related system control equipment in Batam, Indonesia.

AIL has incurred recurring significant operating losses, negative operating cash flows, and significant levels of debt. The financial condition of AIL was partly due to the National Service Providers', or NSPs, inability to generate the amount of revenues originally expected as the growth in subscriber numbers has been significantly lower than budgeted. These factors raised substantial doubt about AIL's ability to continue as a going concern. On this basis, we recognized a full impairment provision in respect of our investment in AIL.

See Note 22 – *Related Party Transactions* and Note 24 – *Contractual Obligations and Commercial Commitments* for further details as to the contractual relationships in respect of AIL.

***Investment of Mabuhay Satellite in Mabuhay Space Holdings Limited, or MSHL***

In 1996, Mabuhay Satellite entered into a Joint Venture Agreement, or JVA, with Space Systems/Loral Inc., or SS/L, to form MSHL for the purpose of providing high-power Ku-Band satellite transmission services using the payload which was added by SS/L to the Agila II Satellite. Under the terms of the JVA, SS/L is required to convey title to the additional payload service to MSHL in consideration for SS/L's 35% equity interest in MSHL, and Mabuhay Satellite is required to pay SS/L in the amount of US\$19 million for a 65% equity interest in MSHL.

In 2000, SS/L filed a Notice of Default and Termination against Mabuhay Satellite arising from the latter's alleged failure to amicably resolve its unpaid obligation to SS/L under the JVA. In 2002, the arbitration panel handed down its decision and provided for payment by Mabuhay Satellite to SS/L of the principal amount of US\$10 million plus accrued interest at 9% per annum. On June 30, 2003, Mabuhay Satellite and SS/L concluded a US\$15 million settlement agreement under which Mabuhay Satellite leased two transponders under a transponder agreement on a life-term basis to SS/L and offset the lease charges due from SS/L and its receivables from Loral Skynet Network Services, Inc. (formerly known as the Loral Cyberstar, Inc.), among other things, for a full and final settlement of the arbitration decision. The agreement was subsequently approved by Mabuhay Satellite's creditors in March 2004.

In accordance with the settlement agreement, Mabuhay Satellite and SS/L are required to proceed to dissolve the joint venture under a separate agreement, for which each of the parties will receive title over a number of transponders owned by the joint venture in proportion to their respective interests. On the basis of the joint venture dissolution, we recognized full impairment provision in respect of our investment in MSHL in 2004.

***Investment of Smart in Blue Ocean Wireless, or BOW***

On August 3, 2007, Smart (through its subsidiary, SCH) acquired a 30% equity interest in BOW, a Dublin-based company delivering GSM communication capability for the merchant maritime sector. The total acquisition cost amounted to US\$16 million, or Php724 million, of which US\$13 million, or Php601 million, was paid in cash and US\$3 million, or Php123 million, worth of equipment and services was delivered by Smart in accordance with the subscription agreement. BOW provides GSM network at sea through Altobridge, a patented GSM technology that will complement Smart's prepaid wireless satellite phone service, *SmartLink*.

### ***Investment of ePLDT in Philweb Corporation, or Philweb***

In May 2006, ePLDT subscribed to newly issued common shares of Philweb, an internet-based online gaming company, equivalent to 20% of the total outstanding capital stock of Philweb at a price of Php0.020 per share or an aggregate amount of Php503 million. Of the total subscription price, Php428 million was paid by ePLDT on the closing date. The portion of the unpaid subscription price amounting to Php25 million will be paid by ePLDT at the same time as the Philweb majority stockholders pay the remaining unpaid portion of the subscription pursuant to a general call on subscription to be made by Philweb's board of directors. The unpaid balance of Php50 million will be paid upon the lapse of certain post-closing price adjustment periods. The unpaid subscription of Php75 million was recorded as part of accrued expenses and other current liabilities in the unaudited consolidated balance sheet.

In October 2006, ePLDT acquired an additional 8,037,692,308 shares of Philweb at a price of Php0.026 per share or an aggregate amount of Php209 million. This represents an additional 6.2% of the outstanding shares of Philweb, raising ePLDT's total equity stake to 26.87% as at March 31, 2008 and December 31, 2007.

Philweb is primarily engaged in internet-based online gaming, through its appointment as Principal Technology Service Provider under the Marketing Consultancy Agreement for Internet Sports Betting and Internet Casino with the Philippine Amusement and Gaming Corporation, or PAGCOR. As at the end of December 2007, Philweb offers Internet Sports Betting in over 200 PAGCOR Internet Sports Betting Stations and over 70 Internet Casino Stations nationwide. As at March 31, 2008 and December 31, 2007, the market value of ePLDT's investments in Philweb amounted to Php1,227 million and Php1,492 million, respectively.

### ***Investment of ePLDT in BayanTrade Dotcom, Inc., or BayanTrade***

BayanTrade was incorporated and registered with the Philippine SEC on August 8, 2000 to provide: (a) a business-to-business electronic purchasing market place to link buyers and suppliers of goods and services over the internet; (b) electronic catalogue purchasing facilities over the internet to buyers and suppliers; (c) link-up with similar horizontal markets and vertical markets across the Asia-Pacific Region and the world; and (d) facilitating services incidental to the business. BayanTrade is an e-procurement joint venture established together with six of the Philippines' leading conglomerates. ePLDT's initial shareholding in BayanTrade was 20.5%, which was subsequently diluted to 19.17% in August 2004 due to an equity call to which ePLDT did not subscribe. The dilution did not affect the degree of our representation on the board of directors of BayanTrade and significant influence was therefore retained.

In September 2005, ePLDT received 4,794,615 bonus warrants from BayanTrade which entitles ePLDT to purchase 2,794,615 common shares at a price of Php0.50 per share at any time on or before August 31, 2010.

### ***Investment of ePLDT in ePDS, Inc., or ePDS***

ePLDT entered into a joint venture agreement with DataPost Pte Ltd., or DataPost, a subsidiary of Singapore Post, or Spring, and G3 Worldwide ASPAC pursuant to which the parties formed ePDS, a bills printing company that performs laser printing and enveloping services for statements, bills and invoices, and other value-added services for companies in the Philippines. ePLDT has a 50% equity interest in ePDS, while DataPost has a 30% equity interest. Spring, the largest international mail services provider, owns the remaining 20% equity interest. ePDS has an initial paid-up capital of Php11 million.

### ***Summarized Financial Information of Equity Investees and Joint Ventures***

The following table presents the summarized financial information of our investments in associates and joint ventures in conformity with PFRS for equity investees for which we have significant influence as at March 31, 2008 and December 31, 2007 and for the three months ended March 31, 2008 and 2007.

	<b>March 31, 2008</b>	December 31, 2007

Investment properties are stated at fair values, which have been determined based on the latest valuations performed by Asian Appraisal Company, Inc., an independent firm of appraisers, which is an industry specialist in valuing these types of investment properties. The valuation undertaken was based on an open market value, supported by a market evidence in which assets could be exchanged between a knowledgeable willing buyer and seller in an arm's-length transaction at the dates of valuation. None of our investment properties are being leased to third parties that earn rental income.

## 11. Goodwill and Intangible Assets

Movements in goodwill and intangible assets are as follows:

*SPi's Acquisition of Springfield Service Corporation, or Springfield*

On April 12, 2007, SPi acquired, through a wholly-owned U.S. subsidiary, a 100% equity interest in Springfield for an aggregate purchase price of US\$35 million, or Php1,664 million, plus possible future earn-out payments with an aggregate fair value at acquisition date of US\$18 million, or Php855 million. As at date of acquisition, the net cash outflow related to acquisition was US\$35 million, or Php1,664 million, representing cash payments of US\$34 million, or Php1,616 million, net of cash acquired from Springfield of US\$1 million, or Php48 million, and incidental cost amounted to US\$1.3 million, or Php63 million. The total purchase price consideration including the fair value of possible future earn-out payments at acquisition date amounted to US\$53 million, or Php2,520 million, inclusive of other net debt adjustments totaling US\$8 million, or Php380 million. As at March 31, 2008, the revised fair value of possible future earn-out payments, as revised after effecting adjustments on forecasted earn-out and accretion, amounted to US\$25 million, or Php1,091 million. See *Note 19 – Deferred Credits and Other Noncurrent Liabilities* and *Note 21 – Accrued Expenses and Other Current Liabilities*.

The purchase price consideration has been allocated to the assets and liabilities on the basis of fair values at the date of acquisition. The fair values of the identifiable acquired assets and liabilities of Springfield as at the time of the acquisition and the corresponding carrying amounts immediately before the acquisition are as follows:

	Previous Carrying Value		Fair Value Recognized on Acquisition	
	In U.S. Dollar	Php <sup>(1)</sup>	In U.S. Dollar	Php <sup>(1)</sup>
	(in millions)			
<b>Assets:</b>				
Property, plant and equipment	3	143	3	143
Goodwill	–	–	45	2,139
Intangible assets	7	333	8	380
Cash and cash equivalents	1	48	1	48
Trade and other receivables	3	143	3	143
	14	667	60	2,853
<b>Liabilities:</b>				
Deferred income tax liabilities	1	48	4	190
Noncurrent liabilities	–	–	1	48
Accounts payable and other current liabilities	10	475	2	95
	11	523	7	333
Net assets acquired	3	144	53	2,520

<sup>(1)</sup> Converted to Philippine Peso using the exchange rate at the time of purchase of Php47.536 to US\$1.00.

Springfield was accounted for in our consolidated financial statements using the purchase price method of accounting, which resulted in goodwill amounting to Php2,139 million on April 12, 2007. Goodwill pertains to the assembled workforce of Springfield and other unidentified intangible assets that did not qualify as intangible assets under PAS 38.

Intangible assets pertaining to Springfield customer relationship was determined at Php380 million with an estimated useful life of seven years. Intangible assets was valued by American Appraisal China, Limited, an independent appraiser, based on multiple excess earnings approach using a discount rate of 15%.

Our consolidated revenues would have been increased by Php333 million while our consolidated net income would have been decreased by Php11 million for the year ended December 31, 2007 if the acquisition of Springfield had actually taken place on January 1, 2007. Total net income of Springfield included in our 2007 audited consolidated statement of income from the time of acquisition until December 31, 2007 amounted to Php164 million.

### Smart's Investment in 3rd Brand

In 2007, Smart recognized intangible assets for technology and license costs in 3rd Brand amounting to US\$4 million, or Php179 million. Said technology and license costs were estimated to have an estimated useful life of 10 years.

### Smart's Supply Agreement with THISS Technologies Pte. Ltd., or THISS

In 2007, Smart also recognized an intangible asset for technology and license costs incurred in connection with SCH's GSM connectivity service for the commercial shipping sector. Smart (through SCH) engaged the services of THISS as developer and supplier for this service. During 2008, additional development costs of Php18 million was incurred. The development costs recognized as intangible asset for this project amounted to US\$1.5 million, or Php61 million, and US\$1 million, or Php41 million, as at March 31, 2008 and December 31, 2007, respectively.

### Other Intangible Assets

Other intangible assets consist of:

	Estimated Useful Lives	Remaining Useful Lives	March 31, 2008 (Unaudited)			December 31, 2008 (Audited)		
			Gross		Net	Gross		Net
			Carrying Amount	Accumulated Amortization		Carrying Amount	Accumulated Amortization	
(in million pesos)								
Customer list	3 – 6 years	5 years	1,498	440	1,058	1,486	384	1,102
Spectrum	15 years	11 years	1,205	288	917	1,205	268	937
Technology application	3 – 10 years	1 – 10 years	838	528	310	812	516	296

			<b>3,860</b>	<b>1,442</b>	<b>2,418</b>	3,821	1,350	2,471

The future amortization of other intangible assets as at March 31, 2008 is as follows:

	(in million pesos)
2008 <sup>(1)</sup>	309
2009	385
2010	354
2011	320
2012 and onwards	1,050
Balance at end of period	2,418

<sup>(1)</sup> April 1, 2008 through December 31, 2008.

### Impairment Testing of Goodwill

#### Goodwill from Acquisition of SBI

The test for recoverability of goodwill recognized in connection with the acquisition of SBI was applied to our wireless asset group, representing the lowest level for which identifiable cash flows are largely independent of the cash flows of other groups of assets and liabilities.

Although revenue streams may be segregated between Smart and SBI through subscribers availing themselves of their respective cellular and wireless broadband services, the cost items and cash flows are difficult to carve out, largely due to the significant portion of shared and common-used networks/platforms. In the case of SBI, it provides broadband wireless access to its subscribers using Smart's cellular base stations, fiber optic and IP backbone. With the common use of wireless assets of Smart in providing wireless services, the lowest asset group for SBI for which cash flows could be clearly identified from other groups of assets is Smart's wireless business segment.

Our wireless business segment is our largest revenue and cash flow contributor. As such, there is no impairment of our wireless business segment. As at December 31, 2007, the recoverable amount of this segment is determined on

the basis of value in use calculations using cash flow projections based on the financial budgets approved by the board of directors, covering a 5-year period from 2008 to 2012. The pre-tax discount rate applied to cash flow projections is 8.4% and cash flows beyond the 5-year period are determined using a 2.5% growth rate that is the same as the long-term average growth rate for the telecommunications industry.

Annual update in the impairment testing will be completed at year-end.

*Goodwill from Acquisition of SPi and its Subsidiary, CyMed*

The goodwill acquired through the SPi and CyMed transactions was allocated for impairment testing to each of the cash-generating units of those businesses, namely medical transcription, litigation and publishing. The recoverable amount of goodwill was determined using the value in use approach. Value in use was based on the cash flow projections of the most recent financial budgets/forecasts approved by the board of directors, which management believes are reasonable and are management's best estimate of the ranges of economic conditions that will exist over the remaining useful life of the asset. The discount rate applied was 15% which was based on the weighted cost of capital adjusted for the difference in currency and specific risks associated with the assets or business of a cash-generating unit.

We recognized an impairment loss of Php908 million in 2007 pertaining to the medical transcription business of SPi, since the carrying amount of the individual assets, pertaining to the medical transcription business, exceeded the recoverable amount in 2007.

Annual update in the impairment testing will be completed at year-end.

*Goodwill from Acquisition of Level Up!*

Goodwill acquired from our acquisition of a 60% equity interest in Level Up! was tested for impairment where the recoverable amount was determined using the value in use approach. Value in use was based on the cash flow projections on the most recent financial budgets/forecasts approved by the board of directors. The discount rate applied was 22% which was based on the weighted cost of capital. We recognized an impairment loss of Php254 million pertaining to the goodwill of ePLDT's acquisition of Level Up! in 2007.

Annual update in the impairment testing will be completed at year-end.

*Goodwill from Acquisition of Digital Paradise*

Goodwill acquired from the acquisition of Digital Paradise was tested for impairment based on the recoverable amount of the long lived assets where recoverable amount was determined based on the cash flow projections on the most recent financial budgets/forecasts approved by the board of directors. The discount rate applied was 22% which was based on the weighted cost of capital. We impaired goodwill acquired from ePLDT's acquisition of Digital Paradise amounting to Php29 million in 2007.

Annual update in the impairment testing will be completed at year-end.

---

## 12. Cash and Cash Equivalents

This account consists of:

	<b>March 31, 2008</b>	December 31, 2007
	<b>(Unaudited)</b>	(Audited)
	(in million pesos)	
Cash on hand and in banks (Note 26)	<b>3,772</b>	3,944
Temporary cash investments (Note 26)	<b>22,737</b>	13,503
	<b>26,509</b>	17,447

Cash in banks earns interest at prevailing bank deposit rates. Temporary cash investments are made for varying periods of up to three months depending on our immediate cash requirements, and earn interest at the prevailing short-term deposit rates. Due to the short-term nature of such transactions, the carrying value approximates the fair value of our temporary cash investments.

---

### 13. Investment in Debt Securities

#### *Investment of ePLDT in Stradcom International Holdings, Inc., or SIHI*

ePLDT had a 22.5% equity interest in convertible securities of SIHI, the parent company of Stradcom Corporation, or Stradcom, which has an existing concession agreement with the Philippine Government for the modernization of the Philippine Land Transportation Office, including the computerization of driver's license issuance, vehicle registration and traffic adjudication systems. SIHI has been incurring losses from the start of operations due to Stradcom's continuous losses and recurring excess of current liabilities over current assets. On this basis, we recognized an impairment provision in respect of our total investment in SIHI of Php616 million in 2004.

In 2007, Stradcom entered into a Lenders' Agreement for the issuance of Asset-Backed Bonds amounting to Php1.6 billion. The proceeds were used to payoff all of Stradcom's debts, trade payables and capital expenditures for upgrade in its new inter-connectivity business, which is expected to contribute significantly to Stradcom's operating results in future years.

On December 10, 2007, ePLDT and SIHI agreed to extend the redemption date of the convertible securities of SIHI owned by ePLDT to January 31, 2008 and fixed the redemption price at Php1,171 million as at December 27, 2007 (original maturity date) plus an additional amount of Php256,760 per day from December 27, 2007 until the date of actual redemption of such shares. On January 29, 2008, the redemption date was further extended to February 29, 2008.

The net realizable value of our investment in convertible securities of SIHI amounted to Php1,115 million as at December 31, 2007. On February 29, 2008, we recognized an interest income of Php16 million after SIHI redeemed the convertible securities for Php1,187 million.

Movements in the accumulated impairment losses are as follows:

	December 31, 2007 (Audited)
	(in million pesos)
Balance at beginning of period	616
Reversal of impairment provision for the period	(616)
Balance at end of period	-

## 14. Trade and Other Receivables

This account consists of receivables from:

	March 31, 2008 (Unaudited)	December 31, 2007 (Audited)
	(in million pesos)

Collective impairment	740	366	374	–	–	–
	12,855	5,875	4,318	1,047	381	1,234
Gross amount of receivables, individually impaired, before deducting any individually assessed impairment allowance	12,168	5,555	3,951	1,047	381	1,234

Receivables from carriers represent receivables arising from interconnection agreements with other telecommunication carriers. The aforementioned amount of receivable is shown net of related payable to the same telecommunications carriers because a legal right of offset exists.

On October 10, 2002, PLDT entered into a Receivables Purchase Deed, or RPD, with a foreign financial institution, or the Purchaser, under which PLDT agreed (1) to sell its receivables from certain eligible foreign carriers up to September 30, 2007 for an advance payment of US\$50 million and (2) to service, administer and collect the receivables on behalf of the Purchaser. Under the RPD, the Purchaser has no recourse against PLDT should an eligible carrier fail or refuse to settle the assigned/purchased receivables, except when PLDT commits a breach of its representations and warranties under the RPD. The RPD expired on December 4, 2007.

Sale of receivables under the RPD amounted to US\$4 million, or Php167 million, and US\$1 million, or Php61 million, for the year ended December 31, 2007 and for the three months ended March 31, 2007, respectively. Loss on sale of receivables under the RPD included in other expenses account amounted to US\$0.1 million, or Php6 million, US\$0.07 million, or Php3 million, for the year ended December 31, 2007 and for the three months ended March 31, 2007, respectively.

Balance at January 1, 2008	405	36	441	Php4,417	188	Php943
Conversion	–	–	–	–	–	2
Balance at March 31, 2008 (Unaudited)	405	36	441	Php4,417	188	Php945

### *Preferred Stock*

The preferred stock is non-voting, except as specifically provided by law, and is preferred as to liquidation.

The Series A to HH 10% Cumulative Convertible Preferred Stocks earn cumulative dividends at an annual rate of 10%. After the lapse of one year from the last day of the year of issuance of a particular series of 10% Cumulative Convertible Preferred Stock, any holder of such series may convert all or any of the shares of 10% Cumulative Convertible Preferred Stock held by him into fully paid and non-assessable shares of Common Stock of PLDT, at a conversion price equivalent to 10% below the average of the high and low daily sales price of a share of Common Stock on the PSE, or if there have been no such sales on the PSE on any day, the average of the bid and the asked prices of a share of Common Stock of PLDT at the end of such day on such Exchange, in each such case averaged over a period of 30 consecutive trading days prior to the conversion date, but in no case shall the conversion price be less than the price set by the board of directors which, as at March 31, 2008, was Php5.00 per share. The number of shares of Common Stock issuable at any time upon conversion of one share of the subscriber investment plan, or SIP, or the 10% Cumulative Convertible Preferred Stock is determined by dividing Php10.00 by the then applicable conversion price.

In case the shares of Common Stock at anytime outstanding are subdivided into a greater or consolidated into a lesser number of shares, then the minimum conversion price per share of Common Stock will be proportionately decreased or increased, as the case may be, and in the case of a stock dividend, such price will be proportionately decreased, provided, however, that in every case the minimum conversion price shall not be less than the par value per share of Common Stock. In the event the relevant effective date for any such subdivision or consolidation of shares or stock dividend occurs during the period of 30 trading days preceding the presentation of any shares of 10% Cumulative Convertible Preferred Stock for conversion, a similar adjustment will be made in the sales prices applicable to the trading days prior to such effective date utilized in calculating the conversion price of the shares presented for conversion.

In case of any other reclassification or change of outstanding shares of Common Stock, or in case of any consolidation or merger of PLDT with or into another corporation, the board of directors shall make such provisions, if any, for adjustment of the minimum conversion price and the sales price utilized in calculating the conversion price as the board of directors, in its sole discretion, shall deem appropriate.

At PLDT's option, the Series A to HH 10% Cumulative Convertible Preferred Stocks are redeemable at par value plus accrued dividends five years after the year of issuance.

The Series IV Cumulative Non-Convertible Redeemable Preferred Stock earns cumulative dividends at an annual rate of 13.5% based on the paid-up subscription price. It is redeemable at the option of PLDT at any time one year after subscription and at the actual amount paid for such stock, plus accrued dividends.

The provisions of certain subscription agreements involving preferred stock have an effect on the ability of PLDT to, without written consent, sell certain assets and pay cash dividends unless all dividends for all past quarterly dividend periods have been paid, and provision has been made for the currently payable dividends.

### **Common Stock**

On January 29, 2008, our board of directors approved a share buyback program of up to two million shares of PLDT's common stock, representing approximately 1.1% of PLDT's total outstanding shares of common stock. The share buyback program reflects PLDT's commitment to capital management as an important element in enhancing shareholder value. This also reinforces initiatives that PLDT has already undertaken such as the declaration of special dividends in addition to the regular dividend pay out of 70% on common shares, after having determined that PLDT has the capacity to pay additional returns to shareholders. The share buyback program contemplates that PLDT will reacquire shares on an opportunistic basis, direct from the open market through the trading facilities of the PSE and NYSE.

As part of our goal to maximize returns to our shareholders, we obtained on January 29, 2008 an approval from our board of directors to conduct a share buyback program for up to two million PLDT common shares. As at March 31, 2008, we have acquired and paid 124,000 shares of common stock at a weighted average price of Php2,667 for a total of Php331 million based on the share buyback program. As at May 5, 2008, we have acquired a total of 346,260 shares of common stock at a weighted average price of Php2,720 for a total of Php942 million. See also *Note 7 – Earnings Per Common Share*.

<sup>(1)</sup> April 1, 2008 through December 31, 2008.

#### **U.S. Dollar Debt:**

##### Export Credit Agencies-Supported Loans

In order to obtain imported components for our network infrastructure in connection with our expansion and service improvement programs, we obtained loans extended and/or guaranteed by various export credit agencies. These financings account for a significant portion of our indebtedness.

##### *Kreditanstalt für Wiederaufbau, or KfW*

KfW, a German state-owned development bank, is PLDT's largest single creditor. As at March 31, 2008, we owed an aggregate principal amount of US\$124 million, or Php5,157 million, to KfW, as follows:

- US\$90 million provided under various export credit agency-backed facilities, of which US\$9 million was in connection with our expansion and service improvement programs, and US\$81 million in connection with the US\$149 million refinancing facility discussed below; and
- US\$34 million provided for the 15% downpayment portion and credit facilities without guarantee/insurance cover from the export credit agencies, of which US\$22 million was in connection with the US\$149 million refinancing facility discussed in the following paragraphs.

On January 25, 2002, PLDT signed two loan agreements with KfW, which provided PLDT with a US\$149 million facility to refinance in part the repayment installments under its existing loans from KfW due from January 2002 to December 2004. The facility is composed of a nine-year loan, inclusive of a three-year disbursement period and a two-year grace period during which no principal is payable. It partly enjoys the guarantee of HERMES, the export credit agency of the Federal Republic of Germany. We have drawn US\$140 million, or Php5,844 million, under this facility as at March 31, 2008. PLDT waived further disbursements under this refinancing facility effective September 1, 2004. Thus, the undrawn portion of US\$9 million was cancelled.

Of the amounts outstanding under these KfW loans, US\$49 million will mature in 2008, US\$44 million will mature in 2009 and US\$31 million will mature in 2010. Principal amortizations on these loans are generally payable in equal semi-annual installments.

##### *Finnvera, Plc, or Finnvera*

As at March 31, 2008, a principal amount of US\$40 million (US\$39.6 million, net of unamortized debt discount of US\$0.4 million), or Php1,670 million (Php1,652 million, net of unamortized debt discount of Php18 million) of Smart's debt was provided by various banks under an export credit agency-backed facility in connection with Smart's GSM expansion program. This facility is covered by a guarantee from Finnvera, the Finnish Export Credit Agency, for 100% of political and commercial risk for the refinancing facility of GSM Phases 5A and 5B.

A US\$100 million refinancing facility was obtained on February 11, 2005 in relation to Smart's GSM Phases 5A and 5B loans which were prepaid on March 1, 2005 with outstanding balances of US\$60 million and US\$41 million, respectively, at the time of prepayment. This refinancing facility is payable semi-annually over five years starting September 1, 2005 with final repayment due in March 2010. The principal benefit of refinancing the Phase 5 loan was the savings from a lower interest margin on the refinancing facility.

Of the amount outstanding under the remaining Finnvera guaranteed loan, US\$10 million will mature in 2008, US\$20 million will mature in 2009 and US\$10 million will mature in 2010. Principal amortization on this loan is payable in equal semi-annual installments.

*Nippon Export and Investment Insurance of Japan, or NEXI*

On November 28, 2002, Smart signed a US\$100 million term loan facility supported by NEXI, of which US\$60 million was drawn on November 28, 2003 and US\$40 million on April 5, 2004. This loan is payable semi-annually over four years in eight equal installments starting May 28, 2004 with final repayment due in November 2007. The outstanding balance was fully paid in the amount of US\$25 million on May 25, 2007.

*Other Export Credit Agency Supported Loans*

PLDT has also obtained loans extended and/or guaranteed by other export credit agencies, including the Export-Import Bank of the United States, and the respective export credit agencies of France and Italy, in the aggregate outstanding principal amount of US\$1 million, or Php38 million, as at March 31, 2008. The outstanding balance under these loans will mature on various dates from April 1, 2008 to September 15, 2008.

Fixed Rate Notes

PLDT has the following non-amortizing fixed rate notes outstanding as at March 31, 2008 and December 31, 2007:

<b>Principal Amount</b>	<b>Interest Rate</b>	<b>Maturity Date</b>	<b>March 31, 2008 (Unaudited)</b>		<b>December 31, 2007 (Audited)</b>	
			(in millions)			
US\$300,000,000	8.350%	March 6, 2017	<b>US\$297</b>	<b>Php12,378</b>	US\$296	Php12,273
US\$239,900,000	11.375%	May 15, 2012	<b>235</b>	<b>9,808</b>	245	10,136
US\$135,886,000	10.500%	April 15, 2009	<b>135</b>	<b>5,658</b>	135	5,607
			<b>US\$667</b>	<b>Php27,844</b>	US\$676	Php28,016

*Consent Solicitation for the US\$175 Million 10.5% Notes due 2009, or 2009 Notes, US\$250 Million 11.375% Notes due 2012, or 2012 Notes, and US\$300 Million 8.35% Notes due 2017, or 2017 Notes*

In 2007, we conducted a consent solicitation of holders of our 11.375% Notes due 2012, 10.5% Notes due 2009 and 8.35% Notes due 2017, or the Notes, in respect of amendments to the terms of the Notes that allow PLDT greater flexibility to make certain restricted payments, pay dividends or make distributions, while reducing PLDT's permitted leverage ratios pursuant to the terms of the Notes. These amendments to the terms of the Notes became effective on December 3, 2007, the date on which PLDT made the applicable consent payments, after holders of more than 51% of the aggregate principal amount of the Notes gave their consents for these amendments to the terms of the Notes prior to the expiration of the consent solicitation period and after the execution of relevant amendments to the indentures governing the Notes on November 21, 2007.

Term Loans

*US\$283 Million Term Loan Facility, or Debt Exchange Facility*

On July 2, 2004, Smart acquired from Piltel's creditors approximately US\$289 million, or 69.4%, in the aggregate of Piltel's outstanding restructured debt at that time, in exchange for Smart debt and a cash payment by Smart. In particular, Smart paid an amount in cash of US\$1.5 million, or Php84 million and issued new debt of US\$283.2 million, or Php15,854 million, at fair value of Php8,390 million, net of debt discount amounting to Php7,464 million.

The breakdown of the total outstanding amount of Smart debt issued to participating Piltel creditors is as follows:

- 2007 Facility in the amount of US\$0.2 million which was paid in full in December 2007;
- 2008 Facility in the amount of US\$2.9 million will be payable in full in December 2008; and
- 2014 Facility in the amount of US\$280.1 million will be payable in full in June 2014.

As at March 31, 2008, outstanding balance of the 2008 Facility and the 2014 Facility amounted to US\$283 million (US\$190 million, net of unamortized debt discount of US\$93 million), or Php11,818 million (Php7,935 million, net of unamortized debt discount of Php3,883 million). The 2007 Facility was fully paid in the amount of US\$0.2 million on December 28, 2007.

Interest for the 2008 Facility and the 2014 Facility is payable every quarter at a floating rate of three months US\$ LIBOR plus 1.00% for the 2008 Facility, and a fixed rate of 2.25% per annum for the 2014 Facility. Furthermore, a portion of the 2014 Facility amounting to US\$144 million has a variable yield option whereby the creditors have an option to elect for an early repayment at a discount in December 2008 at 57.5% of the relevant debt amount.

#### *GSM Network Expansion Facilities*

On September 13, 2004, Smart signed a US\$104 million 5-year term loan facility to finance the related Phase 7 GSM equipment and services. The facility was awarded to ABN AMRO Bank, Banque National de Paribas, Calyon, DBS Bank and Sumitomo Mitsui Banking Corporation as the Lead Arrangers with Finnish Export Credit, Plc as the Lender. The full amount of the facility was drawn on November 22, 2004 at a fixed rate of 4.49%, of which US\$42 million, or Php1,737 million, remained outstanding as at March 31, 2008. The loan is payable over five years in ten equal semi-annual payments starting May 2005 with final repayment in November 2009.

On August 8, 2005, Smart signed a US\$30 million commercial facility with NIB to partly finance the related Phase 8 GSM equipment and services contracts. The facility is a 5-year term loan payable semi-annually in ten equal installments commencing six months from the first drawdown date at a floating interest rate of US\$ LIBOR plus 0.815% margin per annum. The facility was drawn in full on July 11, 2006 for the full amount of US\$30 million at a floating interest rate of 6.21% (5.40% US\$ LIBOR plus 0.815% per annum margin). The first installment payment commenced on January 11, 2007 with final repayment on July 11, 2011. The amount of US\$21 million, or Php877 million, remained outstanding as at March 31, 2008.

On August 10, 2005, Smart signed a loan facility for its GSM Phase 8 financing in the amount of US\$70 million. The facility was awarded to the Bank of Tokyo Mitsubishi Ltd., Mizuho Corporate Bank Ltd., Standard Chartered Bank and Sumitomo Mitsui Banking Corporation as the Lead Arrangers, with FEC as the Lender. Smart opted to utilize only a total of US\$67 million which was drawn on February 15, 2006 and March 13, 2006 for US\$10 million and US\$57 million, respectively. The undrawn balance of US\$3 million was cancelled. The facility is a 5-year term loan payable in 10 equal semi-annual installments with final repayment on September 1, 2010. Interest is payable semi-annually at a fixed rate of 4.515% per annum. As at March 31, 2008, US\$36 million, or Php1,526 million, remained outstanding.

On July 31, 2006, Smart signed a U.S. Dollar term loan facility for US\$44.2 million to partly finance the related Phase 9 GSM equipment and services contracts. The Lender is FEC with ABN AMRO Bank N.V., Standard Chartered Bank, Sumitomo Mitsui Banking Corporation and Mizuho Corporate Bank Ltd. as the Lead Arrangers. The facility is a 5-year term loan payable in 10 equal semi-annual installments commencing six months from the drawdown date at a commercial interest reference rate, or CIRRR, fixed rate of 4.05% per annum plus 0.65% margin. The facility was drawn on November 10, 2006 for the full amount of US\$44.2 million. The first installment commenced on January 16, 2007 with final repayment on July 15, 2011. As at March 31, 2008, US\$31 million, or Php1,292 million, remained outstanding.

On October 16, 2006, Smart signed a U.S. Dollar term loan facility with Metropolitan Bank and Trust Company to

finance the related Phase 9 GSM facility for an amount of US\$50 million. The facility is a 5-year loan payable in 18 equal and consecutive quarterly installments commencing on the third quarter from the date of the first drawdown. Interest rate is floating at three-month US\$ LIBOR plus 0.75% per annum margin. The facility was drawn on October 10, 2007 for the full amount of US\$50 million. The first installment will commence on July 10, 2008 with final repayment on October 10, 2012. As at March 31, 2008, US\$50 million, or Php2,088 million, remained outstanding.

As at March 31, 2008, the aggregate outstanding balance of these loans amounted to US\$230 million (US\$229 million, net of unamortized debt discount of US\$1 million), or Php9,608 million (Php9,567 million, net of unamortized debt discount of Php41 million).

#### *Other Term Loans*

On October 10, 2007, Smart signed a US\$50 million 5-year term loan facility to finance the related Phase 10 GSM equipment and service contracts. The facility was awarded to Norddeutsche Landesbank Girozentrale Singapore Branch (Nord/LB) as the original lender with Standard Chartered Bank (Hong Kong) Ltd. as the facility agent. The full amount of the facility was drawn on March 10, 2008. The loan is payable over five years in ten equal semi-annual payments. The first installment will commence on September 10, 2008 with final repayment on March 11, 2013. As at March 31, 2008, US\$50 million, or Php2,088 million, remained outstanding.

On July 1, 2004, CyMed availed itself of a 5-year interest-bearing advance from an officer of CyMed to fund its operating expenses, including salaries and other incidental expenses. The outstanding balance of this loan as at March 31, 2008 amounted to US\$0.6 million, or Php25 million, which is payable quarterly until July 31, 2009.

On January 15, 2008, PLDT signed a US\$100 million term loan facility agreement with Norddeutsche Landesbank Girozentrale Singapore Branch to be used for the capital expenditure requirements of PLDT. The facility was drawn on March 27 and April 10, 2008 for US\$50 million each. The loan is payable over five years in 10 equal semi-annual installments starting September 29, 2008 with final repayment due on March 27, 2013.

#### *Satellite Acquisition Loans*

Mabuhay Satellite had a credit agreement with the Export-Import Bank of the United States, or Ex-Im Bank, to finance a portion of the cost of purchasing the Agila II Satellite. In 2004, Ex-Im Bank approved, in principle, the re-profiling of Mabuhay Satellite's US\$42 million debt with them by extending the maturity of the loan by 1½ years to July 15, 2007 and reducing the interest rate by 1% to 5.6%. The revised repayment terms have been approved by the majority of the local creditor banks. On the extended maturity date, the outstanding balance was fully paid in the amount of US\$5 million, or Php236 million.

Mabuhay Satellite has an existing Omnibus Agreement with a syndicate of local banks, or the Banks, which includes issuance of irrevocable standby Letters of Credit in favor of Ex-Im Bank, as security under the above credit agreement and a term loan to Mabuhay Satellite which term loan will mature on various dates from 2007 to 2009. The irrevocable standby Letters of Credit have been cancelled after the above described full payment of the Ex-Im Bank loan. As at March 31, 2008, the outstanding amount under the term loan was US\$28 million, or Php1,154 million.

Mabuhay Satellite has constituted in favor of the Banks: (a) a first mortgage on its leasehold rights under a lease agreement entered into with the Subic Bay Metropolitan Authority and the components of the satellite system; (b) an assignment of its rights under its purchase contract for the satellite system; (c) an assignment of its rights under the transponder lease contracts to be entered into with its shareholders and other parties and the revenues therefrom; and (d) an assignment of the applicable proceeds of insurance to be taken on the satellite system.

In 2006, the Banks have approved Mabuhay's request to extend the maturity of the loan under the Omnibus Agreement by two years to October 20, 2009, with a 1% increase in the margin on the deferred amount.

#### ***Philippine Peso Debt:***

##### *Peso Fixed Rate Corporate Notes*

##### *Php5 Billion Peso Fixed Rate Corporate Notes*

On February 15, 2007, Smart issued Php5 billion unsecured fixed rate corporate notes, comprised of Series A notes amounting to Php3.8 billion and Series B notes amounting to Php1.2 billion with five and ten year terms, respectively. Series A notes were priced at 5.625%, while Series B notes were priced at 6.500%. Funds raised from the issuance of these notes have been used primarily for Smart's capital expenditures for network improvement and expansion. The amount of Php5 billion remained outstanding as at March 31, 2008.

#### *Term Loans*

##### *Unsecured Term Loans*

###### *Php2,500 Million Term Loan Facility*

On August 14, 2006, Smart signed a Philippine Peso term loan facility with Metropolitan Bank and Trust Company to finance the related Phase 9 GSM facility for an amount of Php2,500 million. The facility is a five-year loan payable in 18 equal consecutive quarterly installments commencing on the third quarter from the date of the first drawdown. Interest rate is floating at three-month MART plus 0.75% per annum margin. The facility was drawn on December 11, 2006 for the full amount of Php2,500 million at a floating interest rate of 6.02% (5.27% three-month MART1 plus 0.75% per annum margin). The first installment commenced on September 11, 2007 with final repayment on December 9, 2011. The outstanding balance of this loan as at March 31, 2008 amounted to Php2,083 million (Php2,076 million, net of unamortized debt discount of Php7 million).

###### *Php400 Million and Php20 Million Refinancing Loans*

On May 22, 2007, PLDT signed loan agreements with The Philippine American Life and General Insurance Company for Php400 million and The Philam Bond Fund, Inc. for Php20 million, respectively, to refinance their respective participations in the Ten-Year Note under the Php1,270 million Peso Fixed Rate Corporate Notes which were repaid on June 12, 2007. Interest is payable quarterly. Both refinancing loans will mature on June 12, 2014.

#### *Debt Covenants*

Our debt instruments contain restrictive covenants, including covenants that require us to comply with specified financial ratios and other financial tests, calculated in conformity with PFRS, at relevant measurement dates, principally at the end of each quarterly period. We have complied with all of our maintenance financial ratios as required under our loan covenants and other debt instruments.

The principal factors that can negatively affect our ability to comply with these financial ratios and other financial tests are depreciation of the Philippine peso relative to the U.S. dollar, poor operating performance of PLDT and its consolidated subsidiaries, impairment or similar charges in respect of investments or other long-lived assets that may be recognized by PLDT and its consolidated subsidiaries and increases in our interest expense. Interest expense may increase as a result of various factors including issuance of new debt, the refinancing of lower cost indebtedness by higher cost indebtedness, depreciation of the Philippine peso, the lowering of PLDT's credit ratings or the credit ratings of the Philippines, increase in reference interest rates, and general market conditions. Since approximately 88% of PLDT's total consolidated debts are denominated in foreign currencies, principally in U.S. dollars, many of these financial ratios and other tests are negatively affected by any weakening of the peso.

PLDT's debt instruments contain a number of other negative covenants that, subject to certain exceptions and qualifications, restrict PLDT's ability to take certain actions without lenders' approval, including: (a) incurring additional indebtedness; (b) prepaying other debt; (c) extending guarantees or assuming the obligations of other persons; (d) disposing of all or substantially all of its assets or of assets in excess of specified thresholds of its tangible net worth; (e) creating any lien or security interest; (f) permitting set-off against amounts owed to PLDT; (g) merging or consolidating with any other company; (h) entering into transactions with stockholders and affiliates; and (i) entering into sale and leaseback transactions.

Further, certain of PLDT's debt instruments contain provisions wherein PLDT may be required to repurchase or prepay certain indebtedness in case of change in control of PLDT.

PLDT's debt instruments also contain customary and other default provisions that permit the lender to accelerate amounts due or terminate their commitments to extend additional funds under the debt instruments. These default provisions include: (a) cross-defaults and cross-accelerations that permit a lender to declare a default if PLDT is in default under another debt instrument; in some cases, the cross-default provision is triggered upon a payment or other default permitting the acceleration of PLDT's debt, whether or not the defaulted debt is accelerated. In other cases, the cross-default provision requires the defaulted loan to be accelerated. In some debt instruments, the cross-default provision will be triggered only if the principal amount of the defaulted indebtedness exceeds a threshold amount specified in these debt instruments; (b) failure by PLDT to meet certain financial ratio covenants referred to above; (c) the occurrence of any material adverse change in circumstances that a lender reasonably believes materially impairs PLDT's ability to perform its obligations under its debt instrument with the lender; (d) the revocation, termination or amendment of any of the permits or franchises of PLDT in any manner unacceptable to the lender; (e) the abandonment, termination or amendment of the project financed by a loan in a manner unacceptable to the lender; (f) the nationalization or sustained discontinuance of all or a substantial portion of PLDT's business; and (g) other typical events of default, including the commencement of bankruptcy, insolvency, liquidation or winding up proceedings by PLDT.

Smart's debt instruments contain certain restrictive covenants that require Smart to comply with specified financial ratios and other financial tests at semi-annual measurement dates. The financial tests under Smart's loan agreements include compliance with a consolidated debt to consolidated equity ratio of not more than 1.5:1.0, a consolidated debt to consolidated EBITDA ratio of not more than 3:1 and a debt service coverage ratio of not less than 1.5:1.0. As at March 31, 2008, Smart has maintained compliance with all of its financial covenants. The agreements also contain customary and other default provisions that permit the lender to accelerate amounts due under the loans or terminate their commitments to extend additional funds under the loans. These default provisions include: (a) cross-defaults and cross-accelerations that permit a lender to declare a default if Smart is in default under another loan agreement. These cross-default provisions are triggered upon a payment or other default permitting the acceleration of Smart debt, whether or not the defaulted debt is accelerated; (b) failure by Smart to comply with certain financial ratio covenants; and (c) the occurrence of any material adverse change in circumstances that the lender reasonably believes materially impairs Smart's ability to perform its obligations or impair guarantors' ability to perform their obligations under its loan agreements.

The Omnibus Agreement of Mabuhay Satellite imposes several negative covenants which, among other things, restrict material changes in Mabuhay Satellite's nature of business and ownership structure, any lien upon or with respect to any of its assets or to any right to receive income, acquisition of capital stock, declaration and payment of dividends, merger, consolidation and sale with another entity and incurring or guaranteeing additional long-term debt beyond prescribed amounts.

As at March 31, 2008, we are in compliance with all of our debt covenants.

### **Obligations Under Finance Lease**

The future minimum payments for finance leases as at March 31, 2008 are as follows:

<b>Year</b>	<b>(in million pesos)</b>
2008	630
2009	16
Total minimum lease payments (Note 24)	646
Less amount representing interest	442
Present value of net minimum lease payments (Note 3)	204
Less obligations under finance lease maturing within one year (Notes 8 and 26)	12
Long-term portion of obligations under finance lease (Notes 8 and 26)	192

### *Municipal Telephone Projects*

PLDT has an existing lease agreement (the "Financial Lease Agreement, or FLA") with the Philippine Department of Transportation and Communications, or DOTC, covering telecommunications facilities in the province of Batangas established under the Municipal Telephone Act. Under this FLA, PLDT was granted the exclusive right to provide telecommunications management services, to expand telecommunications services, and to promote the

use of the DOTC-contracted facilities in certain covered areas for a period of 15 years. Title to the telecommunications facilities/properties shall be transferred to PLDT upon expiration of the lease term. As at March 31, 2008, PLDT's aggregate remaining obligation under the Batangas lease agreement was approximately Php123 million. In case of cancellation, PLDT is liable to pay Php100 million under the FLA as liquidated damages.

Piltel entered into an agreement for the financial lease of the Palawan Telecommunications System of the Municipal Telephone Public Office with the DOTC on September 3, 1994. The Municipal Telephone Public Office Contract is a 30-year contract for Piltel to lease facilities for public call office stations in the Palawan area, with revenues going to Piltel. In consideration, Piltel pays the DOTC an escalating annual lease fee. The total lease payment for 30 years is Php483 million. As at March 31, 2008, Piltel's aggregate remaining obligation under this agreement was approximately Php43 million.

#### *Other Long-term Finance Lease Obligations*

The PLDT Group has various long-term lease contracts for a period of three years covering various office equipment. In particular, PLDT, Smart and ePLDT have finance lease obligations in the aggregate amount of Php480 million as at March 31, 2008 in respect of office equipment.

Under the terms of certain loan agreements and other debt instruments, PLDT may not create, incur, assume or permit or suffer to exist any mortgage, pledge, lien or other encumbrance or security interest over the whole or any part of its assets or revenues or suffer to exist any obligation as lessee for the rental or hire of real or personal property in connection with any sale and leaseback transaction.

#### **Preferred Stock Subject to Mandatory Redemption**

The movements of PLDT's preferred stock subject to mandatory redemption for March 31, 2008 and December 31, 2007 are as follows:

	March 31, 2008 (Unaudited)			December 31, 2007 (Audited)		
	Series V	Series VI	Total	Series V	Series VI	Total
	(in million pesos)					
Balance at beginning of period	49	966	1,015	61	1,308	1,369
Accretion	2	25	27	10	131	141
Conversion	(6)	(384)	(390)	(22)	(291)	(313)
Revaluation	–	–	–	–	(182)	(182)
Balance at end of period (Notes 24 and 26)	45	607	652	49	966	1,015

PLDT had issued 3 million shares of Series V Convertible Preferred Stock, 5 million shares of Series VI Convertible Preferred Stock and 4 million shares of Series VII Convertible Preferred Stock in exchange for a total of 58 million shares of Series K Class I Convertible Preferred Stock of Piltel, pursuant to the debt restructuring plan of Piltel adopted in June 2001. As discussed below, as at December 31, 2006, all shares of Series VII Convertible Preferred Stock had been converted. Shares of Series V and VI Convertible Preferred Stock are entitled to receive annual dividends of Php18.70 per share and US\$0.397 per share, respectively. Each share of Series V and VI Convertible Preferred Stock is convertible at any time at the option of the holder into one share of PLDT's common stock. Shares of Series V and Series VI Convertible Preferred Stock which are outstanding on the seventh anniversary of the issue date thereof, will be mandatorily converted into shares of PLDT's common stock on the date immediately following such anniversary date. Under a put option exercisable for 30 days following the mandatory conversion, holders of shares of PLDT's common stock received on mandatory conversion of the shares of Series V and VI Convertible Preferred Stock, will be able to require PLDT to purchase such shares of PLDT's common stock for Php1,700 per share and US\$36.132 per share, respectively.

The Series V Convertible Preferred Stock was designated as a compound instrument consisting of liability and equity components. The fair value of the Series V Convertible Preferred Stock was determined on the issue date, of which the fair value of the liability component as at date of issuance is recorded as "Preferred Stock Subject to Mandatory Redemption" and is included under the "Interest-bearing Financial Liabilities" account in the unaudited consolidated balance sheets. The residual amount was assigned as the equity component.

The cost of each foreign currency component of the Series VI and VII Convertible Preferred Stock was designated as a debt instrument with embedded call options. The fair value of the Series VI and VII Convertible Preferred Stock was determined on the issue date, of which the fair value of embedded call options was bifurcated and accounted for separately. See *Note 2 – Summary of Significant Accounting Policies and Practices* and *Note 26 – Financial Assets and Liabilities*. The residual amount was assigned as a liability component and recorded as “Preferred Stock Subject to Mandatory Redemption” and is included under the “Interest-bearing Financial Liabilities” account in the unaudited consolidated balance sheets.

The difference between the amount designated as liability components of the Series V, VI and VII Convertible Preferred Stock at issue date and the aggregate redemption value is accreted over the period up to the put option date using the effective interest rate method. Accretions added to Preferred Stock Subject to Mandatory Redemption and charged to interest as at March 31, 2008 and 2007 amounted to Php27 million and Php141 million, respectively.

Preferred Stock Subject to Mandatory Redemption amounted to Php652 million and Php1,015 million as at March 31, 2008 and December 31, 2007, respectively, after revaluation of Series VI and VII Convertible Preferred Stock to the exchange rates at balance sheet dates and after giving effect to the above accretions, conversions and additional issuances. As at March 31, 2008 and December 31, 2007, 11,420,326 shares and 11,147,451 shares, respectively, of the Series V and VI Convertible Preferred Stock had been voluntarily converted into PLDT common shares. On August 18, 2006, all of the 3,842,000 shares of the Series VII Convertible Preferred Stock had been voluntarily converted into shares of PLDT’s common stock. As at March 31, 2008, 27,303 shares of the Series V and 410,915 shares of the Series VI Convertible Preferred Stock remained outstanding. On March 4, 2008, PLDT issued a notice to the effect that all of the Series V and VI Convertible Preferred Stock originally issued on June 4, 2001 and outstanding as at June 4, 2008 will be mandatorily converted on June 5, 2008 to shares of PLDT’s common stock. The aggregate redemption value of the outstanding shares of the Series V and VI Convertible Preferred Stock amounted to Php666 million and Php1,070 million as at March 31, 2008 and December 31, 2007, respectively. See *Note 24 – Contractual Obligations and Commercial Commitments*.

The corresponding dividends on these shares charged as interest expense amounted to Php2 million and Php5 million for the three months ended March 31, 2008 and 2007, respectively. See *Note 5 – Income and Expenses*.

### **Notes Payable**

In 2006, SPi obtained unsecured dollar-denominated short-term notes payable from various local commercial banks amounting to US\$4.09 million. In 2008 and 2007, additional short-term unsecured dollar-denominated notes payable were obtained from various banks totaling US\$3.1 million and US\$4.8 million, respectively. Interest on the notes range from 4.8% to 6.4% of the outstanding balance per annum and the notes are payable within 90 to 360 days from the availment date. The outstanding balance of US\$12 million, or Php490 million, as at March 31, 2008 will mature on various dates from May 26, 2008 to December 8, 2008.

In 2006, CyMed obtained two-year interest-bearing notes payable amounting to US\$3.4 million from its previous shareholders. Interest on the notes payable is 6.2% per annum. The outstanding balance of US\$2 million, or Php68 million, as at March 31, 2008 will mature in August 2008.

On June 1, 2007, SPi America LLC obtained short-term interest-bearing notes payable amounting to US\$0.5 million, or Php22 million, in payment for software license. The loan is payable within one year in four equal quarterly payments of principal and interest which commenced on September 1, 2007. Interest on the loan is 5% per annum. The outstanding balance of US\$0.01 million, or Php5 million, as at March 31, 2008 will mature on June 1, 2008.

---

## 19. Deferred Credits and Other Noncurrent Liabilities

This account consists of:

	<b>March 31, 2008</b>	December 31, 2007
	<b>(Unaudited)</b>	(Audited)
	(in million pesos)	
Accrual of capital expenditures under long-term financing	<b>6,952</b>	7,554
Liabilities on asset retirement obligations (Notes 3 and 8)	<b>990</b>	952

	<b>23,001</b>	21,674

Unearned revenues represent advance payments for leased lines, installation fees, monthly service fees and unused and/or unexpired portion of prepaid loads.

---

## 22. Related Party Transactions

### a. Air Time Purchase Agreement between PLDT and AIL and Related Agreements

Under the Founder NSP Air Time Purchase Agreement, or ATPA, entered into with AIL in March 1997, which was amended in December 1998 (as amended, the “Original ATPA”), PLDT was granted the exclusive right to sell AIL services as national service provider, or NSP, in the Philippines. In exchange, the Original ATPA required PLDT to purchase from AIL a minimum of US\$5 million worth of air time (the “Minimum Air Time Purchase Obligation”) annually over ten years commencing on January 1, 2002 (the “Minimum Purchase Period”), the purported date of commercial operations of the Garuda I Satellite. In the event that AIL’s aggregate billed revenue was less than US\$45 million in any given year, the Original ATPA also required PLDT to make supplemental air time purchase payments not to exceed US\$15 million per year during the Minimum Purchase Period (the “Supplemental Air Time Purchase Obligation”).

On February 1, 2007, the parties to the Original ATPA entered into an amendment to the Original ATPA on substantially the terms attached to the Banks Terms Sheet (the “Amended ATPA”). Under the Amended ATPA, the Minimum Air Time Purchase Obligation was amended and replaced in its entirety with an obligation of PLDT (the “Amended Minimum Air Time Purchase Obligation”) to purchase from AIL a minimum of US\$500,000 worth of air time annually over a period ending upon the earlier of (i) the expiration of the Minimum Purchase Period and (ii) the date on which all indebtedness incurred by AIL to finance the AIL System is repaid. Furthermore, the Amended ATPA unconditionally released PLDT from any obligations arising out of or in connection with the Original ATPA prior to the date of the Amended ATPA, except for obligations to pay for billable units used prior to such date. Moreover, pursuant to a letter of confirmation, dated February 1, 2007, the banks released and discharged PLDT and ACeS Philippines and their respective subsidiaries from any and all obligations and liabilities under the Original ATPA and related agreements.

Moreover, in accordance with the above contractual arrangements, ACeS Philippines acquired (i) from LMGT Holdings (ACeS), Inc., or LMGT, 50% of its equity interest in AIL for a consideration of US\$0.75 million pursuant to a sale and purchase agreement entered into on February 1, 2007 and (ii) from Tera Global Investment Ltd., or TGIL, for a nominal consideration, 50% of TGIL’s interest in a promissory note issued by AIL, which 50% interest represents an aggregate amount of US\$44 million, or the Transferred AIL Note, together with related security interests pursuant to a sale agreement entered into on February 1, 2007. Immediately thereafter, a portion of the Transferred AIL Note was converted into shares of AIL and the balance was converted into non-interest bearing convertible bonds of AIL. As a result of these transactions, ACeS Philippines’ equity holdings in AIL increased from 20% in 2006 to 36.99% as at the date of this report.

Total fees under the Amended ATPA amounted to Php36 million and Php44 million for the three months ended March 31, 2008 and 2007, respectively. The Amended ATPA no longer qualifies as an onerous contract under the provision of PAS 10, “Events After the Balance Sheet Date”, since the cost of meeting the obligations under the Amended ATPA is below or within the estimated benefits that PLDT is expected to receive by it. Net provisions for onerous contract amounting to US\$72 million, or Php3,529 million, were reversed on December 31, 2006, excluding the amount paid or to be paid in relation to the Amended ATPA. As a result, as at March 31, 2008 and December 31, 2007, outstanding obligations of PLDT under the Amended ATPA amounted to Php81 million and Php93 million, respectively.

### b. Transactions with Major Stockholders, Directors and Officers

Material transactions to which PLDT or any of its subsidiaries is a party, in which a director, key officer or owner of more than 10% of the outstanding common stock of PLDT, or any member of the immediate family of a director, key officer or owner of more than 10% of the outstanding common stock of PLDT had a direct or indirect material interest, as at March 31, 2008 (unaudited) and December 31, 2007 (audited) and for the three months ended March 31, 2008 and 2007 (unaudited) are as follows:

1. *Cooperation Agreement with First Pacific and certain affiliates, or the FP Parties, NTT Communications and NTT DoCoMo*

In connection with the transfer by NTT Communications of approximately 12.6 million shares of PLDT's common stock to NTT DoCoMo pursuant to a Stock Sale and Purchase Agreement dated January 31, 2006 between NTT Communications and NTT DoCoMo, the FP Parties, NTT Communications and NTT DoCoMo entered into a Cooperation Agreement, dated January 31, 2006. Under the Cooperation Agreement, the relevant parties extended certain rights of NTT Communications under the Stock Purchase and Strategic Investment Agreement dated September 28, 1999, as amended, and the Shareholders Agreement dated March 24, 2000, to NTT DoCoMo, including:

- certain contractual veto rights over a number of major decisions or transactions; and
- rights relating to the representation on the board of directors of PLDT and Smart, respectively, and any committees thereof.

Moreover, key provisions of the Cooperation Agreement pertain to, among other things:

- *Restriction on Ownership of Shares of PLDT by NTT Communications and NTT DoCoMo.* Each of NTT Communications and NTT DoCoMo has agreed not to beneficially own, directly or indirectly, in the aggregate with their respective subsidiaries and affiliates, more than 21% of the issued and outstanding shares of PLDT's common stock. If such event does occur, the FP Parties, as long as they own in the aggregate not less than 21% of the issued and outstanding shares of PLDT's common stock, have the right to terminate their respective rights and obligations under the Cooperation Agreement, the Shareholders Agreement and the Stock Purchase and Strategic Investment Agreement.
- *Limitation on Competition.* NTT Communications, NTT DoCoMo and their respective subsidiaries are prohibited from investing in excess of certain thresholds in businesses competing with PLDT in respect of customers principally located in the Philippines and from using their assets in the Philippines in such businesses. Moreover, if PLDT, Smart or any of Smart's subsidiaries intends to enter into any contractual arrangement relating to certain competing businesses, PLDT is required to provide, or to use reasonable efforts to procure that Smart or any of Smart's subsidiaries provide, NTT Communications and NTT DoCoMo with the same opportunity to enter into such agreement with PLDT or Smart or Smart's subsidiaries, as the case may be.
- *Business Cooperation.* PLDT and NTT DoCoMo agreed in principle to collaborate with each other on the business development, roll-out and use of a wireless-code division multiple access mobile communication network. In addition, PLDT agreed, to the extent of the power conferred by its direct or indirect shareholding in Smart, to procure that Smart will (i) become a member of a strategic alliance group for international roaming and corporate sales and services and (ii) enter into a business relationship concerning preferred roaming and inter-operator tariff discounts with NTT DoCoMo.
- *Additional Rights of NTT DoCoMo.* Pursuant to amendments effected by the Cooperation Agreement to the Strategic Agreement and the Shareholders Agreement, upon NTT Communications and NTT DoCoMo and their respective subsidiaries owning in the aggregate 20% or more of PLDT's shares of common stock and for as long as they continue to own in the aggregate at least 17.5% of PLDT's shares of common stock then outstanding, NTT DoCoMo has additional rights under the Strategic Agreement and Shareholders Agreement, including that:
  1. NTT DoCoMo is entitled to nominate one additional NTT DoCoMo nominee to the board of directors of each PLDT and Smart;

2. PLDT must consult NTT DoCoMo no later than 30 days prior to the first submission to the board of PLDT or certain of its committees of any proposal of investment in an entity that would primarily engage in a business that would be in direct competition or substantially the same business opportunities, customer base, products or services with business carried on by NTT DoCoMo, or which NTT DoCoMo has announced publicly an intention to carry on;
3. PLDT must procure that Smart does not cease to carry on its business, dispose of all of its assets, issue common shares, merge or consolidate, or effect winding up or liquidation without PLDT first consulting with NTT DoCoMo no later than 30 days prior to the first submission to the board of PLDT or Smart, or certain of its committees; and
4. PLDT must first consult with NTT DoCoMo no later than 30 days prior to the first submission to the board of PLDT or certain of its committees for the approval of any transfer by any member of the PLDT Group of Smart common capital stock to any person who is not a member of the PLDT Group.

As at March 31, 2008, NTT Communications and NTT DoCoMo together beneficially owned 20.86% of the outstanding shares of PLDT's common stock.

- *Change in Control.* Each of NTT Communications, NTT DoCoMo and the FP Parties agreed that to the extent permissible under applicable laws and regulations of the Philippines and other jurisdictions, subject to certain conditions, to cast its vote as a shareholder in support of any resolution proposed by the board of directors of PLDT for the purpose of safeguarding PLDT from any Hostile Transferee. A "*Hostile Transferee*" is defined under the Cooperation Agreement to mean any person (other than NTT Communications, NTT DoCoMo, First Pacific or any of their respective affiliates) determined to be so by the PLDT board of directors and includes, without limitation, a person who announces an intention to acquire, seeking to acquire or acquires 30% or more of PLDT common shares then issued and outstanding from time-to-time or having (by itself or together with itself) acquired 30% or more of the PLDT common shares announces an intention to acquire, seeking to acquire or acquires a further 2% of such PLDT common shares: (a) at a price per share which is less than the fair market value as determined by the board of directors of PLDT as advised by a professional financial advisor; (b) which is subject to conditions which are subjective or which could not reasonably be satisfied; (c) without making an offer for all PLDT common shares not held by it and/or its affiliates and/or persons who, pursuant to an agreement or understanding (whether formal or informal), actively cooperate to obtain or consolidate control over PLDT; (d) whose offer for the PLDT common shares is unlikely to succeed or (e) whose intention is otherwise not *bona fide*; provided that, no person will be deemed a Hostile Transferee unless prior to making such determination, the board of directors of PLDT has used reasonable efforts to discuss with NTT Communications and NTT DoCoMo in good faith whether such person should be considered a Hostile Transferee.
- *Termination.* If NTT Communications, NTT DoCoMo or their respective subsidiaries cease to own, in the aggregate, full legal and beneficial title to at least 10% of the shares of PLDT's common stock then issued and outstanding, their respective rights and obligations under the Cooperation Agreement and the Shareholders Agreement will terminate and the Strategic Arrangements (as defined in the Stock Purchase and Strategic Investment Agreement) will terminate. If the FP Parties and their respective subsidiaries cease to have, directly or indirectly, effective voting power in respect of shares of PLDT's common stock representing at least 18.5% of the shares of PLDT's common stock then issued and outstanding, their respective rights and obligations under the Cooperation Agreement, the Stock Purchase and Strategic Investment Agreement, and the Shareholders Agreement will terminate.

2. *Integrated i-mode Services Package Agreement between NTT DoCoMo and Smart*

An Integrated i-mode Services Package Agreement was entered into by Smart and NTT DoCoMo on February 15, 2006, under which NTT DoCoMo agreed to grant Smart, on an exclusive basis within the territory of the Philippines for a period of five years, an integrated i-mode services package including a non-transferable license to use the licensed materials and the i-mode brand, as well as implementation support and assistance and post-commercial launch support from NTT DoCoMo. Pursuant to this agreement, Smart is required to pay an initial license fee and running royalty fees based on the revenue arising from i-mode subscription fees and data traffic. Total royalty fees charged to operations under this agreement amounted to Php41 million and Php88 million for the three months ended March 31, 2008, respectively. Smart has no outstanding obligation under this agreement as at March 31, 2008 and December 31, 2007.

3. *Advisory Services Agreement between NTT DoCoMo and PLDT*

An Advisory Services Agreement was entered into by NTT DoCoMo and PLDT on June 5, 2006, in accordance with the Cooperation Agreement dated January 31, 2006. Pursuant to the Advisory Services Agreement, NTT DoCoMo will provide the services of certain key personnel in connection with certain aspects of the business of PLDT and Smart. Also, said agreement governs the terms and conditions of the appointments of such key personnel and the corresponding fees related thereto. Total fees under this agreement amounted to Php17 million and Php19 million for the three months ended March 31, 2008 and 2007, respectively. Outstanding liability under this agreement amounted to Php17 million and Php12 million as at March 31, 2008 and December 31, 2007, respectively.

4. *Other Agreements with NTT Communications and/or its Affiliates*

PLDT is a party to the following agreements with NTT Communications and/or its affiliates:

- *Advisory Services Agreement.* On March 24, 2000, PLDT entered into an agreement with NTT Communications, as amended on March 31, 2003, March 31, 2005 and June 16, 2006, under which NTT Communications provides PLDT with technical, marketing and other consulting services for various business areas of PLDT starting April 1, 2000;
- *Arcstar Licensing Agreement and Arcstar Service Provider Agreement.* On March 24, 2000, PLDT entered into an agreement with NTT Worldwide Telecommunications Corporation under which PLDT markets managed data and other services under NTT Communications' "Arcstar" brand to its corporate customers in the Philippines. PLDT also entered into a Trade Name and Trademark Agreement with NTT Communications under which PLDT has been given the right to use the tradename "Arcstar" and its related trademark, logo and symbols, solely for the purpose of PLDT's marketing, promotional and sales activities for the Arcstar services within the Philippines; and
- *Conventional International Telecommunications Services Agreement.* On March 24, 2000, PLDT entered into an agreement with NTT Communications under which PLDT and NTT Communications agreed to cooperative arrangements for conventional international telecommunications services to enhance their respective international businesses.

Total fees under these agreements amounted to Php25 million and Php37 million for the three months ended March 31, 2008 and 2007, respectively. As at March 31, 2008 and December 31, 2007, outstanding obligations of PLDT under these agreements amounted to Php20 million and Php16 million, respectively.

5. *Agreements between Smart and Asia Link B.V., or ALBV.* Smart has an existing Technical Assistance Agreement with ALBV, a subsidiary of the First Pacific Group. ALBV provides technical support services and assistance in the operations and maintenance of Smart's cellular business. The agreement, which is effective until February 23, 2012 and is subject to renewal upon mutual agreement of the parties, provides for payment of technical service fees equivalent to 1% of the consolidated net revenues of Smart. Total service fees charged to operations under this agreement amounted to Php160 million and Php165 million for the three months ended March 31, 2008 and 2007, respectively. As at March 31, 2008 and December 31, 2007, Smart had advanced the payment of service fees to ALBV amounting to Php11 million and Php87 million, respectively.

6. *Agreements Relating to Insurance Companies.* Gotuaco del Rosario and Associates, or Gotuaco, acts as the broker for certain insurance companies to cover certain insurable properties of the PLDT Group. Insurance premiums are remitted to Gotuaco and the broker's fees are settled between Gotuaco and the insurance companies. In addition, PLDT has an insurance policy with Malayan Insurance Co., Inc., or Malayan, wherein premiums are directly paid to Malayan. Total insurance expenses under these agreements amounted to Php123 million and Php119 million for the three months ended March 31, 2008 and 2007, respectively. Two directors of PLDT have direct/indirect interests in or serve as a director/officer of Gotuaco and Malayan, respectively.

### ***Compensation of Key Officers of the PLDT Group***

PLDT Group's compensation of key officers by benefit type follows:

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>
	(Unaudited)	
	(in million pesos)	
Short-term employee benefits	<b>353</b>	306
Post-employment benefits (Note 23)	<b>6</b>	19
Share-based payments (Note 23)	<b>(15)</b>	51
	<b>344</b>	376

Each of the directors, including the members of the advisory board of PLDT, is entitled to a director's fee in the amount of Php125,000 for each meeting of the board attended. Each of the members or advisors of the audit, executive compensation, governance and nomination and technology strategy committees is entitled to a fee in the amount of Php50,000 for each committee meeting attended.

There are no agreements between PLDT Group and any of its key management personnel providing for benefits upon termination of employment, except for such benefits to which they may be entitled under PLDT Group's retirement and incentive plans.

## **23. Share-based Payments and Employee Benefits**

### ***Executive Stock Option Plan, or ESOP***

On April 27, 1999 and December 10, 1999, the board of directors and stockholders, respectively, approved the establishment of an ESOP and the amendment of the Seventh Article of the Articles of Incorporation of PLDT denying the pre-emptive right of holders of common stock to subscribe for any issue of up to 1,289,745 common stock pursuant to the ESOP. The ESOP covers management executives, which include officers with rank of Vice President up to the President, executives with the rank of Manager up to Assistant Vice President, and advisors/consultants engaged by PLDT. The ESOP seeks to motivate option holders to achieve PLDT's goals, reward option holders for the creation of shareholder value, align the option holders' interests with those of the stockholders of PLDT, and retain the option holders to serve the long-term interests of PLDT. The ESOP is administered by the Executive Compensation Committee of the board of directors. About 1.3 million shares of common stock of PLDT were reserved as underlying option shares under the ESOP in 1999.

Movements in the number of stock options outstanding under the ESOP are as follows:

	<b>March 31,</b>	December 31,
	<b>2008</b>	2007
	(Unaudited)	(Audited)
Balance at beginning of period	<b>26,758</b>	119,034
Exercised shares*	<b>(8,017)</b>	(92,276)
Balance at end of period	<b>18,741</b>	26,758

\* Based on the date of payment of exercised shares.

As at March 31, 2008, a total of 851,109 shares were acquired by certain officers and executives who exercised their options, at an exercise price of Php814 per share.

The fair value of the ESOP was estimated at the date of grant using an option pricing model, which considered annual stock volatility, risk-free interest rate, expected life of the option, exercise price of Php814 per share, and a weighted average price of Php870 and Php315 per share for the 1999 and 2002 grants, respectively, as at valuation date. Total fair value of shares granted amounted to Php359 million as at March 31, 2008 and December 31, 2007. No fair value of share options were recognized as an expense for the three months ended March 31, 2008 and 2007.

### ***LTIP***

On August 3, 2004, PLDT's board of directors approved the establishment of a Long-term Incentive Plan, or Original LTIP, for eligible key executive officers and advisors of PLDT and its subsidiaries, which is administered by the Executive Compensation Committee. The Original LTIP was a four-year cash-settled share-based plan covering the period from January 1, 2004 to December 31, 2007, or the Performance Cycle. The payment was intended to be made at the end of the Performance Cycle (without interim payments) and contingent upon the achievement of an approved target increase in PLDT's common share price by the end of the Performance Cycle and a cumulative consolidated net income target for the Performance Cycle.

On August 28, 2006, PLDT's board of directors approved, in principle, the broad outline of the PLDT Group's strategic plans for 2007 to 2009 focusing on the development of new revenue streams to drive future growth while protecting the existing core communications business. To ensure the proper execution of the three-year plan, particularly with respect to the manpower resources being committed to such plans, a new LTIP, or New LTIP, upon endorsement of the Executive Compensation Committee, was approved by the board of directors to cover the period from January 1, 2007 to December 31, 2009, or New Performance Cycle. As a result of the establishment of the New LTIP, the Board also approved the early vesting of the Original LTIP by the end of 2006 for those of its participants who were invited and chose to join the New LTIP. Participants in the Original LTIP who were not invited to join the New LTIP, or who were invited but chose not to join, remained subject to the Original LTIP and its original vesting schedule.

The total number of SARs outstanding under the Original LTIP as at March 31, 2008 was 17,445 which is expected to be paid in May 2008. The total number of SARs awarded under the New LTIP as at March 31, 2008 was 4,316,260, which will be paid in 2010 subject to the achievement of the targets specified in the New LTIP.

The fair value of the New LTIP was estimated using an option pricing model, which considered annual stock volatility, risk-free interest rates, dividends yield, the remaining life of options and the share price capped at Php2,300 and share price of Php2,815 as at March 31, 2008. Incentive cost per share as at March 31, 2008 and 2007 for the New LTIP amounted to Php786.15 and Php785.95, respectively. The fair value of the LTIP recognized as an income for the three months ended March 31, 2008 amounted to Php77 million and the fair value of the LTIP recognized as an expense for the three months ended March 31, 2007 amounted to Php260 million. As at March 31, 2008 and December 31, 2007, outstanding LTIP liability amounted to Php1,417 million and Php1,494 million, respectively. See *Note 3 – Management's Use of Judgments, Estimates and Assumptions* and *Note 5 – Income and Expenses*.

### ***Pension***

#### ***Defined Benefit Pension Plans***

We have defined benefit pension plans, covering substantially our permanent and regular employees, excluding those of Smart and its subsidiary, I-Contacts, which require contributions to be made to separate administrative funds.

Our actuarial valuation is done on an annual basis. Based on the latest actuarial valuation, the actual present value of accrued liabilities, net pension cost and average assumptions used in developing the valuation are as follows:

	(in million pesos)
Benefit obligation as at December 31, 2007	10,160
Fair value of plan assets as at December 31, 2007	8,519
Funded status	1,641
Unrecognized net actuarial gain	1,344
Accrued benefit cost as at December 31, 2007 (Audited)	2,985
Accrual of pension cost during the period	137
Contributions	(101)
Accrued benefit cost as at March 31, 2008 (Unaudited)	3,021

Net pension cost was computed as follows:

	Three Months Ended March 31,	
	2008	2007
	(Unaudited)	
	(in million pesos)	
Components of net periodic benefit cost:		
Interest cost	208	267
Current service cost	150	215
Amortizations of unrecognized net actuarial loss	(5)	-
Expected return on plan assets	(216)	(151)
Amortizations of unrecognized net transition obligation	-	37
Net periodic benefit cost	137	368

The weighted average assumptions used to determine pension benefits as at March 31, 2008 and December 31, 2007 are as follows:

Average remaining working years of covered employee	21
Expected rate of return on plan assets	10%
Discount rate	8%
Rate of increase in compensation	7%

We have adopted mortality rates in accordance with the 1983 Group Annuity Mortality Table developed by the U.S. Society of Actuaries, which provides separate rates for males and females.

As at March 31, 2008 and December 31, 2007, the assets of the beneficial trust fund established for PLDT's pension plan include investments in shares of stocks of PLDT and Piltel with total fair values aggregating Php2,404 million and Php2,651 million, respectively, which represent about 29% and 31%, respectively, of such beneficial trust fund's net assets available for plan benefits.

The Board of Trustees of the beneficial trust fund uses an investment approach of mixed equity and fixed income investments to maximize the long-term expected return of plan assets. The investment portfolio has been structured to achieve the objective of regular income with capital growth and out-performance of benchmarks. A majority of the investment portfolio consists of fixed income debt securities and various equity securities, while the remaining portion consists of multi-currency investments.

The allocation of the fair value of the beneficial trust fund's assets for the PLDT pension plan follows:

	March 31, 2008 (Unaudited)	December 31, 2006 (Audited)
Investments in equity securities	56%	60%
Investments in debt and fixed income securities	22%	21%
Investments in real estate	8%	8%
Investments in temporary placements	8%	5%
Investments in mutual funds	6%	6%
	100%	100%

Based on the latest actuarial valuation report, the recommended cash contributions of PLDT to its pension plan in 2008 amounts to approximately Php311 million.

*Defined Contribution Plan*

Smart and I-Contacts contributions to the plan are made based on the employee's years of tenure and range from 5% to 10% of the employee's monthly salary. Additionally, an employee has an option to make a personal contribution to the fund, at an amount not exceeding 10% of his monthly salary. The employer then provides an additional contribution to the fund ranging from 10% to 50% of the employee's contribution based on the latter's years of tenure. Although the plan has a defined contribution format, Smart and I-Contacts regularly monitor compliance with R.A. 7641, otherwise known as "The Retirement Pay Law". As at March 31, 2008 and December 31, 2007, Smart and I-Contacts were in compliance with the requirements of R.A. 7641.

The plan's investment portfolio seeks to achieve regular income and long-term capital growth and consistent performance over its own portfolio benchmark. In order to attain this objective, the trustee's mandate is to invest in a diversified portfolio of bonds and equities, both domestic and international. The portfolio mix is kept at 60% to 90% for debt and fixed income securities while 10% to 40% is allotted to equity securities.

The allocation of the fair value of plan assets for Smart as at March 31, 2008 (unaudited) and as at December 31, 2007 (audited) follows:

Investments in debt and fixed income securities	57%
Investments in equity securities	35%
Others	8%
	100%

Total cash contributions to the pension plan for the three months ended March 31, 2008 and 2007 amounted to Php34 million and Php29 million, respectively, of which Php1 million are contributions to the defined contribution plans for key management personnel for both periods.

Smart and I-Contacts currently expect to make approximately Php143 million of cash contributions to their pension plans in 2008.

*Pension Benefit Cost*

Total pension benefit cost follows:

	<b>Three Months Ended March 31,</b>	
	<b>2008</b>	<b>2007</b>
	(Unaudited)	
	(in million pesos)	
Expense recognized for defined benefit plans	<b>137</b>	368
Expense recognized for defined contribution plans	<b>38</b>	30
<b>Total (Notes 3 and 5)</b>	<b>175</b>	398

## 24. Contractual Obligations and Commercial Commitments

### Contractual Obligations

The following table discloses our consolidated contractual undiscounted obligations outstanding as at March 31, 2008 and December 31, 2007:

	Payments Due by Period				
	Total	Less than 1 year	1–3 years	3–5 Years	More than 5 years
(in million pesos)					
<b>March 31, 2008 (Unaudited)</b>					
<i>Long-term debt</i> <sup>(1)</sup> :	87,887	11,709	23,494	22,050	30,634
Principal	67,286	7,428	16,873	17,189	25,796

<sup>(3)</sup> Gross liabilities before any offsetting application.

### Long-term Debt

See Note 18 – Interest-bearing Financial Liabilities for a detailed discussion of our long-term debt.

### *Operating Lease Obligations*

*Digital Passage Service Contracts.* PLDT has existing Digital Passage Service Contracts with foreign telecommunication administrations for several dedicated circuits to various destinations for 10 to 25 years expiring at various dates. As at March 31, 2008 and December 31, 2007, PLDT's aggregate remaining obligation under these contracts amounted to approximately Php3 million.

*License Agreement with Mobius Management Systems (Australia) Pty Ltd., or Mobius.* PLDT entered into a license agreement with Mobius pursuant to which Mobius has granted PLDT a non-exclusive, non-assignable and non-transferable license for the use of computer software components. Under this agreement, PLDT may purchase maintenance services for a fee of 15% of the current published license fee. As at March 31, 2008 and December 31, 2007, PLDT's aggregate remaining obligation under this agreement was approximately Php5 million and Php15 million, respectively.

*Other Operating Lease Obligations.* The PLDT Group has various lease contracts for periods ranging from one to ten years covering certain offices, warehouses, cell sites telecommunication equipment locations and various office equipment amounting to Php4,757 million and Php5,596 as at March 31, 2008 and December 31, 2007, respectively.

### *Finance Lease Obligations*

See *Note 18 – Interest-bearing Financial Liabilities* for the detailed discussion of our long-term finance lease obligations.

### *Unconditional Purchase Obligations*

See *Note 22 – Related Party Transactions* for a detailed discussion of PLDT's obligation under the Original ATPA and the Amended ATPA.

As at March 31, 2008 and December 31, 2007, PLDT's aggregate remaining minimum obligation under the Amended ATPA was approximately Php645 million and Php776 million, respectively.

### *Other Obligations*

*Mandatory Conversion and Purchase of Shares.* As discussed in *Note 18 – Interest-bearing Financial Liabilities*, PLDT had issued a total of 3 million shares of Series V Convertible Preferred Stock, 5 million shares of Series VI Convertible Preferred Stock and 4 million shares of Series VII Convertible Preferred Stock in exchange for a total of 58 million shares of Series K Class I Convertible Preferred Stock of Piltel, pursuant to the debt restructuring plan of Piltel adopted in June 2001. As at March 31, 2008, 2,694,137 shares of the Series V Convertible Preferred Stock, 4,884,189 shares of the Series VI Convertible Preferred Stock and all of the 3,842,000 shares of the Series VII Convertible Preferred Stock had been voluntarily converted into shares of PLDT's common stock and 27,303 shares of the Series V Convertible Preferred Stock and 410,915 shares of the Series VI Convertible Preferred Stock remained outstanding.

Each share of Series V and VI Convertible Preferred Stock is convertible at any time at the option of the holder into one share of PLDT's common stock. Shares of Series V and Series VI Convertible Preferred Stock which are outstanding on the seventh anniversary of the issue date thereof, will be mandatorily converted into shares of PLDT's common stock on the date immediately following such anniversary date. Under a put option exercisable for 30 days following the mandatory conversion, holders of shares of PLDT's common stock received on mandatory conversion of the Series V and VI Convertible Preferred Stock will be able to require PLDT to purchase such shares of PLDT's common stock for Php1,700 per share and US\$36.132 per share, respectively.

The aggregate value of the put options based on outstanding shares as at March 31, 2008 was Php666 million assuming all of the outstanding shares of the Series V and VI Convertible Preferred Stock were mandatorily converted on June 5, 2008 and all shares of PLDT's common stock issued upon such conversion were put to PLDT at that time in accordance with the terms of the put option. The market value of the underlying shares of PLDT's common stock was Php1,234 million, based on the market price of PLDT common shares of Php2,815 per share as at March 31, 2008. On March 4, 2008, PLDT issued a notice to the effect that all of the shares of Series V and VI Convertible Preferred Stock originally issued on June 4, 2001 and outstanding as at June 4, 2008 will be mandatorily converted on June 5, 2008 to shares of PLDT's common stock. As a result of such mandatory conversion, holders of shares of PLDT's common stock received on mandatory conversion of the shares of Series V and VI Convertible Preferred Stock will be able to exercise the above described put option in accordance with its terms.

*Derivative Financial Liabilities.* See Note 26 – *Financial Assets and Liabilities* for the detailed discussion of our derivative financial liabilities.

*Various trade and other obligations.* PLDT Group has various obligations to suppliers for the acquisition of phone and network equipment, contractors for services rendered on various projects, foreign administrations and domestic carriers for the access charges, shareholders for unpaid dividends distributions, employees for benefits related obligations, and various business and operational related agreements. As at March 31, 2008 and December 31, 2007, total obligations under these various agreements amounted to approximately Php60,792 million and Php36,780 million, respectively.

#### ***Commercial Commitments***

As at March 31, 2008 and December 31, 2007, our outstanding commercial commitments, in the form of letters of credit, amounted to Php1,132 million and Php3,782 million, respectively. These commitments expire within one year.

---

## **25. Provisions and Contingencies**

### *NTC Supervision and Regulation Fees, or SRF*

Since 1994, following the rejection of PLDT's formal protest against the assessments by the NTC of SRF, PLDT and the NTC had been involved in legal proceedings before the Court of Appeals and the Supreme Court. The principal issue in these proceedings was the basis for the computation of the SRF. PLDT's position, which was upheld by the Court of Appeals, but, as set forth below, rejected by the Supreme Court, was that the SRF should be computed based only on the par value of the subscribed or paid up capital of PLDT, excluding stock dividends, premium or capital in excess of par. The Supreme Court, in its decision dated July 28, 1999, ordered the NTC to make a recomputation of the SRF based on PLDT's capital stock subscribed and paid. Subsequently, in February 2000, the NTC issued an assessment letter for the balance of the SRF, but in calculating said fees, the NTC used as a basis not only capital stock subscribed or paid but also the stock dividends. PLDT questioned the inclusion of the stock dividends in the calculation of the SRF and sought to restrain the NTC from enforcing/implementing its assessment until the resolution of the said issue. Prior to the resolution of the issue mentioned above, PLDT paid the SRF due in 2000 together with the balance due from the recalculation of the SRF and had been paying the SRF due in September of each year thereafter, excluding the portion that was based on stock dividends.

The Supreme Court, in a resolution promulgated on December 4, 2007, upheld the NTC assessment of SRF based on outstanding capital stock of PLDT, including stock dividends. On April 3, 2008, PLDT complied with the Supreme Court Resolution in paying the outstanding principal amount relating to SRF on stock dividends in the amount of Php455 million to the NTC. **PLDT protested and disputed NTC's assessments in the total amount of Php2,870 million which included penalties and NTC's computation thereof which PLDT believes is contrary to applicable laws and without any legal basis.** In a letter dated April 14, 2008, the NTC demanded for payment of the balance of their assessment which PLDT intends to contest in appropriate proceedings.

### *Local Business and Franchise Tax Assessments*

As discussed below, PLDT currently expects that going forward, PLDT will pay local franchise taxes on an annual basis based on the gross receipts received or collected for services rendered within the jurisdiction of the respective taxing authority. For this reason, we have made the appropriate provisions in our unaudited consolidated financial statements as at March 31, 2008.

The Local Government Code of 1991, or Republic Act (R.A.) 7160, which took effect on January 1, 1992, extended to local government units, or LGUs, the power to tax businesses within their territorial jurisdiction granted under Batas Pambansa 337, and withdrew tax exemptions previously granted to franchise grantees under Section 12 of R.A. 7082.

PLDT believes, based on the opinion of its legal counsel, that the Public Telecommunications Policy Act, or R.A. 7925, which took effect on March 16, 1995, and the grant of local franchise and business taxes exemption privileges to other franchise holders subsequent to the effectivity of R.A. 7160, implicitly restored its local franchise and business taxes exemption privilege under Section 12 of R.A. 7082, or the PLDT Franchise pursuant to Section 23 thereof or the equality of treatment clause. To confirm this position, PLDT sought and obtained on June 2, 1998 a ruling from the Bureau of Local Government Finance, or BLGF, of the Philippine Department of Finance, which ruled that PLDT is exempt from the payment of local franchise and business taxes imposable by LGUs under R.A. 7160. However, on March 25, 2003, in a ruling relating to a tax assessment by the City of Davao, the Supreme Court decided that PLDT was not exempt from the local franchise tax.

Although PLDT believes that it is not liable to pay local franchise and business taxes, PLDT has entered into compromise settlements with several LGUs, including the City of Makati, in order to maintain and preserve its good standing and relationship with these LGUs. Under these compromise settlements, which have mostly been approved by the relevant courts, as at March 31, 2008, PLDT has paid a total amount of Php739 million for local franchise tax covering prior periods up to the end of 2006.

PLDT no longer contested assessments of LGUs for franchise taxes based on gross receipts received or collected for services within their respective territorial jurisdiction as at March 31, 2008.

However, PLDT continues to contest the imposition of local business taxes in addition to local franchise tax by the Cities of Tuguegarao, Balanga and Caloocan in the amounts of Php1.9 million, Php0.2 million and Php6.2 million, respectively, for the years 1998 to 2003 for the City of Tuguegarao, and for the years 2005 to 2007 for the Cities of Balanga and Caloocan. PLDT is likewise contesting the imposition of a business tax on the transmission of messages by the Municipality of San Pedro in the amount of Php0.3 million for the years 2005 to 2007. In addition, PLDT is contesting the imposition of franchise tax by the Province of Cagayan based on gross receipts derived from outside its territorial jurisdiction in the amount of Php3 million for the years 1999 to 2006.

While Smart had received and paid under protest the local franchise tax assessment issued by the City of Makati totaling approximately Php312 million, the Regional Trial Court, or RTC, of Makati declared Smart exempt from payment of local franchise tax to the City of Makati and on June 9, 2005, the Court of Appeals dismissed the appeal filed by the City of Makati.

Also, Smart had received local franchise tax assessments issued by the City of Iloilo amounting to approximately Php1 million. The RTC of Iloilo has likewise ruled in a decision dated January 19, 2005 that Smart is exempt from payment of local franchise tax to the City of Iloilo. To date, Smart has not received any notice that the said decision had been appealed by the City of Iloilo.

## 26. Financial Assets and Liabilities

Our principal financial liabilities, other than derivatives, comprise of bank loans and overdrafts, convertible preferred stock, finance leases, trade and non-trade payables. The main purpose of these financial liabilities is to finance our operations. We have various financial assets such as trade and non-trade receivables and cash and short-term deposits, which arise directly from our operations. We also enter into derivative transactions, primarily principal only currency swap agreements, currency options, interest rate swaps and forward foreign exchange contracts to manage the currency and interest rate risks arising from our operations and sources of financing. Our accounting policies in relation to derivatives are set out in *Note 2 – Summary of Significant Accounting Policies and Practices*.

The following table sets forth our financial assets and financial liabilities as at March 31, 2008 and December 31, 2007.

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate such value:

*Long-term financial assets and liabilities:* Fair value is based on the following:

Type	Fair Value Assumptions
Noncurrent portion of advances and refundable deposits	Estimated fair value is based on the discounted values of future cash flows using the applicable zero coupon rates plus credit spread.
Fixed rate loans:	
U.S. dollar notes/convertible debt	Quoted market price.
Other loans in all other currencies	Estimated fair value is based on the discounted value of future cash flows using the applicable CIRR and Philippine Dealing System Treasury Fixing rates for similar types of loans.
Variable rate loans	The carrying value approximates fair value because of recent and regular repricing based on market conditions.
Customers' deposits and deferred credits and other noncurrent liabilities	Estimated fair value is based on the discounted values of future cash flows using the applicable zero coupon rates plus credit spread.

*Preferred stock subject to mandatory redemption:* The fair values were determined using a discounted cash flow model.

Derivative Financial Instruments:

*Foreign currency options:* The fair values were computed using an option pricing model using market volatility rates of the U.S. dollar and Philippine peso exchange rate as at valuation date.

*Forward foreign exchange contracts, bifurcated foreign currency forwards, foreign currency and interest rate swaps:* The fair values were computed as the present value of estimated future cash flows using market U.S. dollar and Philippine peso interest rates as at valuation date.

*Bifurcated equity call options:* The fair values were computed using an option pricing model using market volatility rates of the PLDT share price as at valuation date.

*Investments-available-for sale:* Fair values were determined using quoted prices.

Due to the short-term nature of the transactions, the fair value of cash and cash equivalents, short-term investments, investment in debt securities, trade and other receivables, current portion of advances and refundable deposits, accounts payable, accrued expenses and other current liabilities, current portion of interest-bearing financial liabilities, and dividends payable approximate the carrying values as at the balance sheet date.

#### *Derivative Financial Instruments*

Our derivative financial instruments are accounted for as either cash flow hedges or transactions not designated as hedges. Cash flow hedges refer to those transactions that hedge our exposure to variability in cash flows attributable to a particular risk associated with a recognized financial asset or liability and exposures arising from forecast transactions. Changes in the fair value of these instruments representing effective hedges are recognized as cumulative translation adjustments in equity until the hedged item is recognized in earnings. For transactions that are not designated as hedges, any gains or losses arising from the changes in fair value are recognized directly to income for the period.

The table below sets out the information about our derivative financial instruments as at March 31, 2008 and December 31, 2007:

	Maturity	March 31, 2008 (Unaudited)		December 31, 2007 (Audited)

## **PLDT**

### ***Transactions Designated as Hedges***

#### *Forward Foreign Exchange Contracts*

PLDT entered into short-term U.S. dollar forward foreign exchange sale contracts to hedge a portion of monthly dollar revenues maturing monthly in 2008. As at March 31, 2008 and December 31, 2007, outstanding forward foreign exchange contracts that are designated as hedges amounted to US\$103 million with an average exchange rate of Php42.775, and US\$134 million with an average exchange rate of Php43.96, respectively. The ineffective portion of the gain in the fair value of these instruments recognized in the unaudited consolidated statement of income for the three months ended March 31, 2008 amounted to Php0.1 million. There is no ineffective portion in the fair value of these instruments recognized in the unaudited consolidated statement of income for the three months ended March 31, 2007.

In March 2008, we entered into unwind transactions to terminate US\$63 million of our forward foreign exchange contracts. The proceeds from the unwind transaction amounted to Php102 million. In addition, we entered into new forward foreign exchange sale contracts in March 2008 amounting to US\$68 million.

#### ***Transactions Not Designated as Hedges***

Due to the amounts of PLDT's foreign currency hedging requirements and the large interest differential between the Philippine peso and the U.S. dollar, the costs to book long-term hedges can be significant. In order to manage such hedging costs, PLDT utilizes structures that include currency option contracts, and fixed-to-floating coupon-only swaps that may not qualify for hedge accounting.

### *Long-term Currency Swaps*

PLDT entered into long-term principal only currency swap agreements with various foreign counterparties to hedge the currency risk on its fixed rate notes maturing in 2012 and 2017. As at March 31, 2008 and December 31, 2007, these long-term currency swaps have an aggregate notional amount of US\$510 million and US\$550 million, respectively. Under the swaps, PLDT effectively exchanges the principal of its U.S. dollar-denominated fixed rate notes into Philippine peso-denominated loan exposures at agreed swap exchange rates. The agreed swap exchange rates are reset to the lowest U.S. dollar/Philippine peso spot exchange rate during the term of the swaps, subject to a minimum exchange rate. As at March 31, 2008 and December 31, 2007, the outstanding swap contracts have an agreed average swap exchange rate of Php50.668 and Php50.756, respectively.

In March 2008, the long-term principal only currency swap agreement maturing 2012 were partially terminated thereby reducing the outstanding notional amount to US\$210 million. The total amount settled for the unwind is Php511 million.

In order to manage hedge costs, these swaps included a credit-linkage feature with PLDT as the reference entity. The specified credit events include bankruptcy, failure to pay, obligation acceleration, moratorium/repudiation, and restructuring of PLDT bonds or all or substantially all of PLDT's obligations. Upon the occurrence of any of these credit events, subject to agreed threshold amounts where applicable, the obligations to both PLDT and its counterparty under the swap contracts terminate without further settlements to either party, including any mark-to-market value of the swaps. As at March 31, 2008 and December 31, 2007, US\$646 million and US\$686 million, respectively, of PLDT's long-term currency swaps/options have been structured to include credit-linkage with PLDT as the reference entity. The semi-annual fixed or floating swap cost payments that PLDT is required to make to its counterparties averaged about 3.60% and 4.01% per annum as at March 31, 2008 and December 31, 2007, respectively.

Until December 31, 2007, changes in the fair value of the financial instruments were booked to equity. Effective January 1, 2008, PLDT opted to discontinue the hedge accounting treatment for its long-term currency swaps. Consequently, the loss deferred under equity amounting to Php359 million was recognized in the profit or loss. Any movements in the fair value of the instrument are now taken to profit or loss in the unaudited consolidated statement of income.

### *Long-term Foreign Currency Options*

To manage hedging costs, the currency swap agreement relating to the 2009 fixed rate notes with a notional amount of US\$175 million has been structured to include currency option contracts. If the Philippine peso to U.S. dollar spot exchange rate on maturity date settles beyond Php52.500 to US\$1.00 up to Php90.00 to US\$1.00, PLDT will have the option to purchase U.S. dollar at an exchange rate of Php52.500 to US\$1.00. On the other hand, if the Philippine peso to U.S. dollar spot exchange rate settles beyond Php90.00, PLDT will have the option to purchase U.S. dollar at an exchange rate of Php52.50 to US\$1.00 plus the excess above the agreed threshold rate. If on maturity, the Philippine peso to U.S. dollar spot exchange rate is lower than the exchange rate of Php52.50 to US\$1.00, PLDT will have the option to purchase at the prevailing Philippine peso to U.S. dollar spot exchange rate. The option contracts have been structured to include credit-linkage with PLDT as the reference entity similar to the long-term currency swaps. The net semi-annual floating hedge cost payments that PLDT is required to pay under these transactions was approximately 3.33% and 4.34% per annum as at March 31, 2008 and December 31, 2007, respectively.

In December 2006, the currency option agreement was partially terminated, thereby reducing the outstanding currency options notional amount to US\$167 million. The total amounts settled for the unwinding was Php33 million.

In January 2007, the currency option agreement was again partially terminated, thereby further reducing the outstanding currency options notional amount to US\$136 million. The total amounts settled for the unwinding was Php44 million.

Until December 31, 2007, changes in the fair value of PLDT's option to purchase U.S. dollar at Php52.50 to US\$1.00 or prevailing spot exchange rate at maturity, whichever is lower, were booked to equity. Effective January 1, 2008, PLDT opted to discontinue the hedge accounting treatment for its long-term foreign currency

options. Consequently, the gain deferred under equity amounting to Php1,055 million was recognized in the profit or loss. Any movements in the fair value of the instrument are now taken to profit or loss in the unaudited consolidated statement of income.

#### *Forward Foreign Exchange Contracts*

In 2007, PLDT entered into short-term U.S. dollar forward foreign exchange sale contracts to hedge a portion of monthly dollar revenues maturing monthly in 2008. As at March 31, 2008, there were no outstanding forward foreign exchange contracts not designated as hedges while the outstanding forward foreign exchange contracts not accounted for under hedge accounting as at December 31, 2007 amounted to US\$16 million with an average exchange rate of Php43.19.

In March 2008, PLDT entered into unwind transactions to terminate US\$16 million of our forward foreign exchange contracts. The proceeds from the unwind transaction amounted to Php11 million.

#### *Interest Rate Swap*

A portion of PLDT's currency swap agreements to hedge its 2017 fixed rate notes carry fixed rate swap cost payments. To effectively lower the running cost of such swap agreements, in April 2003, PLDT entered into an agreement to swap the coupon on US\$125 million of its 2012 fixed rate notes into a floating rate Japanese yen amount. Under this agreement, PLDT is entitled to receive a fixed coupon rate of 11.375%, provided the Japanese yen to U.S. dollar exchange rate stays above JP¥99.90 to US\$1.00. Below this level, a reduced fixed coupon rate of 3% will be due to PLDT. In order to mitigate the risk of the Japanese yen strengthening below the agreed threshold, in December 2003, PLDT entered into an overlay swap transaction to effectively lower the portion of the coupon indexed to the U.S. dollar to Japanese yen rate to 3% such that the fixed coupon rate due to PLDT when the Japanese yen strengthens below the agreed threshold will be 8.375%. Both swap agreements include a credit-linkage feature with PLDT as the reference entity.

In March 2006, the interest rate and overlay swap agreements were partially terminated to effectively lower the outstanding interest rate swap notional amount to US\$63 million. Since changes in fair values have already been recognized as profit or loss in prior periods, the corresponding liability settled by PLDT amounted to Php804 million.

In April 2007, the interest and overlay swap agreements were again partially terminated where outstanding notional amount was lowered to US\$31 million. The total amounts settled for the unwinding is Php276 million.

In March 2008, the outstanding interest rate and overlay swap agreements were fully terminated. The total settlement amount for this unwind is Php223 million.

#### *Bifurcated Equity Call Options*

Pursuant to Piltel's debt restructuring plan, PLDT issued its shares of Series VI and VII Convertible Preferred Stock. See *Note 18 – Interest-bearing Financial Liabilities*. Each share of Series VI and VII Convertible Preferred Stock is convertible at any time at the option of the holder into one share of PLDT's common stock. On the date immediately following the seventh anniversary of the issue date of the Series VI Convertible Preferred Stock and on the eighth anniversary of the issue date of the Series VII Convertible Preferred Stock, the remaining outstanding shares under these series will be mandatorily converted into shares of PLDT's common stock. For 30 days thereafter, the holders of these mandatorily converted shares of PLDT's common stock have the option to sell such shares of PLDT's common stock back to PLDT for US\$36.132 per share and JP¥4,071.89 per share for Series VI and VII, respectively. On August 18, 2006, all of the 3,842,000 shares of the Series VII were converted to PLDT's common stock. As at March 31, 2008 and December 31, 2007, the negative fair market value of these embedded call options amounted to Php120 million and Php231 million, respectively.

## **Smart**

### ***Cash Flow Hedges***

Smart entered into short-term U.S. dollar forward foreign exchange sale contracts to hedge a portion of monthly dollar revenues maturing monthly in 2008 and loan proceeds from the Nord/LB Facility.

The outstanding forward foreign exchange contracts as at March 31, 2008 amounted to US\$223 million with an average exchange rate of Php42.172 which are all designated as hedges. As at December 31, 2007, outstanding forward foreign exchange contracts amounted to US\$226 million, of which US\$171 million with an average exchange rate of Php43.293 were designated as hedges, while US\$55 million with an average exchange rate of Php42.997 did not qualify under hedge accounting. The ineffective portion of the gain in the fair value of these instruments recognized in the unaudited consolidated statement of income for the three months ended March 31, 2008 amounted to Php8 million. There is no ineffective portion in the fair value of these instruments recognized in the unaudited consolidated statement of income for the three months ended March 31, 2007.

In January 2008, Smart entered into additional short term U.S. dollar forward foreign exchange sale contracts amounting to US\$71.5 million with an average exchange rate of Php41.158 to hedge dollar revenues maturing monthly in 2008.

In March 2008, Smart entered into unwind transactions to terminate US\$172 million of outstanding forward foreign exchange contracts. The proceeds from the unwind transaction amounted to Php89 million. Consequently, new forward foreign exchange sale contracts were entered into in March 2008 amounting to US\$172 million with an average exchange rate of Php42.018.

### ***Transactions not Designated as Hedges***

Smart's other embedded derivatives were bifurcated from service and purchase contracts. As at March 31, 2008 and December 31, 2007, outstanding contracts included service contracts with foreign equipment suppliers and various suppliers covering handset importations denominated in U.S. dollars, which is not the functional currency of a substantial party to the contract or the routine currency of the transaction.

## **ePLDT**

### ***Cash Flow Hedges***

ePLDT subsidiaries, namely Vocativ Systems, Inc., Parlance Systems, Inc. and SPi Technologies, Inc. (hereafter collectively referred to in this section as "ePLDT") entered into short-term U.S. dollar forward foreign exchange sale contracts to hedge a portion of monthly dollar revenues maturing monthly in 2008. As at March 31, 2008 and December 31, 2007, outstanding forward foreign exchange contracts that are designated as hedges amounted to US\$45 million with an average exchange rate of Php42.740, and US\$36 million with an average exchange rate of Php44.700, respectively. The ineffective portion of the loss in the fair value of these instruments recognized in the unaudited consolidated statement of income for the three months ended March 31, 2008 amounted to Php0.12 million. There is no ineffective portion in the fair value of these instruments recognized in the unaudited consolidated statement of income for the three months ended March 31, 2007.

In March 2008, we entered into unwind transactions to terminate US\$18 million of our forward foreign exchange contracts. The proceeds from the unwind transaction amounted to Php45.84 million. In addition, we entered into new forward foreign exchange sale contracts in March 2008 amounting to US\$28 million.

### **Financial Risk Management Objectives and Policies**

The main risks arising from our financial instruments are liquidity risk, foreign exchange risk, interest rate risk and credit risk. The importance of managing those risks has significantly increased in light of the considerable change and volatility in both the Philippine and international financial markets. Our board of directors reviews and approves policies for managing each of these risks. Our policies for managing these risks are summarized below.

We also monitor the market price risk arising from all financial instruments.

### ***Liquidity Risk***

We manage our liquidity profile to be able to finance our operations and capital expenditures, service our maturing debts and meet our other financial obligations. To cover our financing requirements, we use internally generated funds and proceeds from debt and equity issues and sales of certain assets.

As part of our liquidity risk management program, we regularly evaluate our projected and actual cash flows, including our loan maturity profiles, and continuously assess conditions in the financial markets for opportunities to pursue fund-raising initiatives. These activities may include bank loans, export credit agency-guaranteed facilities, debt capital and equity market issues.

Any excess funds are primarily invested in short-dated and principal-protected bank products that provide flexibility of withdrawing the funds anytime. We also allocate a portion of our cash in longer tenor investments such as fixed income securities issued or guaranteed by the Republic of the Philippines, or ROP, and Philippine banks and corporates, managed funds and other structured products linked to the ROP. We regularly evaluate available financial products and monitor market conditions for opportunities to enhance yields at acceptable risk levels. Our investments are also subject to certain restrictions contained in our debt covenants. Our funding arrangements are designed to keep an appropriate balance between equity and debt and to provide financing flexibility while enhancing our businesses.

A summary of the maturity profile of our financial liabilities as at March 31, 2008 and December 31, 2007 based on contractual undiscounted payments is set out in *Note 24 – Contractual Obligations and Commercial Commitments*.

### ***Foreign Currency Exchange Risk***

The revaluation of our foreign currency-denominated financial assets and liabilities as a result of the appreciation or depreciation of the Philippine peso is recognized as foreign exchange gains or losses as at the balance sheet date. The extent of foreign exchange gains or losses is largely dependent on the amount of foreign currency debt and hedges we carry. While a certain percentage of our revenues are either linked to or denominated in U.S. dollars, most of our indebtedness and related interest expense, a substantial portion of our capital expenditures and a portion of our operating expenses are denominated in foreign currencies, mostly in U.S. dollars. As such, a strengthening or weakening of the Philippine peso against the U.S. dollar will decrease or increase in Philippine peso terms both the principal amount of our unhedged foreign currency-denominated debts and the related interest expense of our foreign currency-denominated capital expenditures and operating expenses as well as our U.S. dollar-linked and U.S. dollar-denominated revenues. In addition, many of our financial ratios and other financial tests are affected by the movements in the Philippine peso to U.S. dollar exchange rate.

To manage our foreign exchange risks and to stabilize our cash flows to improve investment and cash flow planning, we enter into forward foreign exchange contracts, currency swap contracts, currency option contracts and other hedging products aimed at reducing and/or managing the adverse impact of changes in foreign exchange rates on our operating results and cash flows. We use forward foreign exchange purchase contracts, currency swap contracts and foreign currency option contracts to manage the foreign currency risks associated with our foreign currency-denominated loans. We also enter into forward foreign exchange sale contracts to manage foreign currency risks associated with our U.S. dollar-linked and U.S. dollar-denominated revenues. In order to manage hedge costs of these contracts, we utilize structures that include credit-linkage with PLDT as the reference entity, a combination of foreign currency option contracts, and fixed to floating coupon only swap agreements. We accounted for these instruments as either cash flow hedges, wherein changes in the fair value are recognized as cumulative translation adjustments in equity until the hedged transaction affects the unaudited consolidated statement of income or when the hedging instrument expires, or transactions not designated as hedges, wherein changes in the fair value are recognized directly as income or expense for the period.

The following table shows our consolidated foreign currency-denominated monetary financial assets and liabilities and their Philippine peso equivalents as at March 31, 2008 and December 31, 2007:

	March 31, 2008 (Unaudited)		December 31, 2007 (Audited)

<b>Total Financial Liabilities</b>	<b>US\$1,791</b>	<b>Php74,790</b>	<b>US\$1,761</b>	<b>Php72,915</b>

<sup>(1)</sup> The exchange rate used to translate the U.S. dollar amounts into Philippine peso was Php41.756 to US\$1.00, the peso-dollar rate as quoted through the Philippine Dealing System as at March 31, 2008.

<sup>(2)</sup> The exchange rate used to translate the U.S. dollar amounts into Philippine peso was Php41.411 to US\$1.00, the peso-dollar rate as quoted through the Philippine Dealing System as at December 31, 2007.

As at May 5, 2008, the peso-dollar exchange rate was Php42.332 to US\$1.00. Using this exchange rate, our consolidated net foreign currency-denominated financial liabilities as at March 31, 2008 would have increased by Php832 million.

As at March 31, 2008, approximately 89% of our total consolidated debts was denominated in U.S. dollars. Consolidated foreign currency-denominated debt was increased to Php55,460 million as at March 31, 2008 from Php52,540 million as at December 31, 2007. PLDT's outstanding long-term principal only currency swap contracts and foreign currency option contracts amounted to US\$510 million and US\$136 million, respectively, as at March 31, 2008. Consequently, the unhedged portion of consolidated debt amounts was approximately 49% (or 40%, net of our U.S. dollar cash balances) as at March 31, 2008.

For the three months ended March 31, 2008, approximately 35% of our consolidated service revenues were denominated in U.S. dollars and/or were linked to the U.S. dollars. In this respect, the recent appreciation of the Philippine peso against the U.S. dollar reduced our revenues, and consequently, our cash flow from operations in Philippine peso terms.

The Philippine peso had depreciated by 0.8% against the U.S. dollar to Php41.756 to US\$1.00 as at March 31, 2008 from Php41.411 to US\$1.00 as at December 31, 2007. As at December 31, 2007, the peso had appreciated by 15.6% to Php41.411 to US\$1.00 from Php49.045 to US\$1.00 as at December 31, 2006. As a result of the foreign exchange movements as well as the amount of our outstanding foreign currency debts and hedges, we recognized foreign exchange losses of Php288 million and gains of Php588 million for the three months ended March 31, 2008 and 2007, respectively.

Management conducted a survey among our banks to determine the outlook of the peso-dollar exchange rate until our next reporting date of June 30, 2008. Our outlook is that the peso-dollar exchange rate may weaken/strengthen by 2% as compared to the exchange rate of Php41.756 to US\$1.00 as at March 31, 2008. If the peso-dollar exchange rate had weakened/strengthened by 2% at March 31, 2008, with all other variables held constant, profit after tax for the period would have been Php470 million higher/lower and our consolidated stockholders' equity would have been Php658 million higher/lower, mainly as a result of foreign exchange gains, losses on translation of U.S. dollar-denominated net assets/liabilities, marked-to-market valuation of financial assets/liabilities and

foreign exchange gains/losses on translation of cash flow hedges transactions.

### Interest Rate Risk

Our exposure to the risk of changes in market interest rates relates primarily to our long-term debt obligations and short-term borrowings with floating interest rates.

Our policy is to manage interest cost through a mix of fixed and variable rate debts. We evaluate the fixed to floating ratio of our loans in line with movements of relevant interest rates in the financial markets. Based on our assessment, new financing will be priced either on a fixed or floating rate basis. On a limited basis, we enter into interest rate swap agreements in order to manage our exposure to interest rate fluctuations. We make use of hedging instruments and structures solely for reducing or managing financial risk associated with our liabilities and not for trading purposes.

The following tables set out the carrying amount, by maturity, of our financial instruments that are exposed to interest rate risk as at March 31, 2008 and December 31, 2007. Financial instruments that are not subject to interest rate risk were not included in the table.

Fixed rate financial instruments are subject to fair value interest rate risk while floating rate financial instruments are subject to cash flow interest rate risk.

Repricing of floating rate financial instruments is mostly done on intervals of three months or six months. Interest on fixed rate financial instruments is fixed until maturity of the particular instrument. Financial instruments that are not subject to interest rate risk were not included in the above tables.

Management conducted a survey among our banks to determine the outlook of the U.S. dollar and Philippine peso interest rates until our next reporting date of June 30, 2008. Our outlook is that the U.S. dollar and Philippine peso interest rates may move 40 basis points and 60 basis points higher/lower, respectively, as compared to levels as at March 31, 2008. If U.S. dollar interest rates had been 40 basis points higher/lower as compared to market levels as at March 31, 2008, with all other variables held constant, profit after tax for the period would have been Php312 million lower/higher as at March 31, 2008, mainly as a result of higher/lower interest expense on floating rate borrowings and loss/gain on derivatives transactions, except those derivatives designated and considered as effective hedging instruments and our consolidated stockholders' equity would have been Php299 million lower/higher mainly as a result of a decrease/increase in the fair value of cash flow hedges. If Philippine peso interest rates had been 60 basis points higher/lower as compared to market levels as at March 31, 2008, with all other variables held constant, profit before tax for the period would have been Php425 million lower/higher as at March 31, 2008, mainly as a result of higher/lower interest expense on floating rate borrowings and loss/gain on derivatives transactions, except those derivatives designated and considered as effective hedging instruments and our stockholders' equity would have been Php406 million lower/higher mainly as a result of a decrease/increase in the profit or loss and fair value of cash flow hedges.

### ***Credit Risk***

Credit risk is the risk that we will incur a loss arising from our customers, clients or counterparties that fail to discharge their contractual obligations. We manage and control credit risk by setting limits on the amount of risk we are willing to accept for individual counterparties and by monitoring exposures in relation to such limits.

We trade only with recognized and creditworthy third parties. It is our policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an on-going basis to reduce our exposure to bad debts.

We established a credit quality review process to provide regular identification of changes in the creditworthiness of counterparties. Counterparty limits are established and periodically reviewed based on latest available financial data on our counterparties' credit ratings, capitalization, asset quality and liquidity. Our credit quality review process allows us to assess the potential loss as a result of the risks to which we are exposed and take corrective actions.

The table below shows the maximum exposure to credit risk for the components of the unaudited consolidated balance sheet, including derivative financial instruments.

	Gross Maximum Exposure <sup>(1)</sup>		Net Maximum Exposure <sup>(2)</sup>

### *Impairment assessments*

The main consideration for the impairment assessment include whether any payments of principal or interest are overdue by more than 90 days or there are any known difficulties in the cash flows of counterparties, credit rating downgrades, or infringement of the original terms of the contract. Our impairment assessments are classified into two areas: individually assessed allowance and collectively assessed allowance.

#### *Individually assessed allowance*

We determine the allowance appropriate for each individually significant loan or advance on an individual basis. Items considered when determining allowance amounts include the sustainability of the counterparty's business plan, its ability to improve performance once a financial difficulty has arisen, projected receipts and the expected dividend payout should bankruptcy ensue, the availability of other financial support, the realizable value of collateral, if any, and the timing of the expected cash flows. The impairment losses are evaluated at each reporting date, unless unforeseen circumstances require more careful attention.

#### *Collectively assessed allowances*

Allowances are assessed collectively for losses on loans and advances that are not individually significant and for individually significant loans and advances where there is no objective evidence of individual impairment. Allowances are evaluated on each reporting date with each portfolio receiving a separate review.

The collective assessment takes account of impairment that is likely to be present in the portfolio even though there is no objective evidence of the impairment in an individual assessment. Impairment losses are estimated by taking into consideration the following information: historical losses on the portfolio, current economic conditions, the approximate delay between the time a loss is likely to have been incurred and the time it is identified as requiring an individually assessed impairment allowance, and expected receipts and recoveries once impaired. The impairment allowance is then reviewed by credit management to ensure alignment with our policy.

### ***Capital Management***

We aim to achieve an optimal capital structure in pursuit of our business objectives which include maintaining healthy capital ratios and strong credit ratings, and maximizing shareholder value.

In recent years, our cashflow from operations has allowed us to substantially reduce debts and, in 2005, resume payment of dividends on common shares. Since then, our strong cashflows have enabled us to make investments in new areas and pay higher dividends.

Our approach to capital management focuses on balancing the allocation of cash and the incurrence of debt as we seek new investment opportunities for new businesses and growth areas. Our current dividend policy is to pay out 70% of our core earnings per common share. Further, in the event no investment opportunities arise, we may consider the option of returning additional cash to our shareholders in the form of special dividends or share buybacks. Philippine corporate regulations prescribe, however, that we can only pay out dividends or make capital distribution up to the amount of our unrestricted retained earnings.

As part of our goal to maximize returns to our shareholders, we obtained on January 29, 2008 an approval from our board of directors to conduct a share buyback program for up to two million PLDT common shares. As at May 5, 2008, we have acquired a total of 346,260 shares of common stock at a weighted average price of Php2,720 for a total of Php942 million. See *Note 17 – Equity*.

Some of our debt instruments contain covenants that impose maximum leverage ratios. In addition, our credit ratings from the international credit ratings agencies are based on our ability to remain within certain leverage ratios.

We monitor capital using several financial leverage measurements, such as net debt to equity ratio. Net debt is derived by deducting cash and cash equivalents and short-term investments from total debt (notes payable and long-term debt). Our objective is to maintain our net debt to equity ratio below 100%.
